(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

(Title of each class)  
Common Stock, \$0.0001 par value

(Name of each exchange on which registered)  
The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: **None.**

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such

files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer   
(Do not check if a  
smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

As June 30, 2012 (the last business day of the registrant's most recently completed second fiscal quarter), the aggregate market value of voting stock held by non-affiliates of the registrant was \$986,683,000.

As of February 25, 2013, the number of shares of the registrant's common stock outstanding was 22,955,891.

#### Documents Incorporated by Reference

Portions of the registrant's definitive proxy statement for its 2013 annual meeting of stockholders are incorporated by reference in Items 10, 11, 12, 13 and 14 of Part III.

## PART I

### SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends affecting the financial condition of our business. Forward-looking statements should not be read as a guarantee of future performance or results, and will not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved. Forward-looking statements are based on information available at the time those statements are made and/or management's good faith belief as of that time with respect to future events, and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. Important factors that could cause such differences include, but are not limited to:

- our ability to accurately forecast revenues and appropriately plan our expenses;
- the impact of worldwide economic conditions, including the resulting effect on consumer spending;
- our ability to maintain an adequate rate of growth;
- our ability to effectively manage our growth;
- our ability to attract new restaurant customers;
- our ability to acquire new users for our websites and mobile applications;
- our ability to retain existing restaurant customers and diners or encourage repeat reservations;
- the effects of increased competition in our business;
- our ability to keep pace with changes in technology and our competitors;
- the impact of people using devices other than personal computers to access the Internet;
- our ability to successfully enter new markets and manage our international expansion;
- our ability to provide a high-quality customer experience through our products and services;
- our ability to successfully manage any acquisitions of businesses, solutions or technologies;
- the impact of fluctuations in currency exchange rates;
- the success of our marketing efforts;
- changes in consumer behavior and any related impact on the restaurant industry, especially in the geographic markets in which we operate;
- seasonal patterns in restaurant dining;
- interruptions in service and any related impact on our reputation;
- the attraction and retention of qualified employees and key personnel;
- our ability to protect our intellectual property, including our proprietary ERB and Connect products;
- costs associated with defending intellectual property infringement and other claims;
- our ability to choose and effectively manage third-party service providers;
- the effects of natural or man-made catastrophic events;
- the effectiveness of our internal controls;

- changes in our tax rates or exposure to additional tax liabilities;
- changes in government regulation affecting us or our business; and
- other risk factors included under "Risk Factors" in this report.

In addition, in this report, the words "believe," "may," "will," "estimate," "continue," "anticipate," "intend," "expect," "predict," "potential" and similar expressions, as they relate to our company, our business and our management, are intended to identify forward-looking statements. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this report may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements.

Forward-looking statements speak only as of the date of this report. You should not put undue reliance on any forward-looking statements. We assume no obligation to update forward-looking statements to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking information, except to the extent required by applicable laws. If we update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements.

## **ITEM 1. BUSINESS**

### **Overview**

OpenTable, Inc. (together with its subsidiaries, "OpenTable," the "Company," "our," "we," or "us") was incorporated on October 13, 1998, and is a Delaware corporation. We provide solutions that form an online network connecting reservation-taking restaurants and people who dine at those restaurants. Our solutions for restaurants include our proprietary Electronic Reservation Book, or ERB, and Connect, as well as a number of related products and services. Our solutions for diners include our popular restaurant reservation websites and mobile applications, or apps. The OpenTable network includes more than 27,000 OpenTable restaurant customers spanning all 50 states as well as select markets outside of the United States. Since our inception in 1998, we have seated over 400 million diners through OpenTable reservations, and during the three months ended December 31, 2012, we seated an average of approximately 10.9 million diners per month. Restaurants that use our ERB pay us a one-time installation fee for onsite installation and training, a monthly subscription fee for the use of our software and hardware and a fee for each restaurant guest seated through online reservations, as applicable. Restaurants that use Connect pay us a fee for each restaurant guest seated through online reservations. Diners can use our online restaurant reservation service for free. For the twelve months ended December 31, 2012 and 2011, our net revenues were \$161.6 million and \$139.5 million, respectively. For the twelve months ended December 31, 2012 and 2011, our reservation revenues accounted for 56% and 53% of our total revenues, respectively, our subscription revenues accounted for 35% and 36% of our total revenues, respectively, and our other revenues accounted for 9% and 11% of our total revenues, respectively.

The ERB combines proprietary software and computer hardware to deliver a solution that computerizes restaurant host-stand operations and replaces traditional pen-and-paper reservation books. Our ERB streamlines and enhances a number of business-critical functions and processes for restaurants, including reservation management, table management, guest recognition and email marketing. This enables restaurants to manage all of their reservations—those booked by phone or online as well as walk-in diners—in one unified system. The ERB also automatically accepts online reservations in real time directly from our websites and mobile apps as well as from the websites and mobile apps of our partners and restaurant customers. The ERBs at our restaurant customers connect via the Internet to form an online network of restaurant reservation books.

For restaurants that do not require the operational benefits of the ERB, we offer Connect, a web-based solution that enables participating restaurants to receive reservations from our websites and mobile apps as well as the websites and mobile apps of our partners and restaurant customers.

For diners, our websites and mobile apps enable them to quickly and conveniently find, choose and book tables at restaurants on the OpenTable network, overcoming the inefficiencies associated with the traditional process of reserving by phone. Diners appreciate the convenience of being able to secure a reservation at any time, even when the restaurant is closed, and the time savings of being able to instantly find and reserve available tables without having to call restaurants one by one until they find an available reservation that suits their needs. Online visitors come to our websites and mobile apps directly, via search engine results and via our partners' and restaurant customers' websites and mobile apps.

We initially focused on acquiring a critical mass of local restaurant customers in four metropolitan areas: Chicago, New York, San Francisco and Washington, D.C. These markets have since developed into active, local networks of restaurants and diners that have continued to grow. We have applied and continue to apply the same fundamental strategy in developing and penetrating our other markets in the United States, Canada and Mexico. In 2004, we began to selectively expand into countries outside of North America that are characterized by large numbers of online consumer transactions and reservation-taking restaurants. To date, we have concentrated our international efforts in Germany, Japan and the United Kingdom. Our revenues outside of North America for the twelve months ended December 31, 2012, 2011 and 2010 were \$22.3 million, \$20.9 million and \$8.9 million, respectively, or 14%, 15% and 9% of our total revenues, respectively.

We measure our business geographically based on two segments: North America and International. Additional information required by this item is incorporated herein by reference to Note 13—"Segment Information" of the Notes to the consolidated financial statements, beginning on page 84 of this Form 10-K.

## **Restaurant Industry Background**

The commercial restaurant industry is broadly divided into "quick-service" and "full-service" segments. We target our offerings to full-service restaurants that accept reservations. We believe based on our internal estimates that our ERB has a target audience of approximately 35,000 restaurants and Connect has a target audience of approximately 20,000 restaurants in North America. In 2012, we believe these restaurants seated approximately 740 million diners through reservations, though this number may fluctuate annually with economic and other conditions.

Historically, the ability of the restaurant industry to leverage the power of the Internet for reservation transactions has been inhibited by two key characteristics. First, the reservation-taking restaurant industry has been slow to computerize host-stand operations. During the last decade, other reservation-taking industries, such as airlines and hotels, have experienced a dramatic shift in consumer behavior as reservations have migrated from the phone to the Internet. In contrast, given the restaurant industry's relatively basic transaction needs, generally requiring only the diner's name and phone number and no advance payment, restaurant reservations traditionally have been largely handled by the traditional pen-and-paper reservation book, despite the inherent operational inefficiencies and potential for error. Second, the reservation-taking restaurant industry is highly fragmented, with independent restaurants and small, local restaurant groups comprising a significant majority of restaurant locations. Unlike other industries in which suppliers can deliver goods and services to customers around the world, the restaurant industry is inherently local. These conditions make it time-consuming and costly to aggregate the breadth of local restaurant table inventory required to attract a critical mass of diners to make reservations online and to create an online restaurant reservation network.

In addition, reservation-taking restaurants generally share the following operational challenges:

- *Profitability is dependent on filling seats.* Because restaurants typically have a high fixed cost structure, restaurant profitability is heavily dependent on filling as many seats as possible. Similar to hotel rooms and airplane seats, restaurant table inventory is highly perishable, with unfilled seats representing a significant lost revenue opportunity.
- *Prospective business is lost due to the inefficiencies of reserving by phone.* Most restaurants are not staffed to answer the phone until late morning or early afternoon, and many are only open six days per week. As a result, they lose potential business when prospective guests are not able to secure reservations by phone at their convenience. Additionally, restaurants experience costly "no-shows" when guests fail to cancel their reservations because of the inconvenience of doing so over the phone.
- *Managing and preserving guest information is difficult.* One of the ways in which restaurants compete is by providing exceptional, personalized service, for example, by recognizing repeat diners and recalling their preferences or special occasions. Guest histories and preferences are typically stored in the memories of the maître d' or host, and therefore the implications of losing a staff member who is familiar with a restaurant's best and most frequent guests are considerable. In an industry characterized by a high rate of employee turnover, the ability to preserve and transfer this information is critical.
- *Information technology resources to install and support computer-based systems are limited.* Few restaurants have the resources or time to install computer systems and troubleshoot problems with computer systems or Internet connectivity. At the same time, the fast pace of business operations means that restaurants cannot tolerate service interruptions from an equipment or networking failure.
- *Marketing opportunities with measurable results are limited.* Typically, restaurants promote themselves through magazines and newspapers as well as online dining guides and directories. However, restaurants generally do not have the ability to track the number of people who ultimately dine in response to their advertisements, nor are the costs of these advertisements tied to the number of diners they attract. Therefore, restaurants usually are unable to measure or compare the effectiveness of these marketing channels.

### Diner Behavior and Trends

For many diners, part of the appeal of dining out is experiencing a variety of restaurants. Therefore, diners value sources that help them discover new restaurants and provide information about these restaurants. Historically, diners learned about restaurants through word of mouth and local print media, such as dining guides, newspapers and magazines. While diners continue to value personal recommendations, the Internet, including desktop and increasingly, mobile sites as well as apps, now puts a wealth of restaurant information at their fingertips. However, arguably the most important piece of information—what restaurants can accommodate a dining party—has been missing from online dining sources. As a result, when it comes to booking a restaurant reservation, diners have had to use the phone instead of the Internet.

Reserving by phone can be a highly inefficient and inconvenient process, requiring diners to call one restaurant at a time until they find an available reservation that meets their needs, and then make a reservation without knowing the full range of available choices. Phone reservations can only be secured during the restaurant's business hours. Diners who call when a restaurant is closed or during peak service hours oftentimes must leave a voicemail message and wait for the restaurant to call back. Diners who do get through to a reservationist may be put on hold or informed that there are no available tables at the desired time, requiring them to call another restaurant and repeat the process until they find a suitable reservation. Diners who need to change or cancel an existing reservation experience similar difficulties in doing so by phone.

The Internet has the potential to redefine the reservation experience for diners and streamline the operations and increase the return on marketing spend for reservation-taking restaurants. In order for diners to fully embrace online restaurant reservations, they need real-time access to table inventory across a broad selection of local restaurants and the ability to instantly book confirmed reservations around-the-clock.

### **Our Solution**

Reservation-taking restaurants and diners have interconnected needs. Restaurants require cost-effective ways to attract guests and manage their reservations, while diners seek convenient ways to find available restaurants, choose among them and secure reservations. By creating an online network of restaurants and diners that can transact with each other through real-time reservations, we have developed a specialized platform for addressing the needs of both.

Essential to this network is building a critical mass of local, computerized restaurant reservation books. We achieve this by offering to reservation-intensive restaurants software that provides them with important operational benefits, bundling it with computer hardware and installing this solution at the restaurant host stand. For restaurants that primarily serve walk-in diners, we offer a web-based system to fill more seats by offering online reservations through our websites and mobile apps. We sell our solutions to individual restaurants within a market, typically one by one, via a direct sales force. We believe that we deliver a strong return on investment for our restaurant customers by filling additional seats, streamlining their operations, and improving their quality of service. As a result, we have historically enjoyed high retention rates.

Our websites and mobile apps give diners real-time access to tables at restaurants on the OpenTable network that use ERB or Connect. As more local restaurants are added to the network, the utility provided to diners increases and more diners discover the benefits of researching restaurants and making reservations on our website and mobile apps. The more diners who use our services to make their dining decisions, the more value we deliver to our restaurant customers and the more restaurants are attracted to our network.

### ***Benefits of OpenTable to Reservation-Taking Restaurants***

In response to the needs of reservation-taking restaurants, we offer the ERB, an integrated solution consisting of proprietary OpenTable software which is installed on a touchscreen computer system and supported by various asset-protection and security tools. For restaurants that do not require the operational benefits of the ERB, we offer Connect, a web-based service that enables them to receive online reservations. Both offerings provide restaurants with access to diners via our websites and mobile apps as well as the websites and mobile apps of, our partners and restaurants customers. Participation in the OpenTable network helps restaurants:

- *Fill seats that might otherwise remain empty.* We help restaurants fill their seats by offering the convenience of online reservations directly through our websites and mobile apps as well as indirectly through the websites and mobile apps of our partners and restaurant customers. In addition, restaurants may elect to be featured in OpenTable marketing programs, which drive incremental business to participating restaurants through enhanced website listings or email promotions. Restaurants pay additional fees to OpenTable to participate in these programs.
- *Create operational efficiencies by automating reservations and table management.* The reservation module of the ERB replaces the restaurant's pen-and-paper system with a computerized reservation book that records and tracks all reservations (online, phone and walk-in) in the same system, thereby improving accuracy and efficiency. Floor management capabilities improve operational efficiencies by helping restaurants maximize seat utilization, facilitate server rotations and improve table turns.

- *Boost guest recognition and overall guest service.* The integrated guest-management database included in the ERB enables restaurant staff to record diner preferences and histories in order to recognize repeat diners and provide them with personalized service. The ERB also includes email capabilities which provide restaurants with a cost-effective channel to reach and attract repeat diners. Additionally, we help restaurants monitor customer satisfaction by collecting and delivering guest feedback from OpenTable diners.
- *Computerize host-stand operations with customized, on-site installation and training and technical support.* We install our ERB, which combines proprietary software and computer hardware, at the restaurant, verifying Internet connectivity, configuring the system for the restaurant's unique needs and training staff members on its use. We monitor Internet connectivity and assist the restaurant in resolving connectivity issues. Additionally, we perform nightly data backups that enable us to restore the reservation book if necessary, and we provide around-the-clock technical support.
- *Market to a targeted audience with measurable results.* Our websites and mobile apps enable diners to find restaurants that can accommodate them, giving restaurants valuable marketing exposure during the diners' decision-making process. Moreover, restaurants pay OpenTable only for those diners whom they ultimately serve, unlike other marketing channels such as magazines, newspapers and online dining guides and directories. Consequently, restaurants know the number of diners acquired through OpenTable and the costs of acquiring each of these diners.

### ***Benefits of OpenTable to Diners***

In response to the needs of diners, we offer our websites and mobile apps for those seeking a convenient way to research restaurants and make reservations. Our websites and mobile apps enable diners to:

- *Find available tables.* Diners can search for reservations by location, date, time and party size and view table availability across a variety of restaurants. Communication between our websites and mobile apps and the thousands of ERB and Connect solutions residing at OpenTable restaurants allows reservation search results to reflect real-time availability.
- *Choose a restaurant.* In response to their searches on our websites or via our mobile apps, diners are presented with a list of restaurants with available reservations at their desired dining times. Diners may also click on a restaurant listing to view additional information, including restaurant descriptions, diner reviews, photos and menus. As of December 31, 2012, OpenTable diners had submitted more than 15 million restaurant reviews. While making their restaurant choices, diners using our websites may also consult the OpenTable Diners' Choice lists that highlight restaurants that are most highly rated by OpenTable diners, for example, Best Overall, Best Italian, Most Romantic or Good for Groups.
- *Book instantly confirmed reservations for free.* When a diner reserves through our websites or mobile apps, the reservation is instantly recorded in the restaurant's OpenTable solution. Diners can change or cancel reservations online as well as invite guests via email. Diners receive on-screen and email messages confirming their reservation details. Additionally, registered diners can earn Dining Reward Points when they make and honor OpenTable reservations. Points can be redeemed for Dining Checks that are accepted at OpenTable restaurant customers.

### **Our Strategy**

As our network of reservation-taking restaurants and diners grows, the value we deliver grows as well. Because the foundation of our network is building a critical mass of computerized reservation books, we enhance our offering to diners by adding new restaurant customers. In turn, as more diners

use OpenTable to make their dining decisions and book their reservations, we deliver more value to our restaurant customers by helping them fill more of their seats. In this process, we grow the value of our business. The key elements of this strategy include:

***Continue to Build the OpenTable Network in North America***

The value of the OpenTable network grows as participation among restaurants and diners grows. Experience in our earliest markets provides a successful model that we have implemented while entering new markets, and, as a result, our newer markets in North America have grown relatively predictably over time. We intend to continue to build our North American network by employing this proven model.

- *Produce and maintain superior solutions.* We continue to evolve our restaurant solutions based on more than a decade of in-field experience as well as feedback from our installed base of more than 27,000 restaurant customers. Additionally, we will continue to optimize our websites and mobile apps through insights gained from the experience of seating over 400 million diners through online reservations.
- *Leverage our direct sales force.* Over the last fourteen years, we have expended considerable resources to build a direct sales force skilled at selling the benefits of OpenTable to reservation-taking restaurants, which operate in an industry that is highly fragmented. We will continue to leverage our skilled direct sales force to add more restaurants to the network.
- *Provide excellent customer service and support.* We believe that our superior customer service is an integral component of high retention rates among our restaurant customers and provides us with a deep understanding of restaurant needs and general industry trends. We will continue to employ highly trained teams to provide installation and training services for our restaurant customers and augment our in-house support staff with contract support services to deliver superior customer assistance.
- *Continue to attract diners to our websites and mobile apps by offering the best reservation experience.* We believe that providing the best diner reservation experience increases market adoption of our services, builds our brand awareness and drives word-of-mouth referrals to our websites and mobile apps. We continue to enhance our websites and mobile apps for ease of use and augment our service with unique, helpful restaurant content. For example, we leverage the collective feedback of OpenTable diners to publish user-generated content that diners use while making restaurant choices. We will continue to evolve the diner reservation experience through usability testing and analytics.

***Expand Internationally***

We have augmented our growing North American business by selectively expanding into countries outside of North America that are characterized by large numbers of online consumer transactions and reservation-taking restaurants. We currently have operations in Germany, Japan and the United Kingdom, each supported with a direct sales force and operational staff. We have approximately 8,000 restaurant customers in these markets. In general, our strategy internationally is to replicate the model we have successfully employed in North America, first focusing on acquiring a critical mass of local restaurant customers. To accelerate the growth of our business in the United Kingdom, on October 1, 2010, we acquired toptable.co.uk Ltd. (now known as OpenTable International Limited), or toptable, which operated a leading restaurant reservation site in the United Kingdom.

## **Our Products**

We have created a proprietary technology system that connects our ERB, a stand-alone client server application located at each restaurant, via the Internet to our data centers which host our websites, web services and other applications. We also have created Connect, a web-based reservation system. The design of our systems enables us to provide real-time solutions to our restaurant customers and to diners.

### ***Restaurant Software and Hardware and Related Solutions***

The ERB is an integrated solution consisting of proprietary OpenTable software that is installed on a dedicated, touchscreen computer system at the restaurant's host stand and supported by various asset-protection and security tools. The ERB provides reservation management, table and floor management, guest management, marketing and a number of other business processes. This functionality has evolved through ten major software releases over fourteen years based on feedback from and experience with thousands of restaurant customers. The software is deployed globally and built on a foundation that supports rapid translation into local languages.

We provide on-site installation, training and, as part of our monthly subscription fee, around-the-clock customer support for the ERB. We monitor Internet connectivity to the ERB, alerting restaurants when they are offline and working with them to resolve any problems we detect. We also provide data protection services, including managing firewalls and virus scanning software on all computers on our network to protect restaurants from security compromises and performing nightly backups of each restaurant's database to prevent data loss in the event of a hardware failure. Our restaurant customers also receive a hardware replacement, preloaded with the restaurant's backed-up data, in the event of a computer failure, and software upgrades and updates, which are deployed via the Internet to each ERB, requiring minimal interference with the restaurant's operations.

We also offer Connect, a web-based service that enables restaurants to accept online reservations from the OpenTable network as well as through our mobile apps and from the restaurants' own websites. Our restaurant customers log in to Connect to specify available tables by time and party size. New reservations may be conveyed to the restaurant via email, SMS text message and the restaurant's Connect account.

### ***OpenTable Websites***

We design, build and operate our websites and mobile apps in North America, as well as Germany, Japan and the United Kingdom. In the United Kingdom, our service for diners operates under the toptable brand. ERB and Connect are real-time reservation systems with a patent pending on our high-speed inventory tracking and search technology. Our websites and mobile apps maintain around-the-clock communications with restaurants on our online reservation network. As a result, any change made at these restaurants to the table inventory that affects our websites and mobile apps is updated on our websites and mobile apps in real time, and diners using our websites and mobile apps get current inventory information on every search request, typically within a few seconds.

### ***Mobile Solutions***

We also offer mobile optimized versions of our websites, as well as free mobile apps of our consumer service developed for iOS, Android and Windows Mobile Platforms. These mobile solutions leverage the OpenTable network to enable diners on-the-go to view real-time table availability at restaurants that use ERB and Connect and book free, confirmed reservations. To date, over 50 million diners have been seated through OpenTable reservations made on a mobile device.

## ***Restaurant Marketing Products***

We offer our restaurant customers additional services to help fill more seats in their dining rooms. Our POP program lets restaurants offer diners bonus Dining Reward Points for reservations at select times. Participating restaurants pay a premium per-seated-diner fee for POP reservations. For restaurants with banquet spaces, we offer premium listings on our Private Dining directories. We also provide online gift card solutions for restaurants.

## ***OpenTable Restaurant Center—Our Website for Restaurant Customers***

We design, build and operate the OpenTable Restaurant Center, which serves as an information and services portal for OpenTable restaurant customers. The website provides restaurant customers with secure access to client-specific materials including detailed online reservation reports, online invoicing and feedback forms from recent diners. In addition, a restaurant can visit the OpenTable Restaurant Center website to learn about upcoming OpenTable promotions, submit date-specific information such as Valentine's Day menus and update the profile information displayed on the our websites and apps such as restaurant description and hours of operation. The OpenTable Restaurant Center website serves as a two-way communication channel between us and our restaurant customers, which ultimately improves the support we provide and drives increased operational efficiencies.

## **Sales and Marketing**

### ***Sales and Marketing to Restaurants***

We employ a direct sales force of regional account executives and sales representatives as well as a team of inside sales representatives. Our sales and marketing efforts focus on identifying qualified sales leads, communicating the benefits of computerizing the restaurant reservation book and filling seats through online reservations. Our marketing activities include lead generation, direct marketing, public relations and participation in trade shows and conferences.

### ***Marketing to Diners***

We generally benefit from significant word-of-mouth referrals and natural-search traffic to our websites and mobile apps. We encourage repeat usage through our points-based loyalty programs, OpenTable Dining Rewards, which allow diners to earn Dining Points when they make and honor OpenTable reservations. We also optimize our websites to improve our positioning in natural search engine results. We selectively invest in different forms of online and offline marketing, including paid-search advertising, outdoor advertising, and other forms of marketing designed to introduce diners to our service.

In addition to operating our own destination websites and mobile apps, we work with hundreds of partners to enhance their restaurant listings with OpenTable online reservation capabilities. We also encourage our restaurant customers to incorporate OpenTable reservation capabilities into their own websites, which not only introduces diners to the convenience of online reservations but also helps restaurants fill more seats by providing around-the-clock reservation capabilities.

## **Customer Support**

One of the reasons we enjoy high retention rates among our restaurant customers is the quality of the support we provide. This support includes the following:

- *Implementation Services for Restaurants.* Once the customer agreement is signed, we contact the restaurant to begin the implementation process, including system installation and training. First, we conduct a site survey to gather restaurant-specific information such as table layouts, restaurant capacity, hours of operation, network and Internet connectivity requirements, and

other information necessary to properly set up the OpenTable system. During a typical ERB installation, we load the software onto OpenTable hardware, establish proper network connectivity, configure the system to a restaurant's specific needs, and train restaurant staff on the new process. For Connect implementations, a personal visit to the restaurant is not needed because the product and network configuration is simpler. A customer uses his or her own computer and Internet connection. The site survey, training and other implementation activities are conducted over the telephone.

- *Ongoing Restaurant Relationship Management.* We work with our restaurant customers to ensure that the restaurant realizes the full value of the system. For example, we assist restaurants in adjusting their reservation books to maximize capacity utilization, enabling a restaurant's own website to take online reservations, tracking guest preferences and marketing to their diners.
- *Restaurant Telephone Support.* After the initial installation and training, restaurants may contact OpenTable via a toll-free number to receive technical support and follow-up training as part of our monthly service fee. Live telephone support is available 14 hours per day, seven days a week, with emergency support available around-the-clock.

Most routine support cases are handled by our two third-party customer support partners. One is located in the U.S. for our North American customers, and the other is in Europe for our European customers. When necessary, the support partners escalate calls to our in-house support team located at either our headquarters in San Francisco (for North American escalations) or our London office (for European escalations). Our support partners receive equivalent training and access to the same tools as the San Francisco and London support teams.

- *Consumer Support for Website and Mobile App Users.* Diners with questions about OpenTable have access to an online list of frequently asked questions, or FAQs, and can also email our support team via a web-based form. We use a commercially available email management system to queue, assign, track, escalate, categorize and report on these email inquiries.

## Technology

Our technology infrastructure supports the network of restaurants and diners critical to our business.

### *Data Centers and Network Access*

Our primary data center is hosted by a leading provider of hosting services in Santa Clara, California. We maintain a second data center in Atlanta, Georgia for disaster recovery. Backup systems in the second data center can be brought online in the event of a failure in the primary data center. We also operate a data center in London that supports our toptable branded websites and apps.

The data center in Santa Clara hosts our websites, other than our toptable branded websites and apps, the OpenTable Restaurant Center website and our internal applications that are used to manage the website content. The websites are designed to be fault-tolerant, with a collection of identical web servers connecting to an enterprise database. The design also includes load balancers, firewalls and routers that connect the components and provide connections to the Internet. The failure of any individual component is not expected to affect the overall availability of our websites.

Our system also includes a proprietary method of accessing website-relevant, real-time restaurant inventory from the data center, providing very fast response times. The system is designed to scale to accommodate the foreseeable growth in the number of restaurants and diners on our network.

### ***Network Security***

The data center and restaurant systems maintain real-time communication with proprietary, encrypted message protocols. We also use leading commercial antivirus, firewall and patch management technology to protect and maintain the systems located at the data center and at each restaurant.

### ***Internal Management Systems***

We have developed proprietary systems to ensure rapid, high-quality customer service, software development and website updates. The Restaurant Operations Management System, or ROMS, is a system-integrated customer support application that gives us unique customer resource management tools designed specifically for the restaurant industry. It houses detailed restaurant customer information encompassing the entire customer lifecycle, including initiating a contract, installing the OpenTable system, issuing monthly bills, tracking restaurant inventory and providing ongoing support. In addition, ROMS leverages system-integrated tools allowing for remote technical diagnosis and repair, while operating under multi-tiered security protocols to ensure restaurant customer information is protected. The Customer Help and Restaurant Management system, or CHARM, is a proprietary web content management and consumer support tool that enables rapid website customization. Restaurant profiles, descriptions, maps, partner reviews, restaurant messaging and reservation parameter configurations are all driven out of CHARM.

### ***Development***

We devote a substantial portion of our resources to developing new solutions and enhancing existing solutions, conducting product testing and quality assurance testing, improving core technology and strengthening our technological expertise in the restaurant table management and reservation market. As of December 31, 2012, our technology group consisted of 113 employees, who are focused on new feature development for existing solutions and the design of new solutions. For the twelve month periods ended December 31, 2012, 2011, and 2010, technology expenses totaled \$14.6 million, \$14.7 million and \$12.3 million, respectively.

### ***Seasonality***

The restaurant industry business is somewhat seasonal, with increases in dining at reservation-taking restaurants tied to certain holidays and restaurant-industry promotions. As a result, we typically experience higher sequential growth in diners seated during the first and fourth quarters, as compared with the second and third quarters.

### ***Intellectual Property***

Our success depends upon our ability to protect our core technology and intellectual property. To accomplish this, we rely on a combination of intellectual property rights, including trade secrets, patents, copyrights and trademarks, as well as contractual restrictions. We enter into confidentiality and proprietary rights agreements with our employees, consultants and business partners, and we control access to and distribution of our proprietary information.

We have one issued patent which expires in 2020 and ten patent applications pending in the United States. We have two patent applications pending in Europe and one patent application pending in each of India and Japan. We intend to pursue corresponding patent coverage in additional countries to the extent we believe such coverage is appropriate and cost effective.

Our registered trademarks in the United States, Japan, Switzerland and the European Union include "OpenTable" and the OpenTable logo. "OpenTable" is also registered in Canada, China, Mexico and Australia. "OpenTable.com" is also registered in the European Union. "toptable" is

registered in the United Kingdom. We have filed other trademark applications in the United States and certain other countries.

We are the registrant of the Internet domain names for our websites, which include [www.opentable.com](http://www.opentable.com), [www.otrestaurant.com](http://www.otrestaurant.com), [www.toptable.co.uk](http://www.toptable.co.uk) and our other international websites.

In addition to the foregoing protections, we generally control access to and use of our proprietary software and other confidential information through the use of internal and external controls, including contractual protections with employees, contractors, customers and partners. Our software is protected by United States and international copyright laws.

## **Competition**

### ***Competition for Reservation-Taking Restaurants***

The primary competitor for the ERB is the traditional pen-and-paper reservation book. Paper-based reservation books enjoy the advantage of being extremely familiar and simple; however, they are also time-consuming, error-prone, manual and not easily reproduced in case of loss or damage. Through our sales efforts, we explain the benefits of automation to restaurants including greater operational efficiency, superior guest recognition and service and the ability to fill additional seats by offering reservations over the Internet. Other companies attempt to address restaurant needs for computerized reservation management with a variety of technologies.

We believe the principal competitive factors in the market for computerized restaurant reservation management solutions include:

- comprehensive reservation, table and guest management functionality;
- ability to fill incremental seats for the restaurant;
- ability to deliver strong return on investment for restaurant customers;
- pricing;
- system responsiveness and ease-of-use;
- on-site, custom system installation and training;
- robust support; and
- security, reliability and data protection.

The primary competitors for Connect are other products and services that enable restaurants to allocate tables for online booking.

In international markets that we entered more recently and where we have not yet achieved a high degree of penetration, we face more intense competition from local software-development and application service provider, or ASP, vendors. We believe that, over time, the advantages that have established us as a leading provider in North America will help us as we compete in international markets.

Our restaurant marketing products compete with other online discounting and group buying services as well as traditional restaurant marketing opportunities.

### ***Competition for Diners***

Our primary competitor for diners making reservations is the phone. The phone enjoys two inherent advantages over online reservations. First, every restaurant and diner has a phone. Second, making reservations by phone is a familiar, ingrained experience for diners.

In order to compete effectively with the phone, our websites and mobile apps must offer diners a critical mass of local restaurants from which to choose and access to reservation inventory comparable to that available by phone. When combined with the growing number of restaurant customers, the OpenTable online reservation network achieves these requirements by communicating directly and in real time with the OpenTable solution at each restaurant. Additionally, we offer diners all the conveniences and time savings associated with finding and choosing local restaurants and booking reservations online, including the ability to: book reservations around-the-clock, even when restaurants are closed; find available tables in real time across a selection of local restaurants; view diner reviews, menus, photos and other important restaurant information; receive immediate confirmation of the reservation via email; change or cancel reservations online; and earn Dining Reward Points, redeemable for Dining Checks accepted by our restaurant customers.

Secondary competition comes from allocation-based reservation-taking websites that offer diners the ability to book reservations for a limited selection of restaurant table inventory. Participating restaurants identify specific reservations, generally at non-peak and unpopular times, which can be offered for booking via these allocation sites. Unlike OpenTable reservations which are immediately recorded in the ERB residing at the restaurant host stand, these allocation reservations are communicated to the restaurant by traditional phone and fax systems, email or web-based accounts that restaurants can check to access reservation requests. These methods are cumbersome for restaurants that process a large number of reservations because of the operational challenges associated with managing separate systems for online and phone-based bookings. We believe the limitations associated with allocation-based websites make them best suited for restaurants with lower reservation volumes or for use as supplemental services to fill tables at off-peak times. As a result, services that are entirely allocation-based are unlikely to provide diners with the breadth of restaurant selection and prime-time table inventory necessary to attract a large base of users.

### **Employees**

As of December 31, 2012, we had 580 full-time equivalent employees including 204 in operations and support, 179 in sales and marketing, 113 in technology and 84 in general and administrative functions. None of our employees are covered by collective bargaining agreements.

### **Available Information**

We file reports with the Securities and Exchange Commission, or SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any other filings required by the SEC. We make available on our website ([www.opentable.com](http://www.opentable.com)) our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. These materials are available free of charge on or through our website via the Investor Relations page at <http://investors.opentable.com>. References to our website addresses in this report are intended to be inactive textual references only, and none of the information contained on our website is part of this report or incorporated in this report by reference.

The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site ([www.sec.gov](http://www.sec.gov)) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

## ITEM 1A. RISK FACTORS

*Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below and the other information in this Annual Report on Form 10-K. If any of such risks actually occur, our business, operating results or financial condition could be adversely affected. In those cases, the trading price of our common stock could decline and you may lose all or part of your investment.*

### Risks Related to Our Business

***Our operations and financial results are subject to various risks and uncertainties that could adversely affect our business, financial condition, results of operations, cash flows, as well as the trading price of our common stock.***

It is difficult to accurately forecast our revenues and plan our operating expenses. We base our current and future expense levels on our operating forecasts and estimates of future revenues from restaurants. Restaurants that use our Electronic Reservation Book, or ERB, pay us an installation fee, a monthly subscription fee and a fee for each restaurant guest seated through online reservations, as applicable. Restaurants that use Connect pay us a fee for each restaurant guest seated through online reservations. Revenues and operating results are difficult to forecast due to the uncertainty of the volume and timing of obtaining new restaurant customers and of diners seated through OpenTable reservations. Some of our expenses are fixed, and, as a result, we may be unable to adjust our spending in a timely manner to compensate for any unexpected shortfall in revenues. This inability could cause our net income in a given quarter to be lower than expected.

Our revenues and operating results could vary significantly from quarter to quarter and year to year because of a variety of factors, many of which are outside of our control. As a result, comparing our operating results on a period-to-period basis may not be meaningful. In addition to other risk factors discussed in this section, factors that may contribute to the variability of our quarterly and annual results include:

- our ability to accurately forecast revenues and appropriately plan our expenses;
- the impact of worldwide economic conditions, including the resulting effect on consumer spending;
- our ability to maintain an adequate rate of growth;
- our ability to effectively manage our growth;
- our ability to attract new restaurant customers;
- our ability to acquire new users for our websites and mobile apps;
- our ability to retain existing restaurant customers and diners or encourage repeat reservations;
- the effects of increased competition in our business;
- our ability to keep pace with changes in technology and our competitors;
- our ability to successfully enter new markets and manage our international expansion;
- our ability to provide a high-quality customer experience through our products and services;
- our ability to successfully manage any acquisitions of businesses, solutions or technologies;
- the impact of fluctuations in currency exchange rates;
- the success of our marketing efforts;
- changes in consumer behavior and any related impact on the restaurant industry, especially in the geographic markets where we operate;

- seasonal patterns in restaurant dining;
- interruptions in service and any related impact on our reputation;
- the attraction and retention of qualified employees and key personnel;
- our ability to protect our intellectual property, including our proprietary ERB and Connect products;
- costs associated with defending intellectual property infringement and other claims;
- our ability to choose and effectively manage third-party service providers;
- the effects of natural or man-made catastrophic events;
- the effectiveness of our internal controls;
- changes in our tax rates or exposure to additional tax liabilities; and
- changes in government regulation affecting us or our business.

As a result of these and other factors, the results of any prior quarterly or annual periods should not be relied upon as indications of our future operating performance. In addition, our operating results may not meet our financial forecasts or the expectations of investors or public market analysts who follow our company.

***The impact of worldwide economic conditions, including the resulting effect on consumer spending, may adversely affect our business, operating results and financial condition.***

Our performance is subject to worldwide economic conditions and their impact on levels of consumer spending. Some of the factors having an impact on discretionary consumer spending include general economic conditions, unemployment, consumer debt, reductions in net worth, residential real estate and mortgage markets, taxation, energy prices, interest rates, consumer confidence and other macroeconomic factors. Consumer purchases of discretionary items generally decline during recessionary periods and other periods in which disposable income is adversely affected. Because spending for restaurant dining is generally considered to be discretionary, declines in consumer spending may have a more negative effect on our business than on those businesses that sell products or services considered to be necessities. In particular, a significant majority of our restaurant customers are fine-dining restaurants which have been particularly affected by economic downturns.

Unfavorable changes in the above factors or in other business and economic conditions affecting our restaurant customers and diners could result in reduced traffic in some or all of the restaurants that use our solutions, result in fewer reservations made through our websites or the websites of our partners or restaurant customers and lower our profit margins, cause our restaurant customers to go out of business, cause our restaurant customers to terminate their subscriptions to our solutions, request lower pricing for our solutions or default on their payment obligations to us and have a material adverse effect on our financial condition and operating results.

Moreover, the majority of our restaurant customers are located in major metropolitan areas like London, New York City and the San Francisco Bay Area, and to the extent any one of these geographic areas experiences any of the above described conditions to a greater extent than other geographic areas, the material adverse effect on our financial condition and operating results could be exacerbated. For example, the European sovereign debt crisis has negatively affected the financial markets in Europe. These conditions have resulted in reduced consumer and business confidence and spending in many countries in Europe. A continuation or worsening of the European sovereign debt crisis may have a negative effect on our European operations, as well as on the businesses of our European customers, suppliers and partners. Any of these conditions could harm our financial condition and operating results.

***Our recent growth rate will likely not be sustainable and a failure to maintain an adequate growth rate will adversely affect our net income and our business.***

Our revenues have grown rapidly, increasing from \$99.0 million in 2010, to \$139.5 million in 2011, to \$161.6 million in 2012 representing a compound annual growth rate of 28%. We do not expect to sustain our recent growth rate in future periods, and you should not rely on the revenue growth of any prior quarterly or annual periods as an indication of our future performance. If we are unable to maintain adequate revenue growth, our net income will be adversely affected, and we may not have adequate resources to execute our business strategy.

***Growth may place significant demands on our management and our infrastructure.***

We have experienced substantial growth in our business. This growth has placed and may continue to place significant demands on our management and our operational and financial infrastructure. As our operations grow in size, scope and complexity, we will need to improve and upgrade our systems and infrastructure to offer an increasing number of customers enhanced solutions, features and functionality. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. Continued growth could also strain our ability to maintain reliable service levels for our customers, develop and improve our operational, financial and management controls, enhance our reporting systems and procedures and recruit, train and retain highly skilled personnel.

Managing our growth will require significant expenditures and allocation of valuable management resources. If we fail to achieve the necessary level of efficiency in our organization as it grows, our business, operating results and financial condition would be harmed.

***If we fail to increase the number of our customers and diners or retain existing customers and diners, our revenues and our business will be harmed.***

In the twelve months ended December 31, 2012, almost all of our revenues were generated by our restaurant customers. Restaurants that use our ERB pay us a one-time installation fee, a monthly subscription fee for the use of our hardware and software, and a fee for each restaurant guest seated through online reservations, as applicable. Restaurants that use Connect pay us a fee for each restaurant guest seated through online reservations. Our growth depends in large part on increasing the number of our restaurant customers, increasing the number of users of our websites and mobile apps and then converting those persons into diners who use our websites and mobile apps to make restaurant reservations. Either category of customers may decide not to continue to use our solutions in favor of other means of reserving tables or because of budgetary constraints, pricing or other reasons.

To grow our base of restaurant customers, we must convince prospective restaurant customers of the benefits of our ERB, Connect and related solutions over solutions offered by our competitors and encourage them to forego the traditional pen-and-paper reservation book to which they are likely accustomed. Due to the fragmented nature of the restaurant industry, many prospective restaurant customers may not be familiar with our solutions and will generally favor using more traditional methods of taking reservations.

To increase the number of diners who use our websites and mobile apps, we must convince them of the value of our solutions. Our ability to do so is driven in large part by increasing the number of restaurant listings available on our websites and mobile apps and also by making our websites and mobile apps convenient and user-friendly.

We cannot assure you that we will be successful in continuing to expand our restaurant customer base or in continuing to attract diners to make reservations on our websites and mobile apps. Our

future sales and marketing efforts may be ineffective. If diners choose not to use our solutions or decrease their use of our solutions or we are unable to attract new diners, search activity on our websites and mobile apps could decline, the usefulness of our solutions could be diminished and we could experience declining revenues.

***The markets for our solutions may become more competitive, and there can be no certainty that we will maintain our current restaurant customers and diners or attract new restaurants and diners or that our operating margins will not be affected by competition.***

We expect that the competitive environment for our solutions may become more intense as additional companies enter our markets. Currently, our primary competitors are the pen-and-paper reservation book used by most restaurants and the phone used by diners. Secondary competitors include companies which provide computerized reservation management systems with a variety of technologies, as well as allocation-based reservation-taking websites that offer diners the ability to book reservations for a limited selection of restaurant table inventory. These secondary competitors may enhance their technologies to be more competitive, and additional competitors may enter our North America and international markets. Any new competitors could have greater name recognition among restaurants and diners and greater financial, technical and marketing resources. In both North America and international markets, greater financial resources and product development capabilities may allow competitors to respond more quickly to new or emerging technologies and changes in restaurant and diner requirements that may render our solutions obsolete. These competitors could introduce new solutions with competitive price and performance characteristics or undertake more aggressive marketing campaigns than ours. If we lose existing restaurant customers and diners, face downward pricing pressures or fail to attract new restaurants and diners as a result of increased competition, our business, operating results and financial condition could be adversely affected.

***Rapid technological changes may render our technology obsolete or decrease the attractiveness of our solutions to our customers.***

To remain competitive, we must continue to enhance and improve the functionality and features of our websites, mobile apps, ERB and Connect. The Internet and the online commerce industry are rapidly changing. If competitors introduce new solutions embodying new technologies, or if new industry standards and practices emerge, our existing websites, mobile apps, technology, ERB and Connect may become obsolete. Our future success will depend on our ability to:

- enhance our existing solutions;
- develop and potentially license new solutions and technologies that address the increasingly sophisticated and varied needs of our prospective customers; and
- respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis.

Developing our ERB, Connect, websites, mobile apps and other technology entails significant technical and business risks. We may use new technologies ineffectively, or we may fail to adapt our websites, mobile apps, transaction processing systems and network infrastructure to consumer requirements or emerging industry standards. For example, our website and mobile app functionality that allows searches and displays of reservation availability is a critical part of our service, and it may become out-of-date or insufficient from our customers' perspective or in relation to the search and display functionality of our competitors' websites and mobile apps. If we face material delays in introducing new or enhanced solutions, our customers may forego the use of our solutions in favor of those of our competitors.

***More people are using devices other than personal computers to access the Internet. If diners do not widely adopt versions of our websites and mobile apps developed for these devices or if our restaurant customers fail to optimize their websites for these devices, our business could be adversely affected.***

The number of people who access the Internet through devices other than personal computers, such as smartphones and tablets, has increased dramatically in the past few years. The functionality associated with some alternative devices may make the use of our solutions more difficult and the versions of our solutions developed for these devices may not be compelling to diners. In addition, most of our restaurant customers do not have mobile optimized websites, which may negatively impact the ability of diners to make online reservations via their mobile devices. Also, search queries made by diners on mobile devices may fail to direct diners to our websites and mobile apps and the websites of our restaurant customers. As new devices and platforms are continually being released, it is difficult to predict the problems we may encounter in adapting our websites and mobile apps and developing competitive new solutions. We expect to continue to devote significant resources to the creation, support and maintenance of mobile sites and apps. If we are slow to develop mobile sites and apps that are more compatible with alternative devices and platforms, our business could be adversely affected.

***We may be unsuccessful in expanding our operations internationally, which could harm our business, operating results and financial condition.***

In 2004, we established our European headquarters in London and expanded our North American presence in Canada. In 2006, we opened an office in Tokyo and further expanded our North American presence in Mexico. In 2007, we expanded our European presence with offices in France, Germany and Spain. In 2010, we acquired toptable, which operated a leading restaurant reservation site in the United Kingdom. Our ability to expand internationally involves various risks, including the need to invest significant resources in such expansion, the possibility that returns on such investments will not be achieved in the near future and competitive environments. Our international operations may not prove to be successful in certain markets. For example, in 2008, we decided to close our offices in France and Spain. In addition, we have incurred and expect to continue to incur significant expenses in advance of generating material revenues as we attempt to establish our presence in particular international markets. Our current and any future international expansion plans we choose to undertake will require management attention and resources and may be unsuccessful. We do not have substantial experience in selling our solutions in international markets or in conforming to the local cultures, standards or policies necessary to successfully compete in those markets, and we must invest significant resources in order to build a direct sales force and operational infrastructure in such markets. Furthermore, in many international markets we are not the first entrant and there exists greater competition with stronger brand names than we have faced in North American markets. Our ability to expand internationally will also be limited by the demand for our solutions and the adoption of the Internet in these markets. Different privacy, censorship and liability standards and regulations and different intellectual property laws in foreign countries may cause our business and operating results to suffer.

Any future international operations may also fail to succeed due to other risks inherent in foreign operations, including:

- difficulties or delays in acquiring a network of restaurant customers in one or more international markets;
- different restaurant preferences and dining patterns than those in North America;
- varied, unfamiliar and unclear legal and regulatory restrictions;
- unexpected changes in international regulatory requirements and tariffs;
- legal, political or systemic restrictions on the ability of U.S. companies to market services or otherwise do business in foreign countries;

- less extensive adoption of the Internet as a commerce medium or information source and increased restriction on the content of websites and mobile apps;
- difficulties in staffing and managing foreign operations;
- greater difficulty in accounts receivable collection;
- currency fluctuations;
- potential adverse tax consequences;
- lack of infrastructure to adequately conduct electronic commerce transactions; and
- price controls or other restrictions on foreign currency.

As a result of these obstacles, we may find it impossible or prohibitively expensive to expand internationally or we may be unsuccessful in our attempt to do so, which could harm our business, operating results and financial condition.

***We may be unable to successfully execute our business strategy if we fail to continue to provide our customers with a high-quality customer experience.***

A critical component of our strategy is providing a high-quality customer experience for both restaurants and diners. Accordingly, the effective performance, reliability and availability of our ERB, Connect, websites, mobile apps and network infrastructure are critical to our reputation and our ability to attract and retain customers. In order to provide a high-quality customer experience, we have invested and currently intend to continue to invest substantial resources in our ERB, Connect, website and mobile app development and functionality and customer service operations. If we do not continue to make such investments and as a result, or due to other reasons, fail to provide a high-quality customer experience, we may lose restaurants and diners from our network, which could significantly decrease the value of our solutions to both groups. Moreover, failure to provide our customers with high-quality customer experiences for any reason could substantially harm our reputation and adversely affect our efforts to develop as a trusted website and mobile app.

***Acquisitions could disrupt our business and harm our financial condition and operating results.***

Our success will depend, in part, on our ability to expand our offerings and markets and grow our business in response to changing technologies, customer demands and competitive pressures. In some circumstances, we may determine to do so through the acquisition of complementary businesses, solutions or technologies rather than through internal development, including, for example, our acquisition in October 2010 of toptable, which operated a leading restaurant reservation site in the United Kingdom. The identification of suitable acquisition candidates can be difficult, time-consuming and costly, and we may not be able to successfully complete identified acquisitions. Furthermore, even if we successfully complete an acquisition, we may not be able to successfully assimilate, integrate and maintain the business, technologies, solutions, personnel or operations of the company that we acquired, particularly if key personnel of an acquired company decide not to work for us. In addition, we may issue equity securities to complete an acquisition, which would dilute our stockholders' ownership and could adversely affect the price of our common stock. Acquisitions may also involve the entry into geographic or business markets in which we have little or no prior experience. Consequently, we may not achieve anticipated benefits of the acquisitions which could harm our operating results.

***We face risks associated with currency exchange rate fluctuations.***

For the twelve months ended December 31, 2012, we incurred approximately 25% of our operating expenses in pounds sterling, euros, yen and other foreign currencies, while most of our revenues were denominated in U.S. dollars. Conducting business in currencies other than U.S. dollars subjects us to

fluctuations in currency exchange rates that could have a negative impact on our reported operating results. Fluctuations in the value of the U.S. dollar relative to other currencies affect our revenues, costs and expenses, and operating margins, and result in foreign currency transaction gains and losses. To date, we have not engaged in exchange rate hedging activities. Even if we were to implement hedging strategies to mitigate this risk, these strategies might not eliminate our exposure to foreign exchange rate fluctuations and would involve costs and risks of their own, such as ongoing management time and expertise, external costs to implement the hedging activities and potential accounting implications.

***We rely on our marketing efforts to attract new customers and must do so in a cost-effective manner; otherwise our operations will be harmed.***

A significant component of our business strategy is the promotion of our websites, mobile apps, ERB and Connect. We believe that the attractiveness of our solutions to our current and potential customers, both restaurants and diners, will increase as new restaurants provide additional restaurant listings and diners increasingly use our websites and mobile apps to conduct searches and make restaurant reservations. This is because an increase in the number of restaurant listings and the number of diners searching those listings increases the utility of our websites and mobile apps and their associated search, listing and reservation services. If we do not continue to grow the use of our websites, mobile apps, ERB and Connect, we may fail to build the critical mass of both restaurant customers and diners required to substantially increase our revenues.

In addition, if we are unable to effectively market our solutions to new customers or are unable to do so in a cost-effective manner, our operating results could be adversely affected.

***System interruptions that impair access to our websites or mobile apps would damage our reputation and brand and substantially harm our business and operating results.***

The satisfactory performance, reliability and availability of our ERB, Connect, websites, mobile apps and network infrastructure are critical to our reputation, our ability to attract and retain both restaurant customers and diners and our ability to maintain adequate customer service levels. Any systems interruption that results in the unavailability of our websites, mobile apps or any restaurant connected to our websites or mobile apps could result in negative publicity, damage our reputation and brand and cause our business and operating results to suffer. We may experience temporary system interruptions (either to our websites or mobile apps or at our restaurant customer locations) for a variety of reasons, including network failures, power failures, software errors or an overwhelming number of visitors trying to reach our websites and mobile apps during periods of strong demand. In addition, our primary data center is hosted by a third-party. Because we are dependent in part on third parties for the implementation and maintenance of certain aspects of our systems and because some of the causes of system interruptions may be outside of our control, we may not be able to remedy such interruptions in a timely manner, or at all.

***We depend on key and highly skilled personnel to operate our business, and if we are unable to retain our current personnel or hire additional personnel our ability to develop and successfully market our business could be harmed.***

We believe our future success will depend in large part upon our ability to attract and retain highly skilled managerial, technical, finance, creative and sales and marketing personnel. Moreover, we believe that our future success is highly dependent on the contributions of our named executive officers. All of our U.S. officers and other employees are at-will employees, which means they may terminate their employment relationship with us at any time, and their knowledge of our business and industry would be extremely difficult to replace. In addition, the loss of any key employees or the inability to attract or retain qualified personnel could delay the development and introduction of, and harm our ability to

sell, our solutions and harm the market's perception of us. Competition for qualified personnel is particularly intense in the San Francisco Bay Area, where our headquarters are located. Further, our principal overseas operations are based in London and Tokyo, which are cities that, similar to our headquarters region, have high costs of living and consequently high compensation standards. Qualified individuals are in high demand, and we may incur significant costs to attract them. We may be unable to attract and retain suitably qualified individuals who are capable of meeting our growing sales, operational and managerial requirements, or may be required to pay increased compensation in order to do so. If we are unable to attract and retain the qualified personnel we need to succeed, our business will suffer.

Volatility or lack of performance in our stock price may also affect our ability to attract and retain our key employees. Our named executive officers have become, or will soon become, vested in a substantial amount of stock or stock options. Employees may be more likely to leave us if the shares they own or the shares underlying their options have significantly appreciated in value relative to the original purchase prices of the shares or the exercise prices of the options, or if the exercise prices of the options that they hold are significantly above the market price of our common stock. If we are unable to retain our employees, our business, operating results and financial condition will be harmed.

***Failure to adequately protect our intellectual property could substantially harm our business and operating results.***

Because our business is heavily dependent on our intellectual property, including our proprietary software, the protection of our intellectual property rights is crucial to the success of our business. We rely on a combination of patent, trademark, trade secret and copyright law and contractual restrictions to protect our intellectual property. These afford only limited protection. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our website or mobile app features, software and functionality or obtain and use information that we consider proprietary, such as the technology used to operate our websites and mobile apps, our content and our trademarks. Moreover, policing our proprietary rights is difficult and may not always be effective. In particular, because we sell our solutions internationally, we may need to enforce our rights under the laws of countries that do not protect proprietary rights to as great an extent as do the laws of the United States.

We have registered "OpenTable" and our other trademarks as trademarks in the United States and in certain other countries. We have also registered "toptable" in the United Kingdom. Competitors may adopt service names similar to ours, thereby impeding our ability to build brand identity and possibly leading to customer confusion. In addition, there could be potential trade name or trademark infringement claims brought by owners of other registered trademarks or trademarks that incorporate variations of the term OpenTable or our other trademarks. From time to time, we have acquired Internet domain names held by others when such names were causing consumer confusion or had the potential to cause consumer confusion.

We currently hold the "OpenTable.com" and "toptable.co.uk" Internet domain names and various other related domain names. Domain names generally are regulated by Internet regulatory bodies. If we lose the ability to use a domain name in a particular country, we would be forced to either incur significant additional expenses to market our solutions within that country, including the development of a new brand and the creation of new promotional materials, or elect not to sell solutions in that country. Either result could substantially harm our business and operating results. The regulation of domain names in the United States and in foreign countries is subject to change. Regulatory bodies could establish additional top-level domains, appoint additional domain name registrars or modify the requirements for holding domain names. As a result, we may not be able to acquire or maintain the domain names that utilize the name OpenTable or toptable in all of the countries in which we currently conduct or intend to conduct business.

Litigation or proceedings before the U.S. Patent and Trademark Office or other governmental authorities and administrative bodies in the United States and abroad may be necessary in the future to enforce our intellectual property rights, to protect our patent rights, trade secrets and domain names and to determine the validity and scope of the proprietary rights of others. Our efforts to enforce or protect our proprietary rights may be ineffective and could result in substantial costs and diversion of resources and could substantially harm our operating results.

***Assertions by third parties of infringement by us of their intellectual property rights could result in significant costs and substantially harm our business and operating results.***

Other parties have asserted, and may in the future assert, that we have infringed their intellectual property rights. Such litigation may involve patent holding companies or other adverse patent owners who have no relevant product revenue, and therefore our own issued and pending patents may provide little or no deterrence. For example, on May 12, 2009, Mount Hamilton Partners, LLC, or Mount Hamilton, filed a patent infringement lawsuit against us in the United States District Court for the Northern District of California, seeking, among other things, a judgment that we have infringed a certain patent held by Mount Hamilton, an injunctive order against the alleged infringing activities and an award for damages. We subsequently entered into a settlement agreement with Mount Hamilton, effective as of June 30, 2011, and the claims between the parties were dismissed with prejudice on July 7, 2011.

Furthermore, we cannot predict whether assertions of third-party intellectual property rights or claims arising from such assertions will substantially harm our business and operating results. The defense of any infringement claims of a third party, whether they are with or without merit or are determined in our favor, may result in costly litigation and diversion of technical and management personnel. Furthermore, an adverse outcome of a dispute may require us to pay damages, potentially including treble damages and attorneys' fees, if we are found to have willfully infringed a party's patent or copyright rights; cease making, licensing or using solutions that are alleged to incorporate the intellectual property of others; expend additional development resources to redesign our solutions; and enter into potentially unfavorable royalty or license agreements in order to obtain the right to use necessary technologies. Royalty or licensing agreements, if required, may be unavailable on terms acceptable to us, or at all. In any event, we may need to license intellectual property which would require us to pay royalties or make one-time payments.

***We depend in part on licenses of technologies from third parties in order to deliver our solutions, and, as a result, our business is dependent in part on the availability of such licenses on commercially reasonable terms.***

We currently, and will continue to, license certain technologies from third parties. We cannot be certain that these third-party content licenses will be available to us on commercially reasonable terms or that we will be able to successfully integrate the technology into our solutions. These third-party in-licenses may expose us to increased risk, including risks associated with the assimilation of new technology sufficient to offset associated acquisition and maintenance costs. The inability to obtain any of these licenses could result in delays in solution development until equivalent technology can be identified and integrated. Any such delays in services could cause our business, operating results and financial condition to suffer.

***We rely on third parties for many systems and services.***

We rely on third-party service providers for certain customer care, fulfillment, processing, systems development, technology, software development, mobile website and application development and other services. If these third parties experience difficulty meeting our requirements or standards, it could damage our reputation or make it difficult for us to operate some aspects of our business. In addition, if such third-party service providers were to cease operations, temporarily or permanently, face financial

distress or other business disruption, we could suffer increased costs and delays in our ability to provide similar services until an equivalent service provider could be found or we could develop replacement technology or operations. In addition, if we are unsuccessful in choosing high quality partners or we ineffectively manage these partners, it could have an adverse impact on our business and financial performance.

***Our business could be negatively affected by changes in search engine algorithms and dynamics, or search engine disintermediation.***

A portion of traffic to our websites and mobile apps comes from non-paid search results that appear on search engines such as Google and Bing. Search engines frequently update and change the logic that determines the placement and display of results of a user's search, such that the algorithmic placement of links to our websites or mobile apps can be negatively affected. If a major search engine changes its algorithms in a manner that negatively affects the search engine ranking of our websites or mobile apps, our business and financial performance would be adversely affected. In addition, to the extent Google, Bing or other leading search or meta-search engines disintermediate restaurant reservation or restaurant content providers by offering comprehensive restaurant reservation capabilities, or refer those leads to other favored partners, there could be a material adverse impact on our business and financial performance.

***Confidentiality agreements with employees and others may not adequately prevent disclosure of trade secrets and other proprietary information.***

We have devoted substantial resources to the development of our proprietary technology, including the proprietary software component of our ERB, Connect, and related processes. In order to protect our proprietary technology and processes, we rely in part on confidentiality agreements with our employees, licensees, independent contractors and other advisors. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the event of unauthorized disclosure of confidential information. In addition, others may independently discover trade secrets and proprietary information, and in such cases we could not assert any trade secret rights against such parties. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights, and failure to obtain or maintain trade secret protection could adversely affect our competitive business position.

***Our failure or the failure of third-party service providers to protect our confidential information, the confidential information of our customers and our network against security breaches could damage our reputation and brand and substantially harm our business and operating results.***

Our security measures or those of our third-party service providers may not detect or prevent security breaches that could harm our business. Our business requires us to use and store customer, employee and business partner personally identifiable information. This may include names, addresses, phone numbers, email addresses, contact preferences, tax identification numbers and payment account information. We require user names and passwords in order to access our information technology network. We also use encryption and authentication technologies to secure the transmission and storage of data. These security measures may be compromised as a result of third-party security breaches, employee error, malfeasance, faulty password management or other irregularity, and result in persons obtaining unauthorized access to our data or accounts. Third parties may attempt to fraudulently induce employees into disclosing user names, passwords or other sensitive information, which may in turn be used to access our information technology network.

In addition, some of our restaurant customers currently require that diners enter their credit card information to hold a reservation. We rely on encryption and authentication technology licensed from third parties to effect secure transmission of confidential information, including credit card numbers.

While we devote significant resources to network security, data encryption and other security measures to protect our systems and data, these security measures cannot provide absolute security. Advances in computer capabilities, new discoveries in the field of cryptography or other developments may result in a compromise or breach of the technology used by us to protect customer transaction data. The costs to us to eliminate or alleviate network security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and our efforts to address these problems may not be successful and could result in unexpected interruptions, delays, cessation of service and may harm our business operations. In addition, a party that is able to circumvent our security measures or those of our third-party service providers could misappropriate our proprietary information or personally identifiable information of our employees, restaurant customers or diners.

Any such compromise of our security could damage our reputation and brand, result in a violation of applicable privacy and other laws, and expose us to a risk of loss or litigation and possible liability which would substantially harm our business and operating results.

***We may require additional capital to respond to business opportunities, challenges, acquisitions or unforeseen circumstances. If such capital is not available to us, our business, operating results and financial condition may be harmed.***

We may require additional capital to expand our business. However, additional funds may not be available when we need them, on terms that are acceptable to us, or at all. Any debt financing secured by us could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. For example, in January 2013, we entered into a credit agreement with Wells Fargo Bank, National Association for a senior secured revolving credit facility of \$50.0 million, which contains various negative covenants applicable to us. If we do not have funds available to enhance our solutions, maintain the competitiveness of our technology or pursue business opportunities, we may not be able to service our existing customers or acquire new customers. In addition, if we do not have funds available to make strategic acquisitions, we may not be able to expand our business. The inability to raise additional capital could have an adverse effect on our business, operating results and financial condition.

***If we issue additional shares of common stock to raise capital, it may have a dilutive effect on your investment.***

If we raise additional capital through further issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution in their percentage ownership of our company. Moreover, any new equity securities we issue could have rights, preferences and privileges senior to those of holders of our common stock.

***A new or incremental tightening of the credit markets may have an adverse effect on our ability to obtain short-term debt financing.***

In the event of financial turmoil affecting the banking system and financial markets, additional consolidation of the financial services industry, or significant financial service institution failures, there could be a new or incremental tightening in the credit markets, low liquidity, more stringent lending standards and terms and higher volatility in interest rates. Persistence of these conditions could have a material adverse effect on our access to short-term debt and the terms and cost of that debt. As a result, we may not be able to secure additional financing in a timely manner, or at all, to meet our future capital needs, which may have an adverse effect on our business, operating results and financial condition.

***Our business is subject to the risks of earthquakes, fires, floods and other natural catastrophic events and to interruption by man-made problems.***

Our systems and operations are vulnerable to damage or interruption from earthquakes, fires, floods, power losses, telecommunications failures, terrorist attacks, acts of war, human errors, break-ins and similar events. For example, a significant natural disaster, such as an earthquake, fire or flood, could have a material adverse impact on our business, operating results and financial condition, and our insurance coverage may be insufficient to compensate us for losses that may occur. Our U.S. corporate offices and the facility we lease to house our computer and telecommunications equipment are located in the San Francisco Bay Area, a region known for seismic activity. In addition, acts of terrorism, which may be targeted at metropolitan areas which have higher population density than rural areas, could cause disruptions in our or our restaurant customers' businesses or the economy as a whole. We may not have sufficient protection or recovery plans in certain circumstances, such as natural disasters affecting the San Francisco Bay Area, and our business interruption insurance may be insufficient to compensate us for losses that may occur. Our servers may also be vulnerable to computer viruses, break-ins and similar disruptions from unauthorized tampering with our computer systems, which could lead to interruptions, delays, loss of critical data or the unauthorized disclosure of confidential customer data. See "—Our failure or the failure of third-party service providers to protect our confidential information, the confidential information of our customers and our network against security breaches could damage our reputation and brand and substantially harm our business and operating results."

***Any condition that causes people to refrain, or prevents people, from dining at restaurants, such as severe weather, outbreaks of pandemic or contagious diseases, or threats of terrorist attacks may adversely affect our business, operating results and financial condition.***

Our business and operations could be materially and adversely affected by severe weather or outbreaks of pandemic or contagious diseases or other conditions that cause people to refrain, or prevent people, from dining at restaurants. For example, many of our restaurant customers are located in major metropolitan areas such as New York City and San Francisco. Severe weather conditions or natural disasters in those areas, such as blizzards, earthquakes or hurricanes, may prevent people from dining at restaurants and adversely affect our business. For example, Superstorm Sandy in October 2012 interrupted operations at many of our restaurant customers along the East Coast, resulting in a negative impact on our reservation revenue around that time.

In addition, outbreaks of pandemic or contagious diseases may cause people to refrain from dining at restaurants. For example, from April 2009, there have been outbreaks of swine flu, caused by the H1N1 virus, in many regions of the world, including the United States and other countries in which we operate, which have affected the businesses of certain of our restaurant customers. While it did not have a material effect on our business, in April 2009, all of the restaurants in Mexico City, including our restaurant customers there, were closed for a period of approximately two weeks due to the H1N1 (swine) flu.

Furthermore, we cannot predict the effects that actual or threatened armed conflicts, terrorist attacks, efforts to combat terrorism or heightened security requirements could have on our operations, the economy or consumer confidence generally. Any of these events could affect consumer spending patterns in general or dining patterns in particular, or affect our restaurant customers due to security measures.

A prolonged recurrence of the above factors or in other business and economic conditions affecting our restaurant customers could result in a significant decline in demand for restaurant dining and materially and adversely affect our financial condition and results of operations by reducing traffic in some or all of the restaurants that use our solutions, reducing the number of reservations made

through our websites and mobile apps or the websites and mobile apps of our partners or restaurant customers, causing our restaurant customers to go out of business, or causing our restaurant customers to request lower pricing for our solutions, terminate their subscriptions to our solutions or default on their payment obligations to us.

***Changes in our tax rates or exposure to additional tax liabilities could adversely affect our earnings and financial condition.***

As a multinational corporation, we are subject to income taxes in the United States and various foreign jurisdictions. Significant judgment is required in determining our global provision for income taxes and other tax liabilities. In the ordinary course of a global business, there are intercompany transactions and calculations where the ultimate tax determination is uncertain. Our income tax returns are routinely subject to audits by tax authorities. Although we regularly assess the likelihood of adverse outcomes resulting from these examinations to determine our tax estimates, a final determination of tax audits or tax disputes could have an adverse effect on our results of operations and financial condition.

We are also subject to non-income taxes, such as payroll, sales, use, value-added, net worth, property and goods and services taxes in the United States and various foreign jurisdictions. We are routinely under audit by tax authorities with respect to these non-income taxes and may have exposure to additional non-income tax liabilities which could have an adverse effect on our results of operations and financial condition.

In addition, our future effective tax rates could be favorably or unfavorably affected by changes in tax rates, changes in the valuation of our deferred tax assets or liabilities, changes in our legal structure or changes in tax laws or their interpretation. Such changes could have a material adverse impact on our financial results.

***We incur significant costs as a public company, and evolving laws and regulations applicable to public companies may adversely affect our operating results and financial condition.***

As a public company, we incur significant accounting, legal and other expenses, including costs associated with our public company reporting requirements. We also incur costs associated with corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act, as well as rules implemented by the SEC and The NASDAQ Stock Market.

New laws and regulations as well as changes to existing laws and regulations affecting public companies, including the provisions of the Sarbanes-Oxley Act of 2002, the Dodd-Frank Wall Street Reform and Consumer Protection Act and rules adopted by the SEC and by The NASDAQ Stock Market, would likely result in increased costs to us as we respond to their requirements. We have invested and are continuing to invest resources to comply with evolving laws and regulations, and this investment may result in increased general and administrative expenses and a diversion of management's time and attention from revenue-generating activities to compliance activities. Furthermore, these laws and regulations could make it more difficult or more costly for us to obtain certain types of insurance, including director and officer liability insurance, and we may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. The impact of these requirements could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as executive officers.

## Risks Related to Our Industry

### *Seasonality may cause fluctuations in our financial results.*

We generally experience some effects of seasonality due to increases in restaurant dining tied to certain holidays and restaurant industry promotions. As a result, we typically experience higher sequential growth in diners seated during the first and fourth quarters, as compared with the second and third quarters. Although historically our revenue has increased in each quarter as we have added restaurant customers and diners, in the future this seasonality may cause fluctuations in our financial results. In addition, other seasonality trends may develop and the existing seasonality and consumer behavior that we experience may change.

### *If use of the Internet, particularly with respect to online restaurant reservations, does not continue to increase as rapidly as we anticipate, our business will be harmed.*

Our future net profits are substantially dependent upon the continued use of the Internet as an effective medium of business and communication by our target customers. Internet use may not continue to develop at historical rates, and consumers may not continue to use the Internet and other online services as a medium for commerce. In addition, the Internet may not be accepted as a viable long-term marketplace or resource for a number of reasons, including:

- actual or perceived lack of security of information or privacy protection;
- possible disruptions, computer viruses or other damage to Internet servers or to users' computers; and
- excessive governmental regulation.

Our success will depend, in large part, upon third parties maintaining the Internet infrastructure to provide a reliable network backbone with the speed, data capacity, security and hardware necessary for reliable Internet access and services. Our business, which relies on a contextually rich websites and mobile apps that requires the transmission of substantial data, is also significantly dependent upon the availability and adoption of broadband Internet access and other high-speed Internet connectivity technologies.

### *Government regulation of the Internet is evolving, and unfavorable changes could substantially harm our business and operating results.*

We are subject to general business regulations and laws as well as regulations and laws specifically governing the Internet, e-commerce and electronic devices. Existing and future laws and regulations may impede our growth. These regulations and laws may cover taxation, tariffs, user privacy, data protection, pricing, content, copyrights, distribution, mobile communications, electronic contracts and other communications, consumer protection, broadband residential Internet access and the characteristics and quality of services. It is not clear how existing laws governing issues such as property ownership, sales and other taxes, libel and personal privacy apply to the Internet. Unfavorable resolution of these issues may substantially harm our business and operating results.

## Risks Related to Owning Our Common Stock

### *Our stock price may be volatile, and the value of an investment in our common stock may decline.*

An active, liquid and orderly market for our common stock may not be sustained, which could depress the trading price of our common stock. The price of our common stock has been, and is likely to continue to be, volatile, which means that it could decline substantially within a short period of time. For example, since shares of our common stock were sold in our initial public offering in May 2009 at a price of \$20.00 per share, our closing stock price has ranged from \$24.66 to \$115.62. The trading

price of our common stock may be subject to wide fluctuations in response to various factors, some of which are beyond our control, including:

- our operating performance and the operating performance of similar companies;
- the overall performance of the equity markets;
- the number of shares of our common stock publicly owned and available for trading;
- threatened or actual litigation;
- changes in laws or regulations relating to our solutions;
- any major change in our board of directors or management;
- publication of research reports about us or our industry or positive or negative recommendations or withdrawal of research coverage by securities analysts;
- large volumes of sales of our shares of common stock; and
- general political and economic conditions.

In addition, the stock market in general, and the market for Internet-related companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Securities class action litigation has often been instituted against companies following periods of volatility in the overall market and in the market price of a company's securities. This litigation, if instituted against us, could result in very substantial costs, divert our management's attention and resources and harm our business, operating results and financial condition.

***If securities or industry analysts publish inaccurate or unfavorable research about our business, our stock price and trading volume could decline.***

The trading market for our common stock depends in part on the research and reports that securities or industry analysts publish about us or our business. If one or more of the analysts who cover us downgrade our stock or publish inaccurate or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, demand for our stock could decrease, which might cause our stock price and trading volume to decline.

***Certain provisions in our charter documents and Delaware law could discourage takeover attempts and lead to management entrenchment.***

Our certificate of incorporation and bylaws contain provisions that could have the effect of delaying or preventing changes in control or changes in our management without the consent of our board of directors. These provisions include:

- a classified board of directors with three-year staggered terms, which may delay the ability of stockholders to change the membership of a majority of our board of directors;
- no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- the exclusive right of our board of directors to elect a director to fill a vacancy created by the expansion of the board of directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;
- the ability of our board of directors to determine to issue shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights,

without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;

- a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;
- the requirement that a special meeting of stockholders may be called only by the chairman of the board of directors, the chief executive officer or the board of directors, which may delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors; and
- advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquirer from conducting a solicitation of proxies to elect the acquirer's own slate of directors or otherwise attempting to obtain control of us.

We are also subject to certain anti-takeover provisions under Delaware law. Under Delaware law, a corporation may not, in general, engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the board of directors has approved the transaction.

#### **ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

#### **ITEM 2. PROPERTIES**

Our principal executive offices are located in San Francisco, California, in a 34,236 square-foot facility, under a lease expiring on April 30, 2013. In September 2012, we entered into an office lease for a 48,161 square-foot facility located at another location in San Francisco, California, which lease expires on April 30, 2020. We plan to move our principal executive offices to this location during the first half of 2013. We also have regional offices in Boulder, Colorado; Chicago, Illinois; New York, New York; Charleston, South Carolina; Frankfurt, Germany; London, England; Mexico City, Mexico; and Tokyo, Japan.

#### **ITEM 3. LEGAL PROCEEDINGS**

We are subject to various legal proceedings and claims arising in the ordinary course of business. Although occasional adverse decisions or settlements may occur, management believes that the final disposition of such matters will not have a material adverse effect on our business, financial position, results of operations or cash flows.

#### **ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.

## PART II

**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is traded on the NASDAQ Global Market under the symbol "OPEN". The following table shows the high and low sale prices per share of our common stock as reported on the NASDAQ Global Market for the periods indicated:

	2012		2011	
	High	Low	High	Low
First Quarter	\$ 52.64	\$ 37.95	\$ 107.47	\$ 68.42
Second Quarter	\$ 46.00	\$ 35.62	\$ 118.66	\$ 72.57
Third Quarter	\$ 50.29	\$ 33.53	\$ 90.89	\$ 43.25
Fourth Quarter	\$ 50.61	\$ 41.65	\$ 52.95	\$ 31.54

On February 25, 2013, the closing price as reported on The NASDAQ Global Market of our common stock was \$54.46 per share. As of February 25, 2013, we had approximately 94 holders of record of our common stock.

We have never declared or paid, and do not anticipate declaring or paying, any cash dividends on our common stock. Any future determination as to the declaration and payment of dividends, if any, will be at the discretion of our board of directors and will depend on then existing conditions, including our financial condition, operating results, contractual restrictions, capital requirements, business prospects and other factors our board of directors may deem relevant. Our current line of credit precludes the payment of dividends without the permission of the lender; see Note 7 to our Consolidated Financial Statements.

Our equity plan information required by this item is incorporated by reference to the information in Part III, Item 12 of this Form 10-K.

**Performance Graph**

This performance graph shall not be deemed "soliciting material" or to be "filed" with the SEC for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or the Exchange Act, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any filing of OpenTable, Inc. under the Securities Act of 1933, as amended, or the Exchange Act.

The following graph shows a comparison from May 21, 2009 (the date our common stock commenced trading on The NASDAQ Global Market) through December 31, 2012 of cumulative total return for our common stock, the NASDAQ Composite Index and the NASDAQ-100 Technology Sector Index. Such returns are based on historical results and are not intended to suggest future performance. Data for the NASDAQ Composite Index and the NASDAQ-100 Technology Sector Index assume reinvestment of dividends.

**COMPARISON OF THIRTY-TWO MONTH CUMULATIVE TOTAL RETURN\***  
**Among Open Table, Inc, the NASDAQ Composite Index**  
**And the NASDAQ-100 Technology Sector Index**

\* \$100 invested in stock on 5/21/09 in index-including reinvestment of dividends

**Purchases of Equity Securities**

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)</u>	<u>Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs(1)</u>
October 1, 2012 - October 31, 2012	300	\$ 39.9933	300	\$ 49,988,002.01
November 1, 2012 - November 30, 2012	0	\$ 0.00	0	\$ 49,988,002.01

<b>Total</b>	<b>300</b>	<b>\$ 39.9933</b>	<b>300</b>	

(1) On August 6, 2012, we announced that our board of directors had approved a \$50.0 million share repurchase program, or Share Repurchase Program. As of December 31, 2012, we have purchased an aggregate of 300 shares pursuant to the Share Repurchase Program.

**Recent Sales of Unregistered Securities**

There were no unregistered sales of our equity securities during the twelve months ended December 31, 2012.

**ITEM 6. SELECTED CONSOLIDATED FINANCIAL DATA**

The following selected consolidated financial data should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the consolidated financial statements, related notes and other financial information included elsewhere in this document. The consolidated income statements data for the years ended December 31, 2012, 2011 and 2010 and the consolidated balance sheets data as of December 31, 2012 and 2011 are derived from our audited consolidated financial statements included elsewhere in this report. The consolidated income statements data for the years ended December 31, 2009 and 2008 and the consolidated balance sheets data as of December 31, 2010, 2009 and 2008 are derived from our audited consolidated financial statements not included in this report. Historical results are not necessarily indicative of the results to be expected in the future.

	Years Ended December 31,				
	2012	2011	2010(2)	2009	2008
	(In thousands, except per share amounts)

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*You should read the following discussion of our financial condition and results of operations in conjunction with the financial statements and the notes thereto included elsewhere in this report. The following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this report, particularly in "Risk Factors."*

### Overview

We provide solutions that form an online network connecting reservation-taking restaurants and people who dine at those restaurants. Our solutions for restaurants include our proprietary Electronic Reservation Book, or ERB, and Connect, as well as a number of related products and services. Our solutions for diners include our popular restaurant reservation websites and mobile applications, or apps. The OpenTable network includes more than 27,000 OpenTable restaurant customers spanning all 50 states as well as select markets outside of the United States. Since our inception in 1998, we have seated over 400 million diners through OpenTable reservations, and during the three months ended December 31, 2012, we seated an average of approximately 10.9 million diners per month. Restaurants that use our ERB pay us a one-time installation fee for onsite installation and training, a monthly subscription fee for the use of our software and hardware and a fee for each restaurant guest seated through online reservations, as applicable. Restaurants that use Connect pay us a fee for each restaurant guest seated through online reservations. Diners can use our online restaurant reservation service for free. For the twelve months ended December 31, 2012 and 2011, our net revenues were \$161.6 million and \$139.5 million, respectively. For the twelve months ended December 31, 2012 and 2011, our reservation revenues accounted for 56% and 53% of our total revenues, respectively, our subscription revenues accounted for 35% and 36% of our total revenues, respectively, and our other revenues accounted for 9% and 11% of our total revenues, respectively.

In 2004, we began to selectively expand outside of North America into countries that are characterized by large numbers of online consumer transactions and reservation-taking restaurants. To date, we have concentrated our international efforts in Germany, Japan and the United Kingdom. Our revenues outside of North America for the twelve months ended December 31, 2012 and 2011 were \$22.3 million and \$20.9 million, respectively, or 14% and 15% of our total revenues, respectively. We intend to continue to incur substantial expenses in advance of recognizing material related revenues as we attempt to further penetrate our existing international markets and selectively enter new markets. Some international markets may fail to meet our expectations, and we may decide to realign our focus, as we did when we closed our offices in Spain and France in the fourth quarter of 2008.

## **Basis of Presentation**

### *General*

We report consolidated operations in U.S. dollars and operate in two geographic segments: North America and International. The North America segment is comprised of all of our operations in the United States, Canada and Mexico, and the International segment is comprised of all non-North America operations, which includes operations in select countries in Europe and Asia.

### *Revenues*

We generate substantially all of our revenues from our restaurant customers. Our revenues include monthly subscription fees, a fee for each restaurant guest seated through online reservations and other revenue, including installation fees for our ERB (including training). Subscription revenues are recognized on a straight-line basis during the contractual period over which the service is delivered to our restaurant customers. Revenues from online reservations are recognized on a transaction basis as the diners are seated by the restaurant. Installation fees are recognized on a straight-line basis over an estimated customer life of approximately three to six years. Revenues are shown net of redeemable Dining Points issued to diners as described in "Critical Accounting Policies and Estimates—Dining Rewards Loyalty Programs" below.

### *Costs and Expenses*

*Operations and support.* Our operations and support expenses consist primarily of payroll and related costs, including bonuses and stock-based compensation, for those employees associated with installation, support and maintenance for our restaurant customers, as well as costs related to our outsourced call center. Operations and support expenses also include restaurant equipment costs, such as depreciation of restaurant-related hardware, shipping costs related to restaurant equipment, restaurant equipment costs that do not meet the capitalization threshold, referral payments and website connectivity costs. Operations and support expenses also include amortization of capitalized website and development costs (see "Critical Accounting Policies and Estimates—Website and Software Development Costs" below). Also included in operations and support expenses are travel and related expenses incurred by the employees providing installation and support services for our restaurant customers, plus allocated facilities costs.

*Sales and marketing.* Our sales and marketing expenses consist primarily of salaries, benefits and incentive compensation for sales and marketing employees, including stock-based compensation. Also included are expenses for trade shows, public relations and other promotional and marketing activities, travel and entertainment expenses and allocated facilities costs.

*Technology.* Our technology expenses consist primarily of salaries and benefits, including bonuses and stock-based compensation, for employees and contractors engaged in the development and ongoing maintenance of our websites, infrastructure and software, as well as allocated facilities costs.

*General and administrative.* Our general and administrative costs consist primarily of salaries and benefits, including stock-based compensation, for general and administrative employees and contractors involved in executive, finance, accounting, risk management, human resources and legal roles. In addition, general and administrative costs include consulting, legal, accounting and other professional fees. Bad debt, third-party payment processor, credit card, bank processing fees and allocated facilities costs are also included in general and administrative expenses.

Headcount consists of full-time equivalent employees, including full-time equivalent temporary employees, in all of the sections noted below.

### ***Other Income, Net***

Other income, net consists primarily of the interest income earned on our cash accounts. Foreign exchange gains and losses are also included in other income, net.

### ***Income Taxes***

We are subject to tax in the United States as well as other tax jurisdictions or countries in which we conduct business. Earnings from our non-U.S. activities are subject to local country income tax and may be subject to current U.S. income tax.

### ***Critical Accounting Policies and Estimates***

Our consolidated financial statements are prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP). The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures. We evaluate our estimates and assumptions on an ongoing basis. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our actual results could differ from these estimates.

We believe that the assumptions and estimates associated with revenue recognition, the points-based loyalty program, website and software development costs, income taxes and stock-based compensation have the greatest potential impact on our consolidated financial statements. Therefore, we consider these to be our critical accounting policies and estimates. For further information on all of our significant accounting policies, please see Note 2 of the accompanying notes to our consolidated financial statements.

### ***Revenue Recognition***

Our revenues include monthly subscription fees, a fee for each restaurant guest seated through online reservations and other revenue, including installation fees for our ERB (including training). We provide our application as a service, and follow the provisions of Accounting Standards Codification ("ASC") Topic 605—Revenue Recognition. We recognize revenue when all of the following conditions are met: there is persuasive evidence of an arrangement; the service has been provided to the customer; the collection of the fees is reasonably assured; and the amount of fees to be paid by the customer is fixed or determinable. Amounts paid by the customer include the right to use our hardware during the service period. Proportionate revenue related to the right to use our hardware accounts for less than 10% of revenues for the periods presented.

Subscription revenues are recognized on a straight-line basis during the contractual period over which the service is delivered. Reservation revenues (or per seated diner fees) are recognized on a transaction-by-transaction basis as diners are seated by our restaurant customers. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenues or revenues, depending on whether the revenue recognition criteria have been met. Revenues are shown net of redeemable Dining Points issued to diners (as described below).

Revenues from the installation of our ERB are recognized on a straight-line basis over the estimated customer life, commencing with customer acceptance. The estimated customer life is approximately three to six years, based on historical restaurant customer termination activity. Estimates made by us may differ from actual customer lives. These differences may materially affect other revenue by increasing or decreasing revenue, depending on whether the estimated customer life decreases or increases. A change in the estimated customer life by one year in either direction would have a minimal impact to total revenue of less than 1%. To date, the impact of changes in the estimated customer life has not been material to our results of operations or financial position.

Revenue is recognized net of any taxes collected from customers and subsequently remitted to governmental authorities.

### ***Dining Rewards Loyalty Programs***

In the U.S. and certain of our international markets, we provide points-based loyalty programs, OpenTable Dining Rewards, to registered diners who book and honor reservations through our websites and mobile apps. OpenTable Dining Rewards involves the issuance of "Dining Points," which can be accumulated and redeemed for "Dining Checks." For example, in the U.S., the standard award is 100 points per reservation, but diners can earn 1,000 points for reservations during featured times under the OpenTable Dining Rewards program. When a diner accumulates a minimum of 2,000 points, he or she may redeem them for a \$20 Dining Check. Every 100 Dining Points is equal to one dollar. Diners may present Dining Checks at any OpenTable restaurant and their bill is reduced by the check amount. The restaurant then deposits the Dining Check to its bank. The features of the OpenTable Dining Rewards program in each international market, such as the amount for which points may be redeemed, vary by country.

If a diner does not make a seated reservation within any 12-month period, then his or her account is considered inactive and the Dining Points balance is reset to zero. As is typical with points-based incentive programs, many Dining Points expire unused. In addition, some Dining Checks are never used. The recorded contra-revenue is an estimate of the eventual cash outlay related to the issued Dining Points and is booked at the time the points are earned by the diner (i.e., when the diner is "seated" by the restaurant). We estimate the liability for the issued Dining Points by analyzing historical patterns of redemption and check-cashing activity. These historical patterns are evaluated in light of any current or proposed program changes that may impact future point redemption. Actual redemption rates could differ from our estimates used in assessing the contra-revenue amounts and corresponding liability, particularly if participation in our premium listings programs, with higher point awards, increases. These differences could materially affect reservation revenues. For example, an increase of 10% in the redemption rate as of December 31, 2012 would result in a reduction in revenues for the year of \$5.2 million and an increase in the dining rewards payable liability at year end of 19%.

We recognize the corresponding liability associated with Dining Points as contra-revenue in accordance with ASC Topic 605-50—Revenue Recognition-Customer Payments and Incentives.

### ***Valuation of Long-Lived and Intangible Assets, Including Goodwill***

Long-lived assets are reviewed for impairment whenever events or changes in circumstances or a triggering event, such as service discontinuance or technological obsolescence, indicate that the carrying amount of the long-lived asset may not be recoverable. Determining whether a triggering event has occurred often involves significant judgment from management. When such events occur, we compare the carrying amount of the asset to the undiscounted expected future cash flows related to the asset. If the comparison indicates that an impairment exists, the amount of the impairment is calculated and a charge is recorded. The amount of the impairment is determined to be the difference between the carrying amount and the fair value of the asset. If a readily determinable market price does not exist for the asset, fair value is estimated using discounted expected cash flows attributable to the asset. Significant judgment and estimates are involved in any impairment evaluation and our estimates, including estimates used in determining future cash flows.

We test goodwill for impairment at least annually. We review goodwill for impairment as of August 31 and whenever events or changes in circumstances indicate that the carrying amount of this asset may exceed its fair value. Our assessment is performed at the reporting unit level. The goodwill evaluation for impairment is performed using a two-step process. The first step is to identify potential impairment by comparing the fair value of a reporting unit to the book value, including goodwill. If the fair value of a reporting unit exceeds the book value, goodwill is not considered impaired. If the book value exceeds the fair value, the second step of the process is performed to measure the amount of

impairment. The process of evaluating goodwill for impairment under the two-step model involves the determination of the fair value of our reporting units. The fair value of the reporting units is determined using discounted future cash flows. Forecasts of future cash flow are based on management's best estimate of future revenues and operating expenses, based primarily on expected growth in installed restaurants, seated diners, pricing and general economic conditions. Changes in these forecasts could significantly change the amount of impairment recorded, if any.

Goodwill is tested for impairment at the reporting unit level and is based on the net assets for each unit, including goodwill and intangible assets. We assign goodwill to each operating segment as this represent the lowest level which constitutes a business and for which discrete financial information is available and management regularly reviews. We have determined that we have two geographical reporting units: North America and the United Kingdom.

The fair value of our North America reporting unit, which carries approximately \$6.8 million in goodwill associated with the acquisitions with respect to Guestbridge, Inc., Table Maestro LLC, or Table Maestro, and Treat Technologies, Inc., or Treat, exceeds the carrying value significantly, indicating no impairment in goodwill for the North America reporting unit. The fair value of the U.K. reporting unit, which carries approximately \$39.5 million in goodwill associated with the toptable acquisition, exceeds the carrying value, indicating no goodwill impairment for the U.K. reporting unit.

During the year, management monitored the actual performance of the business relative to the fair value assumptions used during our annual goodwill impairment test. For the periods presented, no triggering events were identified that required an update to our annual impairment test. As a measure of sensitivity, a 10% decrease in the fair value of either of our reporting units as of December 31, 2012 would have had no impact on the carrying value of our goodwill.

### ***Website and Software Development Costs***

Costs related to website and internal-use software are accounted for in accordance with ASC Topic 350-50—Intangibles—Website Development Costs ("Topic 350-50"). Such software is primarily related to our websites and mobile apps, including support systems. We capitalize our costs to develop software when preliminary development efforts are successfully completed, management has authorized and committed project funding, and it is probable that the project will be completed and the software will be used as intended. Costs incurred prior to meeting these criteria are expensed as incurred. Capitalized costs are amortized when the project is completed and placed in service on a straight-line basis over the estimated useful life of the related asset, generally estimated between two to three years. Costs incurred for enhancements that are expected to result in additional features or functionality are capitalized and amortized over the estimated useful life of the enhancements.

We follow the guidance in ASC Topic 985—Software in accounting for costs incurred in connection with development of the software contained in the ERB used by all restaurant customers, and in a limited number of certain transactions we sell reservation systems that do not include our ongoing service. All costs incurred to establish the technological feasibility of a computer product to be sold, leased or otherwise marketed are expensed as incurred. Costs incurred subsequent to establishing technological feasibility and through general product release are capitalized and amortized over the estimated product life. The period between technological feasibility and general product release is generally short, and the costs incurred during this stage are not considered to be material and are expensed as incurred.

### ***Income Taxes***

We record income taxes using the asset and liability method of accounting for income taxes in accordance with ASC Topic 740—Income Taxes ("Topic 740"). Under this method, income tax expense or benefit is recognized for the amount of taxes payable or refundable for the current year and for

deferred tax liabilities and assets for the future tax consequences of events that have been recognized in our consolidated financial statements or tax returns. We account for any income tax contingencies in accordance with Topic 740. The measurement of current and deferred tax assets and liabilities is based on provisions of currently enacted tax laws. The effects of any future changes in tax laws or rates have not been considered.

For the preparation of our consolidated financial statements included herein, we estimate our income taxes and tax contingencies in each of the tax jurisdictions in which we operate prior to the completion and filing of our tax returns. This process involves estimating actual current tax expense together with assessing temporary differences resulting from differing treatment of items, such as deferred revenue, for tax and accounting purposes. These differences result in net deferred tax assets and liabilities. We must then assess the likelihood that the deferred tax assets will be realizable, and to the extent we believe that realizability is not likely, we must establish a valuation allowance. In assessing the need for any additional valuation allowance, we consider all the evidence available to us, both positive and negative, including historical levels of income, legislative developments, expectations and risks associated with estimates of future taxable income, and ongoing prudent and feasible tax planning strategies.

As of December 31, 2012, it was considered "more likely than not" that our deferred tax assets would be realized, with the exception of certain foreign tax credit carryforwards and certain foreign net operating losses which did not meet the "more likely than not" realizability threshold. A valuation allowance of approximately \$1.2 million as of December 31, 2012 will result in an income tax benefit if and when we conclude it is more likely than not that the related deferred tax assets will be realized.

### ***Stock-based Compensation***

We measure stock-based awards at fair value and recognize compensation expense for all share-based payment awards made to our employees and directors, including employee stock options and restricted stock units in accordance with ASC Topic 718—Stock Compensation.

We estimate the fair value of stock options granted using the Black-Scholes valuation model. This model requires us to make estimates and assumptions including, among other things, estimates regarding the length of time an employee will retain vested stock options before exercising them, the estimated volatility of our common stock price and the number of options that will be forfeited prior to vesting. The fair value is then amortized using a graded vesting attribution method over the requisite service periods of the awards, which is generally the vesting period. Changes in these estimates and assumptions can materially affect the determination of the fair value of stock-based compensation and consequently, the related amount recognized in our consolidated income statements.

The cost of restricted stock units is determined using the fair value of our common stock on the date of grant. Stock-based compensation expense is recognized using a graded vesting attribution method over the vesting period.

## Results of Operations

The following tables set forth our results of operations for the periods presented and as a percentage of our revenues for those periods. The period-to-period comparison of financial results is not necessarily indicative of future results.

## Segments

We have identified two reporting segments: North America and International. In both segments, we derive revenue primarily from online reservations and guest management solutions. Total North America revenues increased from \$90.1 million in 2010, to \$118.7 million in 2011, to \$139.3 million in 2012. North America reservation revenues increased from \$43.9 million in 2010, to \$62.8 million in 2011, to \$78.9 million in 2012. North America reservation revenues increased as a result of an increase in seated diners. North America subscription revenues increased from \$38.7 million in 2010, to \$44.8 million in 2011, to \$49.4 million in 2012. North America subscription revenues increased as a result of an increase in installed restaurants. North America income from operations increased from \$26.0 million in 2010, to \$44.0 million in 2011, to \$45.7 million in 2012. The increase in North America income from operations is due to revenue increases exceeding the increase in expenses, due to operational efficiencies.

Total International revenues increased from \$8.9 million in 2010, to \$20.9 million in 2011, to \$22.3 million in 2012. International reservation revenues increased from \$3.6 million in 2010, to \$11.5 million in 2011, to \$12.1 million in 2012. International reservation revenues increased as a result of an increase in seated diners. International subscription revenues increased from \$4.4 million in 2010, to \$6.0 million in 2011, to \$6.9 million in 2012. International subscription revenues increased in 2012 despite an overall decrease in the number of installed restaurants, as a result of an increase in the number of installed restaurants from which we generated meaningful revenues. In the second quarter of 2012, we relaunched the toptable site and simultaneously removed restaurants from our installed restaurant base that did not migrate to OpenTable technology. Most of the restaurants that did not migrate were restaurants from which we had been generating little to no revenues. After adjusting for this one-time event, installed restaurants on OpenTable technology increased 62% from December 31, 2011 to December 31, 2012. International loss from operations increased from \$8.1 million in 2010, to \$11.4 million in 2011, and decreased to \$9.1 million in 2012. The increase in the loss from operations in years 2010 and 2011 is due to the ongoing investment in our international expansion efforts. We increased headcount and acquired toptable in the fourth quarter of 2010. The decrease in the loss in 2012 was due primarily to the increase in revenue, as a result of the increase in seated diners. Refer to Note 13 to the consolidated financial statements for additional segment information.

*2012 compared to 2011.* Total revenues increased by \$22.1 million, or 16%, from the year ended December 31, 2011 to the year ended December 31, 2012. Reservation revenues increased to \$91.0 million in the year ended December 31, 2012 from \$74.2 million in the year ended December 31, 2011, an increase of \$16.8 million, or 23%. Reservation revenues increased as a result of an increase in seated diners. Subscription revenues increased to \$56.3 million in the year ended December 31, 2012 from \$50.8 million in the year ended December 31, 2011, an increase of \$5.5 million, or 11%. Subscription revenues increased due to the increase in installed ERB restaurants. Other revenues decreased slightly to \$14.3 million in the year ended December 31, 2012 from \$14.5 million in the year ended December 31, 2011, a decrease of \$0.2 million, or 1%. Other revenues decreased primarily as a result of a decrease in sales of third-party restaurant coupons, which we stopped selling at the end of 2011, partially offset by an increase in revenue from other product offerings, including advertising sales, featured private dining listings and gift card sales, which we began selling in August 2012.

*2011 compared to 2010.* Total revenues increased by \$40.5 million, or 41%, from the year ended December 31, 2010 to the year ended December 31, 2011. Reservation revenues increased to \$74.2 million in the year ended December 31, 2011 from \$47.5 million in the year ended December 31, 2010, an increase of \$26.7 million, or 56%. Reservation revenues increased as a result of an increase in seated diners. Subscription revenues increased to \$50.8 million in the year ended December 31, 2011 from \$43.1 million in the year ended December 31, 2010, an increase of \$7.7 million, or 18%. Subscription revenues increased due to the increase in installed ERB restaurants. Other revenues increased to \$14.5 million in the year ended December 31, 2011 from \$8.3 million in the year ended December 31, 2010, an increase of \$6.2 million, or 74%. Other revenues increased primarily as a result of an increase in revenue from other product offerings, including advertising sales, featured private dining listings and third-party restaurant coupon sales. International revenues increased by \$12.0 million, or 135%, from the year ended December 31, 2010 to the year ended December 31, 2011 primarily due to the inclusion for a full year of the operations of toptable in the U.K., which was acquired on October 1, 2010.

### Costs and Expenses

#### Operations and Support

	Years Ended December 31,			2011 to 2012% Change	2010 to 2011% Change
	2012	2011	2010		
	(Dollars in thousands)				
Operations and support	\$ 41,908	\$ 39,350	\$ 27,803	7%	42%
Headcount (at period end):					
North America	149	138	112	8%	23%
International	55	54	54	2%	0%
Total	204	192	166	6%	16%

*2012 compared to 2011.* Operations and support expenses for the year ended December 31, 2012 were \$41.9 million compared to \$39.4 million for the year ended December 31, 2011, an increase of \$2.6 million, or 7%. The increase in operations and support expenses was primarily attributable to a \$2.0 million increase in headcount-related expenses, including stock-based compensation expense. Also contributing to the increase was a \$0.7 million increase in amortization of capitalized website and software development costs, plus a \$0.5 million increase in depreciation expense. These increases were partially offset by a decrease in costs associated with sales of third-party restaurant coupons, which we stopped selling at the end of 2011.

*2011 compared to 2010.* Operations and support expenses for the year ended December 31, 2011 were \$39.4 million compared to \$27.8 million for the year ended December 31, 2010, an increase of \$11.6 million, or 42%. The increase in operations and support expenses was primarily attributable to a \$4.8 million increase in headcount-related expenses, including stock-based compensation expense, and a \$1.0 million increase in cost at our outsourced customer support center. Also contributing to the increase was a \$2.7 million increase in amortization of intangible assets, a \$1.1 million increase in depreciation of capitalized website and software development costs, plus an increase in restaurant equipment costs, including depreciation on restaurant hardware, and equipment and shipping costs in connection with the increase in the installed base.

## Sales and Marketing

	Years Ended December 31,			2011 to 2012% Change	2010 to 2011% Change
	2012	2011	2010		
	(Dollars in thousands)				
Sales and marketing	\$ 34,531	\$ 28,697	\$ 21,673	20%	32%
Headcount (at period end):					
North America	122	112	98	9%	14%
International	57	68	62	-16%	10%
Total	179	180	160	-1%	13%

*2012 compared to 2011.* Sales and marketing expenses for the year ended December 31, 2012 were \$34.5 million compared to \$28.7 million for the year ended December 31, 2011, an increase of \$5.8 million, or 20%. The increase in sales and marketing expenses was primarily attributable to a \$5.6 million increase in headcount-related costs, including stock-based compensation expense, commissions and bonuses.

*2011 compared to 2010.* Sales and marketing expenses for the year ended December 31, 2011 were \$28.7 million compared to \$21.7 million for the year ended December 31, 2010, an increase of \$7.0 million, or 32%. The increase in sales and marketing expenses was primarily attributable to a \$4.8 million increase in headcount-related costs, including stock-based compensation expense, plus an increase of \$1.2 million for pay per click marketing expenses incurred by toptable.

## Technology

	Years Ended December 31,			2011 to 2012% Change	2010 to 2011% Change
	2012	2011	2010		
	(Dollars in thousands)				
Technology	\$ 14,564	\$ 14,691	\$ 12,345	-1%	19%
Headcount (at period end):					
North America	90	87	85	3%	2%
International	23	16	11	44%	45%
Total	113	103	96	10%	7%

*2012 compared to 2011.* Technology expenses for the year ended December 31, 2012 were \$14.6 million compared to \$14.7 million for the year ended December 31, 2011, a decrease of \$0.1 million, or 1%. The decrease in technology expenses was primarily attributable to a \$0.1 million decrease in headcount-related costs, including stock-based compensation expense.

*2011 compared to 2010.* Technology expenses for the year ended December 31, 2011 were \$14.7 million compared to \$12.3 million for the year ended December 31, 2010, an increase of \$2.4 million, or 19%. The increase in technology expenses was primarily attributable to a \$1.9 million increase in headcount-related costs, including stock-based compensation expense.

## General and Administrative

	Years Ended December 31,			2011 to 2012% Change	2010 to 2011% Change
	2012	2011	2010		
	(Dollars in thousands)				
General and administrative	\$ 34,080	\$ 24,157	\$ 19,252	41%	25%
Headcount (at period end):					
North America	62	61	49	2%	24%
International	22	22	22	0%	0%
Total	84	83	71	1%	17%

*2012 compared to 2011.* General and administrative expenses for the year ended December 31, 2012 were \$34.1 million compared to \$24.2 million for the year ended December 31, 2011, an increase of \$9.9 million, or 41%. The increase in general and administrative expenses was primarily attributable to an \$8.3 million increase in headcount-related costs, including stock-based compensation expense. Also contributing to the increase was an increase of \$0.7 million in professional services which was comprised of a \$1.3 million increase in tax and accounting services, offset by a decrease from a one-time legal settlement that occurred in 2011, and an increase in bad debt expense of \$0.5 million.

*2011 compared to 2010.* General and administrative expenses for the year ended December 31, 2011 were \$24.2 million compared to \$19.3 million for the year ended December 31, 2010, an increase of \$4.9 million, or 25%. The increase in general and administrative expenses was primarily attributable to a \$2.7 million increase in headcount-related costs, including stock-based compensation expense. Also contributing to the increase was an increase of \$0.6 million in professional services, primarily related to a one-time legal settlement expense in the second quarter of 2011.

## Other Income, Net

	Years Ended December 31,			2011 to 2012% Change	2010 to 2011% Change
	2012	2011	2010		
	(Dollars in thousands)				
Other income, net	\$ 99	\$ 98	\$ 241	1%	-59%

*2012 compared to 2011.* Other income, net for the year ended December 31, 2012 remained consistent at \$0.1 million compared to the year ended December 31, 2011. The largest component of other income, net is interest income earned on cash, cash equivalents and short-term investments. While cash balances as of December 31, 2012 were significantly higher than cash balances as of December 31, 2011, average balances for each year were comparable, resulting in similar amounts of interest income earned.

*2011 compared to 2010.* Other income, net for the year ended December 31, 2011 was \$0.1 million compared to \$0.2 million for the year ended December 31, 2010, a decrease of \$0.1 million, or 59%. The decrease in other income, net was primarily the result of a \$0.1 million decrease in interest income earned on cash, cash equivalents and short-term investments as a result of experiencing lower short-term borrowing interest rates.

## Income Taxes

	Years Ended December 31,			2011 to 2012% Change	2010 to 2011% Change
	2012	2011	2010		
	(Dollars in thousands)				
Income tax expense	\$ 12,676	\$ 11,167	\$ 4,080	14%	174%

*2012 compared to 2011.* Income tax expense for the year ended December 31, 2012 was \$12.7 million compared to income tax expense of \$11.2 million for the year ended December 31, 2011. Our effective income tax rate in 2012 was 34.6% up slightly from 34.1% in 2011.

*2011 compared to 2010.* Income tax expense for the year ended December 31, 2011 was \$11.2 million compared to income tax expense of \$4.1 million for the year ended December 31, 2010. Our effective income tax rate in 2011 was 34.1% up from 22.5% in 2010. Our effective tax rate increased in 2011 as compared to 2010 due to the recognition of certain prior years Federal and California research and development tax credit benefits in the year ended December 31, 2010.

## Liquidity and Capital Resources

	Years Ended December 31,		
	2012	2011	2010
	(In thousands)		
Consolidated Statements of Cash Flows Data:			
Purchases of property and equipment	\$ 13,438	\$ 9,584	\$ 9,327
Depreciation and amortization			
North America	7,532	6,852	6,036
International	5,216	5,153	1,532
Total depreciation and amortization	12,748	12,005	7,568
Cash flows from operating activities	61,269	42,071	33,356
Cash flows from investing activities	(4,841)	(13,931)	(24,938)
Cash flows from financing activities	9,740	(24,781)	5,352

As of December 31, 2012, we had cash and cash equivalents of \$102.8 million and short-term investments of \$0.7 million. Cash and cash equivalents consist of cash, money market accounts, certificates of deposit and U.S. government agency securities. Short-term investments consist of U.S. government agency securities and certificates of deposit.

Amounts deposited with third-party financial institutions exceed the Federal Deposit Insurance Corporation, or FDIC, and Securities Investor Protection Corporation, or SIPC, insurance limits, as applicable. These cash, cash equivalents and short-term investment balances could be affected if the underlying financial institutions fail or are subjected to other adverse conditions in the financial markets. To date we have experienced no loss or lack of access to our cash, cash equivalents or short-term investments; however, we can provide no assurances that access to our invested cash, cash equivalents and short-term investments will not be impacted by adverse conditions in the financial markets.

In January 2013, we entered into a credit agreement, which provides for a senior secured revolving credit facility of \$50.0 million to fund working capital and other general corporate purposes. This revolving credit facility expires in January 2016.

Our initial public offering in 2009 raised approximately \$34.6 million. Since then, we have been able to finance our operations, including international expansion, through cash from North America operating activities and proceeds from the exercise of employee stock options. We had cash and cash

equivalents of \$102.8 million at December 31, 2012, and we believe we will have sufficient cash to support our operating activities and capital expenditures for at least the next twelve months.

### ***Operating Activities***

For the twelve months ended December 31, 2012, operating activities provided \$61.3 million in cash, primarily as a result of net income of \$24.0 million, \$20.6 million in stock-based compensation, \$12.7 million in depreciation and amortization and \$2.7 million in provision for bad debts.

For the twelve months ended December 31, 2011, operating activities provided \$42.1 million in cash, as a result of net income of \$21.6 million, \$10.7 million in stock-based compensation, \$12.0 million in depreciation and amortization and \$2.1 million in provision for bad debts. These amounts were partially offset by a cash usage of \$7.7 million as a result of an increased accounts receivable balance.

For the twelve months ended December 31, 2010, operating activities provided \$33.4 million in cash, as a result of net income of \$14.1 million, \$8.1 million in stock-based compensation, \$7.6 million in depreciation and amortization and \$1.5 million in provision for bad debts. These amounts were partially offset by a cash usage of \$4.9 million as a result of an increased accounts receivable balance.

### ***Investing Activities***

Our primary investing activities have consisted of purchases and sales of short-term investments, purchases of property, equipment and software and the investment in business acquisitions. We expect to have ongoing capital expenditure requirements to support our growing restaurant installed base and other infrastructure needs. We expect to fund this investment with our existing cash, cash equivalents and short-term investments.

During the twelve months ended December 31, 2012, we purchased \$13.4 million of property, equipment and software, net, and we paid \$4.0 million to acquire Treat. Also in the twelve months ended December 31, 2012, we sold \$12.6 million (net of purchases) of short-term investments.

During the twelve months ended December 31, 2011, we purchased \$9.6 million of property, equipment and software, net. Also in the twelve months ended December 31, 2011, we purchased \$4.5 million (net of sales) of short-term investments.

During the twelve months ended December 31, 2010, we acquired toptable for approximately \$55.3 million in cash and also paid \$1.5 million in cash to acquire substantially all of the assets and certain liabilities of Table Maestro. In addition to these business acquisitions, we purchased \$9.3 million of property, equipment and software, net. Also in the twelve months ended December 31, 2010, we sold \$40.6 million (net of purchases) of short-term investments.

### ***Financing Activities***

Our financing activities have primarily consisted of proceeds from the issuance of common stock pursuant to our equity incentive plans and the excess tax benefit related to stock compensation, as well as repurchases of common stock, beginning in 2011, under our share repurchase programs.

During the twelve months ended December 31, 2012, we repurchased \$8.7 million of common shares under our share repurchase programs.

During the twelve months ended December 31, 2011, we repurchased \$41.3 million of common shares under the share repurchase program that we concluded in January 2012.

**Off Balance Sheet Arrangements**

As of December 31, 2012, we did not have any off balance sheet arrangements.

**Contractual Obligations**

We lease our primary office space in San Francisco, California and other locations under various non-cancelable operating leases that expire in or prior to 2020. We have no debt obligations, other than a \$50.0 million senior secured revolving credit facility for working capital and other general corporate purposes, under which we have not borrowed to date. This revolving credit facility expires in January 2016. Additionally, all property, equipment and software have been purchased for cash, and accordingly we have no capital lease obligations. Finally, we have no material long-term purchase obligations outstanding with any vendors or third parties, or any other long-term liabilities. The following table sets forth, as of December 31, 2012, payments due under our operating lease obligations.

	<u>Payments Under Operating Leases</u> (In thousands)
Year ending December 31:	
2013	\$ 1,744
2014	2,454
2015	2,246
2016	2,210
2017	2,223
Thereafter	5,370
Total	<u>\$ 16,247</u>

As of December 31, 2012, in addition to the obligations in the table above, we had approximately \$15.5 million of income tax liabilities, including interest and penalties, related to uncertain tax positions. Due to the high degree of uncertainty regarding the settlement of these liabilities, we are unable to estimate the years in which future cash outflows may occur.

**Recent Accounting Pronouncements**

In May 2011, the Financial Accounting Standards Board ("FASB") issued ASC Topic 820—Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (Topic 820). Topic 820 changes the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements to ensure consistency between U.S. GAAP and IFRS. Topic 820 also expands the disclosures for fair value measurements that are estimated using significant unobservable (Level 3) inputs. Topic 820 is effective for interim and annual periods beginning after December 15, 2011 and is applied prospectively. The adoption of this standard did not change our consolidated financial statement footnote disclosures.

In June 2011, the FASB issued ASC Topic 220—Presentation of Comprehensive Income (Topic 220). Topic 220 eliminates the option to report other comprehensive income and its components in the statement of changes in equity. Topic 220 requires that all nonowner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. The amended guidance, which must be applied retroactively, is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with earlier adoption permitted. The adoption of this standard changed the presentation of our consolidated financial statements but had no effect on the reported amounts of comprehensive income.

In September 2011, the FASB issued Accounting Standards Update No. 2011-08, Intangibles-Goodwill and Other (Topic 350)—Testing Goodwill for Impairment. Topic 350 is intended to simplify goodwill impairment testing by adding a qualitative review step to assess whether the required quantitative impairment analysis that exists today is necessary. Topic 350 permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. Topic 350 is effective for interim and annual periods beginning after December 15, 2011 and earlier adoption is permitted. The Company performs its annual impairment testing of goodwill in the third quarter of each year. For the test conducted as of August 31, 2012, the Company elected to bypass the qualitative assessment and perform only the quantitative assessment. The adoption of this standard did not have an effect on our consolidated financial statements.

## **ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK**

We are exposed to market risks in the ordinary course of our business. These risks include primarily interest rate, foreign exchange risks and inflation.

### ***Interest Rate Fluctuation Risk***

We do not have any long-term borrowings.

Our investments include cash, cash equivalents and short-term investments. Cash and cash equivalents consist of cash, money market accounts, certificates of deposit and U.S. government agency securities. Short-term investments consist of U.S. government agency securities and certificates of deposit. The primary objective of our investment activities is to preserve principal while maximizing income without significantly increasing risk. We do not enter into investments for trading or speculative purposes. Our investments are exposed to market risk due to a fluctuation in interest rates, which may affect our interest income and the fair market value of our investments. Due to the short-term nature of our investment portfolio, we do not believe an immediate 10% increase in interest rates would have a material effect on the fair market value of our portfolio, and therefore we do not expect our operating results or cash flows to be materially affected to any degree by a sudden change in market interest rates.

### ***Foreign Currency Exchange Risk***

We have foreign currency risks related to our revenues and operating expenses denominated in currencies other than the U.S. dollar, principally the British pound sterling, the euro, the Japanese yen, the Canadian dollar and the Mexican peso. We do not believe movements in the foreign currencies in which we transact will significantly affect future net earnings. Foreign currency risk can be quantified by estimating the change in cash flows resulting from a hypothetical 10% adverse change in foreign exchange rates. We believe such a change would not have a material impact on our results of operations.

### ***Inflation Risk***

We do not believe that inflation has had a material effect on our business, financial condition or results of operations. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition and results of operations.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of  
OpenTable, Inc.  
San Francisco, California

We have audited the accompanying consolidated balance sheets of OpenTable, Inc. and subsidiaries (collectively the "Company") as of December 31, 2012 and 2011, and the related consolidated income statements, statements of stockholders' equity, statements of comprehensive income, and of cash flows for each of the three years in the period ended December 31, 2012. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and 2011, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2012, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 25, 2013, expressed an unqualified opinion on the Company's internal control over financial reporting.

/s/ DELOITTE & TOUCHE LLP

San Jose, California

**OPENTABLE, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010**

**1. Organization and Description of Business**

OpenTable, Inc. (together with its subsidiaries, "OpenTable" or the "Company"), was incorporated on October 13, 1998, and is a Delaware corporation. The Company provides solutions that form an online network connecting reservation-taking restaurants and people who dine at those restaurants. For restaurant customers, the Company provides a proprietary Electronic Reservation Book ("ERB"), and Connect. The ERB combines proprietary software and computer hardware to deliver a solution that computerizes restaurant host-stand operations and replaces traditional pen-and-paper reservation books. The ERB streamlines and enhances a number of business-critical functions and processes for restaurants, including reservation management, table management, guest recognition and email marketing. For restaurants that do not require the operational benefits of the ERB, OpenTable offers Connect, a web-based solution that enables participating restaurants to receive reservations from OpenTable's websites and mobile applications, or apps, as well as the websites and mobile apps of OpenTable's partners and restaurant customers. For diners, the Company operates popular restaurant reservation websites and mobile apps. OpenTable's websites and mobile apps enable diners to find, choose and book tables at restaurants on the OpenTable network that use ERB and Connect in real time, overcoming the inefficiencies associated with the traditional process of reserving by phone.

*Certain Significant Risks and Uncertainties*

The Company operates in a dynamic industry, and accordingly, can be affected by a variety of factors. For example, management of the Company believes that changes in any of the following areas could have a significant negative effect on the Company in terms of its future financial position, results of operations or cash flows: the ability to maintain an adequate rate of growth; the impact of the current economic climate on its business; the ability to effectively manage its growth; the ability to attract new restaurant customers; the ability to increase the number of visitors to its websites and convert those visitors into diners; and the ability to retain existing restaurant customers and diners and encourage repeat reservations.

**2. Summary of Significant Accounting Policies**

*Principles of Consolidation*

These consolidated financial statements include the accounts of OpenTable, Inc. and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

*Use of Estimates*

The preparation of the Company's financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. These estimates are based on information available as of the date of the financial statements; therefore, actual results could differ from those estimates.

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

*Foreign Currency Translation*

The Company's operations are conducted in various countries around the world and the financial statements of its foreign subsidiaries are reported in the applicable foreign currencies (functional currencies). Financial information is translated from the applicable functional currency to the U.S. dollar (the reporting currency) for inclusion in the Company's consolidated financial statements. Income, expenses and cash flows are translated at average exchange rates prevailing during the fiscal period, and assets and liabilities are translated at fiscal period-end exchange rates. Resulting translation adjustments are included as a component of accumulated other comprehensive income (loss) in stockholders' equity. Foreign exchange transaction gains and losses are included in Other Income, net in the accompanying consolidated income statements.

*Cash and Cash Equivalents*

The Company considers all highly liquid short-term investments with original maturities of three months or less at the time of purchase to be cash equivalents. At December 31, 2012 and 2011, cash and cash equivalents consist of cash, money market accounts, certificates of deposit and U.S. government agency securities.

*Short-term Investments*

Short-term investments consist mainly of U.S. government agency securities and certificates of deposit. The Company classifies its investments as available-for-sale securities. The Company has classified all available for sale securities with readily available markets as short term, even though the stated maturity may be one year or more beyond the current balance sheet date, because of the intent and ability to sell those securities as necessary, prior to maturity to meet liquidity needs. Available-for-sale securities are carried at fair value with unrealized gains and losses reported as a component of accumulated other comprehensive income (loss) in stockholders' equity. For the twelve month periods ended December 31, 2012, 2011, and 2010, realized and unrealized gains and losses on investments were not material and no impairment charges were recognized. An impairment charge is recorded in the consolidated income statements for declines in fair value below the cost of an individual investment that are deemed to be other than temporary. Management judges whether a decline in value is temporary based on available information, including the length of time that the fair market value has been below cost combined with the severity of the decline.

If a debt security in an unrealized loss position is deemed to be other-than-temporary, the difference between the security's then-current amortized cost basis and fair value is separated into (i) the amount of the impairment related to the credit loss (i.e., the credit loss component) and (ii) the amount of the impairment related to all other factors (i.e., the non-credit loss component). The credit loss component is recognized in earnings. The non-credit loss component would be recognized in accumulated other comprehensive loss.

*Fair Value*

The Company records its financial assets and liabilities at fair value. The accounting standard for fair value provides a framework for measuring fair value, and defines fair value as the price that would

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the reporting date. The accounting standard establishes a three-tier hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value:

- **Level 1** —Quoted prices in active markets for identical assets or liabilities. The Company considers a market to be active when transactions for the asset occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- **Level 2** —Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- **Level 3** —Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. The valuation of Level 3 investments requires the use of significant management judgments or estimation.

***Concentrations of Credit Risk***

Financial instruments which potentially subject the Company to concentration of credit risk consist primarily of cash and cash equivalents, restricted cash, short-term investments and accounts receivable. The Company places its cash and cash equivalents, short-term investments and restricted cash with major financial institutions throughout the world, which management assesses to be of high credit quality, in order to limit the exposure of each investment.

Credit risk with respect to accounts receivable is dispersed due to the large number of customers. In addition, the Company's credit risk is mitigated by the relatively short collection period. Collateral is not required for accounts receivable. The Company maintains an allowance for doubtful accounts receivable balances. The allowance is based upon historical loss patterns, the number of days that billings are past due and an evaluation of the potential risk of loss associated with problem accounts. Accounts receivable written-off against the allowance for doubtful accounts were \$2,430,000, \$2,058,000 and \$1,279,000 for the years ended December 31, 2012, 2011 and 2010, respectively.

***Property, Equipment and Software, net***

Property, equipment and software, net is stated at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, which is four years for restaurant hardware and three years for all other asset categories except leasehold improvement, which are amortized over the shorter of the lease term or expected useful life of the improvements.

***Goodwill and Intangible Assets***

The Company accounts for goodwill and intangible assets in accordance with Accounting Standards Codification ("ASC") Topic 350 Intangibles—Goodwill and Other ("Topic 350"). Goodwill and intangible assets with indefinite lives are not amortized but are tested for impairment on an annual or whenever events or changes in circumstances indicate that the carrying amount of these assets may not

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

be recoverable. Intangible assets with finite useful lives are amortized using the straight-line method over their useful lives and are reviewed for impairment in accordance with Topic 350.

*Website and Internal-Use Software Development Costs*

Costs related to website and internal-use software development are accounted for in accordance with ASC Topic 350-50—Intangibles—Website Development Costs. Such software is primarily related to the Company's websites and mobile apps, including support systems. The Company begins to capitalize its costs to develop software when preliminary development efforts are successfully completed, management has authorized and committed project funding, and it is probable that the project will be completed and the software will be used as intended. Costs incurred prior to meeting these criteria are expensed as incurred and recorded within Technology expenses within the accompanying consolidated income statements. Capitalized costs are amortized on a straight-line basis over the estimated useful life of the related asset, generally estimated between two to three years. Costs incurred for enhancements that are expected to result in additional features or functionality are capitalized and amortized over the estimated useful life of the enhancements, generally between two and three years.

The Company capitalized \$7,253,000, \$3,426,000 and \$2,933,000 in website and internal-use software development costs during the years ended December 31, 2012, 2011 and 2010, respectively. Amortization expense totaled \$3,236,000, \$2,555,000 and \$1,416,000 during the fiscal years ended December 31, 2012, 2011 and 2010, respectively. Such costs are recorded in operations and support within the accompanying consolidated income statements.

The Company follows the guidance in ASC Topic 985—Software in accounting for costs incurred in connection with development of the software contained in the ERB used by all restaurant customers, and in a limited number of certain transactions the Company sells reservation systems which do not include the Company's ongoing service. All costs incurred to establish the technological feasibility of a computer product to be sold, leased or otherwise marketed are expensed as incurred. Costs incurred subsequent to establishing technological feasibility and through general product release are capitalized and amortized over the estimated product life. The period between technological feasibility and general product release is generally short and the costs incurred during this stage are not material for the years ended December 31, 2012, 2011 and 2010 and are expensed as incurred in Technology expense.

*Impairment of Long-Lived Assets and Long-Lived Assets to be Disposed of*

The Company evaluates its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset group to future undiscounted net cash flows expected to be generated by the asset group. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. There were no impairments of long-lived assets during the twelve months ended December 31, 2012, 2011 and 2010, respectively. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

***Revenue Recognition***

The Company's revenues include monthly subscription fees, a per-seated diner fee for each diner seated through the Company's online reservation system, and other revenue, including installation fees for the Company's ERB (including training). As the Company provides its application as a service, the Company follows ASC Topic 605—Revenue Recognition. The Company recognizes revenue when all of the following conditions are met: there is persuasive evidence of an arrangement; the service has been provided to the customer; the collection of the fees is reasonably assured; and the amount of fees to be paid by the customer is fixed or determinable. Amounts paid by the customer include the right to use Company hardware during the service period. Proportionate revenue related to the right to use Company hardware accounts for less than 10% of revenue for all periods presented.

Subscription revenues are recognized on a straight-line basis during the contractual period over which the service is delivered. Reservation revenues (or per-seated diner fees) are recognized on a transaction-by-transaction basis, as diners are seated by restaurant customers. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenue or revenues, depending on whether the revenue recognition criteria have been met. Revenues are shown net of \$15,419,000, \$12,444,000 and \$8,767,000 for the years ended December 31, 2012, 2011 and 2010, respectively, related to redeemable Dining Points issued to diners during the respective periods.

Revenues from the installation of the ERB is recognized on a straight-line basis over the estimated customer life, commencing with customer acceptance. As of December 31, 2012, the estimated customer life was approximately three to six years, based on historical restaurant customer termination activity. To date the impact of changes in the estimated customer life has not been material to the Company's results of operations or financial position.

Revenue is recognized net of any taxes collected from customers and subsequently remitted to governmental authorities.

***Dining Point Loyalty Program***

The Company provides a points-based loyalty program, "OpenTable Dining Rewards," to registered diners who book and honor reservations through the Company's websites and mobile apps. OpenTable Dining Rewards involves the issuance of "Dining Points" which can be accumulated and redeemed for "Dining Checks." When a diner accumulates a defined minimum number of points, he or she may redeem them for a Dining Check. Diners may present Dining Checks at any OpenTable restaurant and their bill is reduced by the check amount. If a diner does not make a seated reservation within any 12-month period, then his or her account is considered inactive and the accumulated Dining Points for the diner are reset to zero.

The Company recognizes the liability associated with Dining Points as contra-revenue in accordance with ASC Topic 605-50—Revenue Recognition—Customer Payments and Incentives.

The recorded contra-revenue is an estimate of the eventual cash outlay related to the issued Dining Points and is booked at the time the points are earned by the diner (when the diner is "seated" by the restaurant). The Company estimates the contra-revenue for the issued Dining Points by analyzing the historical patterns of redemption and check-cashing activity.

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

***Installation Costs***

The incremental direct customer acquisition costs associated with on-site system installations, including direct compensation costs of technicians providing installation services, are expensed as incurred within Operations and Support.

***Technology***

In the consolidated income statements, technology expense includes employee compensation associated with the development of new technologies.

***Operations and Support***

In the consolidated income statements, operations and support expense includes employee compensation associated with the installation, support and maintenance of customers, as well as costs associated with restaurant equipment and connectivity, outsourced call center costs, referral payments and shipping costs associated with restaurant equipment. Operations and Support expenses also include amortization of capitalized website and internal-use software development costs.

***Advertising Expense***

Advertising costs are expensed when incurred and are included in sales and marketing expense in the accompanying consolidated income statements. Advertising costs include direct-marketing costs such as e-mail marketing, pay per click, market research, printing, public relations and tradeshow expenses. The Company incurred \$2,910,000, \$3,578,000 and \$1,789,000 of advertising costs during the fiscal years ended December 31, 2012, 2011 and 2010, respectively.

***Stock-Based Compensation***

The Company measures stock based awards at fair value and recognizes compensation expense for all share-based payment awards made to its employees and directors, including employee stock options and restricted stock units in accordance with ASC Topic 718 ("Topic 718")—Stock Compensation.

The Company estimates the fair value of stock options granted using the Black-Scholes valuation model. This model requires the Company to make estimates and assumptions including, among other things, estimates regarding the length of time an employee will retain vested stock options before exercising them, the estimated volatility of its common stock price and the number of options that will be forfeited prior to vesting. The fair value is then amortized using a graded vesting attribution method over the requisite service periods of the awards, which is generally the vesting period. Changes in these estimates and assumptions can materially affect the determination of the fair value of stock-based compensation and consequently, the related amount recognized in the consolidated income statements.

The cost of restricted stock units is determined using the fair value of the Company's common stock on the date of grant. Stock-based compensation expense is recognized using a graded vesting attribution method over the vesting period.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

*Net Income Per Share*

The Company calculates net income per share in accordance with ASC Topic 260—Earnings per Share. Basic and diluted net income per share attributable to common stockholders are presented in conformity with the "two-class method" required for participating securities.

The Company's weighted average unvested shares subject to repurchase and settled in shares of common stock upon vesting have the non-forfeitable right to receive dividends on an equal basis with common stock and therefore are considered participating securities that must be included in the calculation of net income per share using the two-class method in all presented periods.

In addition, holders of Series A and Series B convertible preferred stock were each entitled to receive annual non-cumulative dividends of \$0.10 and \$0.69 per share for Series A and B, respectively, payable prior and in preference to holders of common stock. In the event a dividend was paid on common stock, Series A and Series B convertible preferred stockholders were entitled to a proportionate share of any such dividend as if they were holders of common shares (on an as-if converted basis). In May 2009, all of the Company's outstanding convertible preferred stock converted into common stock in connection with the Company's initial public offering. Under the two-class method, basic net income per share attributable to common stockholders is computed by dividing the net income attributable to common stockholders by the weighted average number of common shares outstanding during the period. Basic net income attributable to common stockholders is computed by an adjustment to subtract from net income the portion of current year earnings that the preferred shareholders would have been entitled to receive pursuant to their dividend rights had all of the year's earnings been distributed as well as an adjustment to subtract the non-forfeitable right to receive dividends by holders of unvested shares subject to repurchase. No such adjustment to earnings is made during periods with a net loss, as the holders of the convertible preferred shares had no obligation to fund losses. Diluted net income per share is computed by using the weighted-average number of common shares outstanding, plus, for periods with net income attributable to common stock, the dilutive effects of stock options. Potential dilutive shares are composed of incremental common shares issuable upon the exercise of stock options and warrants, and unvested common shares subject to repurchase.

Non-vested performance-based awards are included in the diluted shares outstanding each period if established performance criteria have been met at the end of the respective periods. 97,600, 97,600 and 220,000 shares were excluded from the dilutive shares outstanding for the years ended December 31, 2012, 2011 and 2010, respectively, as the performance criteria had not been met as of the respective dates. Anti-dilutive shares in the amounts of 1,482,000, 150,000 and 114,000 were excluded from the dilutive shares outstanding for the years ended December 31, 2012, 2011 and 2010, respectively.

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 2. Summary of Significant Accounting Policies (Continued)

The following table sets forth the computation of basic and diluted net income per share for the periods indicated:

	Year Ended December 31,		
	2012	2011	2010
<i>Basic net income per common share calculation:</i>			
Net income	\$ 23,972,000	\$ 21,554,000	\$ 14,079,000
Less: Undistributed earnings allocated to participating securities	—	(20,000)	(142,000)
Net income attributable to common shares—basic	<u>\$ 23,972,000</u>	<u>\$ 21,534,000</u>	<u>\$ 13,937,000</u>
Basic weighted average common shares outstanding	22,639,000	23,525,000	22,602,000
Basic net income per share	<u>\$ 1.06</u>	<u>\$ 0.92</u>	<u>\$ 0.62</u>
<i>Diluted net income per common share calculation:</i>			
Net income	\$ 23,972,000	\$ 21,554,000	\$ 14,079,000
Less: Undistributed earnings allocated to participating securities	—	(12,000)	(91,000)
Net income attributable to common shares—diluted	<u>\$ 23,972,000</u>	<u>\$ 21,542,000</u>	<u>\$ 13,988,000</u>
Weighted average shares used to compute basic net income per share	22,639,000	23,525,000	22,602,000
Effect of potentially dilutive securities:			
Unvested common shares subject to repurchase	—	14,000	154,000
Employee stock options	543,000	885,000	1,223,000
Employee stock awards	67,000	12,000	—
Weighted average shares used to compute diluted net income per share	23,249,000	24,436,000	23,979,000
Diluted net income per share	<u>\$ 1.03</u>	<u>\$ 0.88</u>	<u>\$ 0.58</u>

**Comprehensive Income**

In accordance with ASC Topic 220—Comprehensive Income, the Company reports by major components and as a single total, the change in its net assets during the period from non-owner sources. Comprehensive income consists of net income and accumulated other comprehensive income (loss), which includes certain changes in equity that are excluded from net income. Specifically, it includes cumulative foreign currency translation and the unrealized gain (loss) from investments.

Accumulated other comprehensive income of \$861,000 as of December 31, 2012 was comprised entirely of foreign currency translation gain. Accumulated other comprehensive loss of \$1,634,000 as of December 31, 2011 was comprised of \$1,637,000 of foreign currency translation losses and \$3,000 of unrealized gain on investments.

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

*Income Taxes*

The Company records income taxes using the asset and liability method of accounting for income taxes in accordance with ASC Topic 740—Income Taxes ("Topic 740"). Under this method, income tax expense or benefit is recognized for the amount of taxes payable or refundable for the current year and for deferred tax liabilities and assets for the future tax consequences of events that have been recognized in the Company's consolidated financial statements or tax returns. The Company accounts for any income tax contingencies in accordance with Topic 740. The measurement of current and deferred tax assets and liabilities is based on provisions of currently enacted tax laws. The effects of any future changes in tax laws or rates have not been considered.

For the preparation of the Company's consolidated financial statements included herein, the Company estimates its income taxes and tax contingencies in each of the tax jurisdictions in which they operate prior to the completion and filing of its tax returns. This process involves estimating actual current tax expense together with assessing temporary differences resulting from differing treatment of items, such as deferred revenue, for tax and accounting purposes. These differences result in net deferred tax assets and liabilities. The Company must then assess the likelihood that the deferred tax assets will be realizable, and to the extent they believe that realizability is not likely, the Company must establish a valuation allowance. In assessing the need for any additional valuation allowance, the Company considers all the evidence available to us, both positive and negative, including historical levels of income, legislative developments, expectations and risks associated with estimates of future taxable income, and ongoing prudent and feasible tax planning strategies.

As of December 31, 2012, it was considered "more likely than not" that the Company's deferred tax assets would be realized, with the exception of certain foreign tax credit carryforwards and certain foreign net operating losses which did not meet the "more likely than not" realizability threshold. A valuation allowance of approximately \$1.2 million as of December 31, 2012 will result in an income tax benefit if and when the Company concludes that it is more likely than not that the related deferred tax assets will be realized.

*Recently Issued Accounting Standards*

In May 2011, the Financial Accounting Standards Board ("FASB") issued Topic 820—Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS (Topic 820). Topic 820 changes the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements to ensure consistency between U.S. GAAP and IFRS. Topic 820 also expands the disclosures for fair value measurements that are estimated using significant unobservable (Level 3) inputs. Topic 820 is effective for interim and annual periods beginning after December 15, 2011 and is applied prospectively. The adoption of this standard did not change the consolidated financial statement footnote disclosures.

In June 2011, the FASB issued Topic 220—Presentation of Comprehensive Income (Topic 220). Topic 220 eliminates the option to report other comprehensive income and its components in the statement of changes in equity. Topic 220 requires that all nonowner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. The amended guidance, which must be applied retroactively, is effective for

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**2. Summary of Significant Accounting Policies (Continued)**

fiscal years, and interim periods within those years, beginning after December 15, 2011. The adoption of this standard changed the presentation of the Company's consolidated financial statements but had no effect on the reported amounts of comprehensive income.

In September 2011, the FASB issued Accounting Standards Update No. 2011-08, Intangibles-Goodwill and Other (Topic 350)—Testing Goodwill for Impairment. Topic 350 is intended to simplify goodwill impairment testing by adding a qualitative review step to assess whether the required quantitative impairment analysis that exists today is necessary. Topic 350 permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. Topic 350 is effective for interim and annual periods beginning after December 15, 2011 and earlier adoption is permitted. The Company performs its annual impairment testing of goodwill in the third quarter of each year. For the test conducted as of August 31, 2012, the Company elected to bypass the qualitative assessment and perform only the quantitative assessment. The adoption of this standard did not have an effect on the consolidated financial statements.

**3. Acquisitions***Acquisition of Table Maestro*

In August 2010, the Company acquired substantially all of the assets and certain liabilities of Table Maestro, LLC ("Table Maestro"), a provider of telephone reservation services for a purchase price of \$1,500,000 in cash and additional contingent performance-based cash payments which were valued at \$1,526,000 on the acquisition date. The accruals for the contingent performance-based cash payments were subsequently reversed by \$113,000, \$1,392,000 and \$21,000 in the twelve months ended December 31, 2010, 2011 and 2012, respectively, for lack of performance. The Company recorded \$2,756,000 of goodwill and \$289,000 of identifiable intangible assets in connection with the acquisition which was accounted for as a business combination. The Company has included the effects of the transaction within the results of operations prospectively from August 2010, the date of acquisition.

*Acquisition of toptable.com*

On October 1, 2010, the Company acquired toptable.co.uk Ltd. (now known as OpenTable International Limited) ("toptable"), a leading restaurant reservation site in the United Kingdom, for \$55,325,000 in cash. The purchase price was allocated to the acquired assets and liabilities based on their estimated fair values on the acquisition date. On October 1, 2010, the Company recorded \$38,650,000 of goodwill and \$20,583,000 of identifiable intangible assets in connection with the acquisition. Goodwill was calculated as the purchase premium after adjusting for the fair value of net assets acquired and represents the value expected from the synergies created from combining the toptable diner and restaurant reservation network with the Company's technology, as well as the economies of scale expected from combining the operations of toptable and the Company. Goodwill is not expected to be deductible for tax purposes. Intangible assets recorded as a result of the acquisition include trademarks of \$12,014,000 which has an indefinite life. Intangible assets also include customer relationships of \$7,405,000 and developed technology of \$1,164,000 which are being amortized over their estimated remaining lives of two to three years. The Company has included the effects of the

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 3. Acquisitions (Continued)

transaction within the results of operations prospectively from October 1, 2010, the date of the acquisition.

The Company's purchase price allocation for the net assets acquired was as follows:

	October 1, 2010
Cash and cash equivalents	\$ 516,000
Accounts receivable	2,196,000
Prepaid expenses and other current assets	119,000
Deferred tax asset	1,359,000
Property and equipment	370,000
Goodwill	38,650,000
Intangible assets	20,583,000
Other assets	50,000
<b>TOTAL ASSETS</b>	<b>\$ 63,843,000</b>
Accounts payable	\$ 576,000
Accrued expenses	1,329,000
Accrued compensation	544,000
Dining rewards payable	305,000
Deferred tax liability	5,764,000
<b>TOTAL LIABILITIES</b>	<b>\$ 8,518,000</b>
<b>NET ASSETS ACQUIRED</b>	<b>\$ 55,325,000</b>

*Unaudited Pro Forma Condensed Combined Financial Information*

The consolidated financial statements contained herein include the operating results of toptable from October 1, 2010, the date of the acquisition. From the date of acquisition through December 31, 2010, toptable contributed \$3,010,000 to revenues.

The unaudited pro forma financial information provided below, for the twelve months ended December 31, 2010, assumes the acquisition of toptable occurred on January 1, 2010 and includes the

## OPENTABLE, INC.

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 3. Acquisitions (Continued)

impact of amortizing certain purchase accounting adjustments, such as intangible assets and the pay down of outstanding third party debt, as of January 1, 2010.

	Twelve Months Ended December 31, 2010
Revenues	\$ 107,133,000
Income from operations	16,140,000
Net income	12,047,000
Net income per share	
Basic	\$ 0.53
Diluted	\$ 0.50

*Acquisition of Treat Technologies*

In August 2012, the Company acquired Treat Technologies, Inc. ("Treat"), a provider of the Treatful-branded online gift card solutions for restaurants, for a purchase price of approximately \$4,000,000 in cash. The Company recorded \$2,253,000 of goodwill and \$1,800,000 of identifiable intangible assets in connection with the acquisition which was accounted for as a business combination. The Company has included the effects of the transaction within the results of operations prospectively from August 3, 2012, the date of acquisition. Pro forma financial information for this business combination has not been presented, as the effects were not material to the Company's historical consolidated financial statements.

## 4. Short-Term Investments and Fair Value Measurements

Short-term investments are summarized as follows:

	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Market Value
<b>At December 31, 2012:</b>				
Certificates of deposit	\$ 733,000	\$ —	\$ —	\$ 733,000
Total	\$ 733,000	\$ —	\$ —	\$ 733,000

	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Market Value
<b>At December 31, 2011:</b>				
U.S. government and agency securities	\$ 10,538,000	\$ 3,000	\$ (1,000)	\$ 10,540,000
Certificates of deposit	2,871,000	—	—	2,871,000
Total	\$ 13,409,000	\$ 3,000	\$ (1,000)	\$ 13,411,000

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 4. Short-Term Investments and Fair Value Measurements (Continued)

As of December 31, 2012, certain investments with a total estimated fair value of \$487,000 had original maturity dates of greater than one year but less than five years. As of December 31, 2011, there were no investments that had maturity dates of greater than one year.

The following table represents the Company's fair value hierarchy for its financial assets:

	December 31, 2012			December 31, 2011		
	Aggregate Fair Value	Level 1	Level 2	Aggregate Fair Value	Level 1	Level 2
U.S. government and agency securities	\$ —	\$ —	\$ —	\$ 10,540,000	\$ —	\$ 10,540,000
Certificates of deposit	733,000	—	733,000	2,871,000	—	2,871,000
Total short-term investments	<u>\$ 733,000</u>	<u>\$ —</u>	<u>\$ 733,000</u>	<u>\$ 13,411,000</u>	<u>\$ —</u>	<u>\$ 13,411,000</u>

The Company chose not to elect the fair value option as prescribed by ASC Topic 825—Financial Instruments for its financial assets and liabilities that had not been previously carried at fair value. Therefore, financial assets and liabilities not carried at fair value, such as accounts payable, are still reported at their carrying values.

## 5. Property, Equipment and Software

Property, equipment and software consists of the following:

	December 31,	
	2012	2011
Restaurant hardware	\$ 21,237,000	\$ 19,085,000
Computer equipment	5,359,000	4,134,000
Software	3,289,000	2,257,000
Website and internal-use software development costs	11,693,000	7,719,000
Furniture and fixtures	474,000	405,000
Leasehold improvements	1,277,000	344,000
Total	<u>43,329,000</u>	<u>33,944,000</u>
Accumulated depreciation and amortization	(22,058,000)	(17,794,000)
Property, equipment and software, net	<u>\$ 21,271,000</u>	<u>\$ 16,150,000</u>

## OPENTABLE, INC.

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 6. Goodwill and Intangible Assets

The following table summarizes the Company's goodwill activity by geographical reporting unit:

	<u>North America</u>	<u>United Kingdom</u>	<u>Consolidated</u>
Balance as of December 31, 2010	\$ 4,561,000	\$ 37,786,000	\$ 42,347,000
Goodwill related to acquisitions	—	—	—
Foreign exchange rate adjustment	—	(35,000)	(35,000)
Balance as of December 31, 2011	4,561,000	37,751,000	42,312,000
Goodwill related to acquisitions	2,253,000	—	2,253,000
Foreign exchange rate adjustment	—	1,739,000	1,739,000
Total Goodwill as of December 31, 2012	<u>\$ 6,814,000</u>	<u>\$ 39,490,000</u>	<u>\$ 46,304,000</u>

A summary of intangible assets as of December 31, 2012 and 2011 is as follows:

	<u>December 31, 2012</u>			<u>December 31, 2011</u>		
	<u>Gross Carrying Value</u>	<u>Accumulated Amortization</u>	<u>Total</u>	<u>Gross Carrying Value</u>	<u>Accumulated Amortization</u>	<u>Total</u>
Trademarks—finite life	\$ 132,000	\$ 77,000	\$ 55,000	\$ 132,000	\$ 51,000	\$ 81,000
Trademarks— indefinite life	12,294,000	—	12,294,000	11,752,000	—	11,752,000
Customer relationship	8,924,000	7,164,000	1,760,000	8,091,000	4,042,000	4,049,000
Developed technology	2,867,000	1,750,000	1,117,000	1,514,000	993,000	521,000
Total intangible assets	<u>\$ 24,217,000</u>	<u>\$ 8,991,000</u>	<u>\$ 15,226,000</u>	<u>\$ 21,489,000</u>	<u>\$ 5,086,000</u>	<u>\$ 16,403,000</u>

Intangible assets with finite lives are amortized on a straight-line basis over their estimated useful lives which range from one to four years. Amortization of intangible assets was \$3,638,000, \$3,958,000 and \$1,207,000 for the years ended December 31, 2012, 2011 and 2010, respectively. Based on the current amount of intangibles subject to amortization, estimated future annual amortization expense is as follows: 2013: \$2,035,000; 2014: \$645,000; 2015: \$252,000. Intangible assets with indefinite lives are not amortized. Instead, they are reviewed for impairment annually, or whenever events or changes in circumstances indicate the carrying amount exceeds its fair value. The Company has defined its annual intangible impairment evaluation date as August 31, 2012 and determined that the carrying amount of the indefinite life intangible assets did not exceed the fair value. Additionally, there was no impairment of indefinite life intangible assets as of December 31, 2011 or December 31, 2012.

For the annual impairment analysis, goodwill is evaluated at the reporting unit level. The evaluation for impairment is performed by comparing the reporting unit's carrying amount of goodwill to the fair value of the reporting unit. If the carrying amount exceeds the reporting unit fair value, then the second step of the impairment test is performed to determine the amount of the impairment loss. The Company has defined its annual goodwill impairment evaluation date as August 31. The Company

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**6. Goodwill and Intangible Assets (Continued)**

performed its annual goodwill impairment evaluation as of August 31, 2012 and determined that the carrying amount of goodwill did not exceed the fair value of either reporting units. Additionally, there was no impairment of goodwill as of December 31, 2011 or 2012.

**7. Line of Credit**

The Company had a \$5,000,000 line of credit for working capital needs and no amounts were outstanding under this line of credit as of December 31, 2011. This line of credit agreement required the Company to comply with various financial and non-financial covenants and precluded the payment of dividends to stockholders without the permission of the lender. The Company was in compliance with all financial covenants at December 31, 2011. In December 2012, the Company cancelled this line of credit.

In January 2013, the Company entered into a credit agreement, which provides for a senior secured revolving credit facility of \$50,000,000 to fund working capital and other general corporate needs and is available through January 2016. This credit agreement requires the Company to comply with various financial and non-financial covenants and precludes the payment of dividends to stockholders without the permission of the lender, subject to limited exceptions.

**8. Commitments and Contingencies***Office Facility Leases*

The Company leases its office facilities under operating lease agreements that expire at various dates through 2020. The terms of the lease agreements provide for rental payments on a graduated basis. The Company recognizes rent expense on a straight-line basis over the lease period.

Rental expense, principally for leased office space under operating lease commitments, was \$1,952,000, \$1,877,000 and \$1,867,000 for the years ended December 31, 2012, 2011 and 2010, respectively.

*Aggregate Future Lease Commitments*

The Company's minimum payments under non-cancelable operating leases for office space having initial terms in excess of one year are as follows at December 31, 2012:

	<u>Operating Leases</u>
Year ending December 31:	
2013	\$ 1,744,000
2014	2,454,000
2015	2,246,000
2016	2,210,000
2017	2,223,000
Thereafter	5,370,000
Total minimum lease payments	<u>\$ 16,247,000</u>

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**8. Commitments and Contingencies (Continued)**

*Litigation*

The Company is subject to various legal proceedings and claims arising in the ordinary course of business. Although occasional adverse decisions or settlements may occur, management believes that the final disposition of such matters will not have a material adverse effect on the Company's business, financial position, results of operations or cash flows.

**9. Stockholders' Equity**

*Common Stock*

At December 31, 2012, there were 100,000,000 shares of common stock authorized, 24,419,627 shares issued and 22,898,107 shares outstanding. Holders of common stock are entitled to dividends if and when declared by the board of directors.

*Treasury Stock*

In November 2011, the Board of Directors authorized the Company to purchase up to \$50,000,000 of its outstanding common stock. For the twelve months ended December 31, 2011, the Company repurchased 1,089,300 shares of common stock for \$41.3 million. The Company completed the repurchase program on January 6, 2012, with the purchase of an additional 221,673 shares of common stock for \$8.7 million.

In August 2012, the Board of Directors authorized the Company to purchase up to an additional \$50,000,000 of its outstanding common stock. Under this repurchase program, 300 shares of common stock for \$12,000 were repurchased in the three months ended December 31, 2012. For the twelve months ended December 31, 2012, the Company repurchased 221,973 shares of common stock for \$8.7 million, under both repurchase programs.

*Common Stock Subject To Repurchase*

Historically, the Company allowed employees to exercise options prior to vesting. However, beginning in May 2008, options granted did not contain an early exercise provision. The Company has the right to repurchase at the original purchase price any unvested (but issued) common shares upon termination of service of an employee. The consideration received for an exercise of an option is considered to be a deposit of the exercise price and the related dollar amount is recorded as a liability. The shares and liability are reclassified into equity on a ratable basis as the award vests. The Company recorded a liability in accrued expenses of \$1,000 relating to 76 options that were exercised and were unvested at December 31, 2011. These shares which were subject to a repurchase right held by the Company were included in issued and outstanding shares as of December 31, 2011. As of December 31, 2012, there were no shares outstanding that were subject to repurchase and no outstanding options that could be exercised prior to vesting.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 9. Stockholders' Equity (Continued)

*Common Stock Reserved For Future Issuance*

At December 31, 2012, the Company has reserved the following shares of common stock for future issuances in connection with:

Stock options and restricted stock units outstanding	3,056,098
Shares available for future grants	802,839
Total	<u>3,858,937</u>

*Stock Based Compensation*

The Company applies the provisions of ASC Topic 718—Stock Compensation (Topic 718), which requires compensation costs related to share-based transactions, including employee stock options, to be recognized in the financial statements based on fair value.

Under Topic 718, the fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model.

The Company determined weighted average valuation assumptions as follows:

- Volatility—As the Company does not have an extensive trading history for its common stock, the expected stock price volatility for the Company's common stock was estimated by taking the median historic price volatility for industry peers based on daily price observations over a period equivalent to the expected term of the stock option grants. Industry peers consist of several public companies in the technology industry similar in size, stage of life cycle and financial leverage. The Company did not rely on implied volatilities of traded options in its industry peers' common stock because the volume of activity was relatively low.
- Expected term—The expected term was estimated using the simplified method allowed under Topic 718.
- Risk free rate—The risk free interest rate is based on the yields of U.S. Treasury securities with maturities similar to the expected term of the options for each option group.
- Forfeiture rate—The Company estimated the forfeiture rate based on its historical experience with forfeitures. The Company reviews the estimated forfeiture rates each period end and makes changes as factors affecting the forfeiture rate calculations and assumptions change.
- Dividend yield—The Company has never declared or paid any cash dividends and does not presently plan to pay cash dividends in the foreseeable future. Consequently, the Company used an expected dividend yield of zero.

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 9. Stockholders' Equity (Continued)

The following summarizes the assumptions relating to the Company's stock options for the years ended December 31, 2012, 2011 and 2010, as permitted under Topic 718:

	Year Ended December 31,		
	2012	2011	2010
Dividend yield	0%	0%	0%
Volatility	52% - 55%	53% - 55%	51% - 53%
Risk free interest rate	0.80% - 1.27%	0.79% - 2.67%	1.38% - 2.95%
Expected term, in years	5.27 - 6.55	5.00 - 6.08	5.50 - 6.56

Under Topic 718, the Company recorded net stock-based compensation expense related to stock options of \$15,981,000, \$8,303,000 and \$8,051,000 for the years ended December 31, 2012, 2011 and 2010, respectively. The Company capitalized \$835,000, \$366,000 and \$217,000 of stock-based compensation for the years ended December 31, 2012, 2011 and 2010, respectively, in association with website and software development costs (see Note 2).

Topic 718 requires the benefits of tax deductions in excess of recognized compensation expense to be reported as a financing cash flow, rather than as an operating cash flow. For the years ended December 31, 2012, 2011 and 2010, the Company recorded \$11,448,000, \$11,098,000 and \$1,271,000, respectively, of excess tax benefits from stock-based compensation.

*Stock Option Plans*

Under the 2009 Equity Incentive Award Plan (the "2009 Plan"), which the Company adopted in 2009, as of December 31, 2012, there were 802,839 shares of common stock reserved for the issuance of restricted stock, restricted stock awards, restricted stock units, stock appreciation rights, performance awards, deferred stock, and options (incentive stock options ("ISOs") or nonstatutory stock options ("NSOs")) to eligible participants. The 2009 Plan provides that on the first day of each fiscal year the number of shares available for issuance shall increase by an amount equal to the lesser of 744,063 shares or 3% of the outstanding shares of common stock on the last day of the immediately preceding fiscal year or a lesser amount as may be determined by the Board of Directors. Pursuant to this provision, in January 2013, the number of shares of common stock authorized for issuance under the 2009 Plan increased by an additional 686,943. To date, both ISOs and NSOs have been granted at a price per share not less than the fair market value at the date of grant. Options granted typically vest and become fully exercisable over periods ranging from one to four years. Options granted are generally exercisable for up to 10 years. The Company began granting restricted stock units ("RSUs") to its employees in November 2010. RSUs typically vest and become exercisable annually, based on a one to four year total vesting term.

In June 2011, the President and Chief Executive Officer ("CEO") resigned his position as CEO, and agreed to serve as the Executive Chairman of the Board of Directors ("Chairman"). Under the terms of the Company's amended and restated offer letter agreement with this executive in May 2011, a stock option for 214,000 shares, previously granted to this executive in January 2010, was modified, resulting in the cancellation of 171,200 unvested shares. The Company reversed \$1.4 million in stock-based compensation expense that had previously been incurred on these shares. The remaining 42,800 shares were revalued as of the modification date and were scheduled to vest ratably over 24 months

OPENTABLE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**9. Stockholders' Equity (Continued)**

from the modification date. In December 2011, this same executive resigned his position as Chairman, and agreed to serve only in the capacity as a member of the Board of Directors. Under the terms of a letter agreement with this executive in December 2011, the above stock option grant was modified again, resulting in the cancellation of 32,100 unvested shares and a reversal of \$1.2 million in stock-based compensation expense. The remaining 10,700 shares were revalued as of the second modification date, and \$0.2 million of stock-based compensation expense was recognized in the fourth quarter of 2011 in conjunction with these shares being fully vested.

Under the 1999 Stock Plan, which expired in May 2009, the Company granted 342,574 performance-based stock options to two executives. The first option was granted in November 2005 for 244,974 shares at an exercise price of \$1.50 per share. The second option was granted in July 2006 for 97,600 shares at an exercise price of \$1.50 per share. The grant-date fair value for the first option was \$380,000. The fair value is to be amortized over the period during which management has estimated the performance metrics will be achieved. For the first option, stock-based compensation expense in the amount of \$83,000 and \$43,000 was reversed in the years ended December 31, 2011 and 2010, respectively. As of December 31, 2010, there was no expectation of achievement of one of the performance metrics associated with the first option. As such, all prior expense associated with this one performance metric, in the amount of \$58,000, was reversed during the first quarter of 2010 and no additional expense related to this performance metric has been recognized during 2010 or 2011. In the fourth quarter of 2011, the Company concluded that there was no expectation that the balance of the performance metrics would be earned and all previously booked expense on the unvested shares, in the amount of (\$88,000), was reversed. Additionally, the executive to whom this option was granted ceased working for the Company during the fourth quarter of 2011. As such, all unvested shares were cancelled and returned to the plan. As of December 31, 2012, there are no outstanding shares pertaining to the first performance-based option grant. The grant-date fair value for the second option was \$255,000. The fair value is to be amortized over the period during which management has estimated the performance metrics will be achieved by. For the second option, there was no stock-based compensation expense recognized in the years ended December 31, 2012, 2011 and 2010, respectively. As of December 31, 2012, there was no expectation of achievement of the performance metrics associated with the second option.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 9. Stockholders' Equity (Continued)

A summary of the Company's stock option activity follows:

	Options Outstanding		Weighted Average Remaining Contractual Term (In Years)	Aggregate Intrinsic Value
	Number of Shares	Weighted Average Exercise Price		
Outstanding—January 1, 2010	2,287,661	\$ 8.84		
Granted (weighted average fair value of \$16.86)	1,055,948	32.70		
Exercised	(855,049)	5.96		
Canceled or expired	(55,199)	14.36		
Outstanding—December 31, 2010	2,433,361	\$ 20.09		
Granted (weighted average fair value of \$39.70)	170,932	53.54		
Exercised	(491,995)	11.06		
Canceled or expired	(417,164)	18.62		
Balance, December 31, 2011	1,695,134	\$ 26.44		
Granted (weighted average fair value of \$19.72)	1,511,546	39.44		
Exercised	(377,756)	18.57		
Canceled or expired	(29,248)	51.80		
Balance, December 31, 2012	2,799,676	\$ 34.26	7.73	\$ 44,875,000
Available for grant—December 31, 2012	802,839			
Options vested and expected to vest as of December 31, 2012	2,682,708	\$ 34.26	7.70	\$ 43,131,000
Options Exercisable as of December 31, 2012	1,189,899	\$ 31.62	6.57	\$ 24,167,000

The Company has computed the aggregate intrinsic value amounts disclosed in the above table based on the difference between the original exercise price of the options and the fair value of the Company's common stock of \$48.80 at December 31, 2012. The aggregate intrinsic value of awards exercised during the year ended December 31, 2012, 2011 and 2010 was \$11,421,000, \$13,813,000 and \$55,171,000, respectively.

## 9. Stockholders' Equity (Continued)

The options outstanding and exercisable as of December 31, 2012 have been segregated into ranges for additional disclosure as follows:

Exercise Price	Options Outstanding			Options Vested and Exercisable	
	Number Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$0.10 - \$23.38	492,730	4.40	\$ 10.70	392,555	\$ 13.00
\$24.97 - \$25.99	451,418	7.06	25.08	300,541	25.08
\$26.90 - \$38.95	323,685	9.18	37.48	52,747	35.44
\$39.01 - \$39.01	1,078,558	9.01	39.01	196,297	39.01
\$39.95 - \$80.70	449,347	7.93	55.14	243,811	62.08
\$82.56 - \$96.47	3,938	8.49	83.23	3,938	83.23
Total	<u>2,799,676</u>	7.73	\$ 34.26	<u>1,189,889</u>	\$ 31.62

As of December 31, 2012, total unrecognized compensation costs, adjusted for estimated forfeitures, related to non-vested stock options was \$17,241,000, which is expected to be recognized over the next 1.48 years.

**Restricted Stock Units**

The Company began granting Restricted Stock Units ("RSUs") to its employees in November 2010. The cost of RSUs is determined using the fair value of the Company's common stock on the date of grant. RSUs typically vest and become exercisable annually, based on a one to four year total vesting term. Stock-based compensation expense is amortized using a graded vesting attribution method over the requisite service period.

Vested	(32,467)		
Cancelled	(31,881)		
Outstanding—December 31, 2012	<u>256,422</u>	1.85	<u>\$ 12,513,000</u>

The Company recorded stock-based compensation expense related to RSUs of \$4,665,000, \$2,426,000 and \$140,000 for the years ended December 31, 2012, 2011 and 2010, respectively.

As of December 31, 2012, total unrecognized compensation costs, adjusted for estimated forfeitures, related to non-vested RSUs was \$6,575,000, which is expected to be recognized over the next 1.85 years.

## 10. Other Income, Net

Other income, net, consists of the following:

	<u>Year Ended December 31,</u>		
	<u>2012</u>	<u>2011</u>	<u>2010</u>
Interest income	\$ 71,000	\$ 87,000	\$ 216,000
Interest expense	—	—	(2,000)
Foreign exchange transaction losses, net	(23,000)	(28,000)	(14,000)
Other non-operating income	51,000	39,000	41,000
Total	<u>\$ 99,000</u>	<u>\$ 98,000</u>	<u>\$ 241,000</u>

## 11. Income Taxes

The Company accounts for income taxes under the asset and liability method provided by ASC Topic 740, Income Taxes. Under this method, deferred tax assets and liabilities are determined based

## OPENTABLE, INC.

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 11. Income Taxes (Continued)

The difference between the Company's effective rate and the federal statutory rate was as follows:

	Year Ended December 31,		
	2012	2011	2010
Tax at federal statutory rate	35.0%	35.0%	35.0%
State tax, net of federal benefit	2.6	2.8	5.3
Foreign rate differential	(1.3)	0.3	(0.9)
Stock-based compensation	1.0	3.5	3.1
Disqualifying dispositions	(0.4)	(1.8)	(4.1)
Research and development credits	(0.5)	(1.1)	(9.6)
California enterprise zone tax credit	(0.4)	(0.5)	(4.1)
Domestic manufacturing deduction	(2.8)	(3.5)	(2.9)
Agreement with tax authority on prior years' item	—	—	(3.6)
Change in statutory tax rates	(0.5)	(1.2)	—
Other	1.9	0.6	4.3
Effective tax rate	<u>34.6%</u>	<u>34.1%</u>	<u>22.5%</u>

As of December 31, 2012 and 2011 the Company had net deferred tax assets before valuation allowance of approximately \$22,812,000 and \$15,560,000, respectively. Realization of the deferred tax assets is dependent upon future taxable income, if any, the amount and timing of which are uncertain. Management evaluates the recoverability of deferred tax assets and the amount of the valuation allowance required. The Company's valuation allowance decreased by approximately \$1,566,000 and increased by approximately \$371,000 during the years ended December 31, 2012 and 2011, respectively.

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

## 11. Income Taxes (Continued)

The components of the Company's net deferred tax assets for federal and state income taxes at December 31 are as follows:

	2012	2011
Deferred tax assets:		
Net operating loss carryforwards	\$ 4,395,000	\$ 6,235,000
Deferred revenue	871,000	1,081,000
Dining rewards points	9,084,000	6,858,000
Accruals and reserves not currently deductible	13,365,000	7,097,000
Tax credits	760,000	704,000
Other	(3,000)	—
Total deferred tax assets	<u>28,472,000</u>	<u>21,975,000</u>
Deferred tax liabilities:		
Basis difference in fixed assets	(4,283,000)	(5,425,000)
State taxes	(1,378,000)	(963,000)
Other	—	(27,000)
Total deferred tax liabilities	<u>(5,661,000)</u>	<u>(6,415,000)</u>
Net deferred tax assets before valuation allowance	22,811,000	15,560,000
Valuation allowance	(1,205,000)	(2,771,000)
Net deferred tax asset	<u>\$ 21,606,000</u>	<u>\$ 12,789,000</u>

At December 31, 2012, the Company had federal, state and foreign net operating loss carryforwards of approximately \$1,643,000, \$12,113,000 and \$4,516,000, respectively. If not utilized, the federal net operating loss carryforwards will expire in 2030, the state net operating loss carryforwards will begin to expire in 2014 and there is no expiration date on the aforementioned foreign net operating losses. As a result of Topic 718, Stock Compensation, the table of deferred tax assets and liabilities shown above does not include certain deferred tax assets as of December 31, 2012 and 2011 that arose directly from tax deductions related to equity compensation in excess of compensation recognized for financial reporting. Utilization of the net operating loss carryforwards are subject to annual limitation due to the ownership change limitations provided by the Internal Revenue Code of 1986, as amended and similar state provisions.

As a result of the "American Taxpayer Relief Act of 2012" enacted on January 2, 2013, which extended the Federal research & development tax credit retroactively for 2012, the Company will recognize approximately \$255,000 of its 2012 Federal research and development tax credit in the first quarter of 2013.

As of December 31, 2012, the Company's California research and development credit carryforwards for income tax purposes were approximately \$3,595,000, of which \$800,000 will be credited directly to additional paid-in capital upon utilization. These carryforwards can be carried over indefinitely. In addition, the Company's California Enterprise Zone credit carryforwards for income tax purposes were approximately \$34,000 which if not utilized, will begin to expire in 2020.

## OPENTABLE, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010

**11. Income Taxes (Continued)**

As of December 31, 2012, it was considered more likely than not that the Company's deferred tax assets would be realized with the exception of certain United Kingdom net operating losses of approximately \$1,039,000 with indefinite life and \$167,000 foreign tax credit carryovers which begin to expire in 2018, as the Company cannot forecast sufficient future taxable income or foreign source income to realize these deferred tax assets. The valuation allowance of approximately \$1,205,000 as of December 31, 2012 will result in an income tax benefit if and when the Company concludes it is more likely than not that the related deferred tax assets will be realized.

It is the practice and the intention of the Company to indefinitely reinvest the earnings of its foreign subsidiaries in those operations. As of December 31, 2012, the excess of the amount for financial reporting over the tax basis of investment in these foreign subsidiaries is insignificant and the determination of the unrecognized deferred tax liability is not currently practical and the amount is not expected to be material.

A reconciliation of the beginning and ending amounts of unrecognized income tax benefits during the twelve month periods ending December 31, 2012, 2011 and 2010 is as follows:

	2012	2011	2010
Balance of unrecognized tax benefits at January 1	\$ 17,648,000	\$ 17,585,000	\$ 14,963,000
Additions for tax positions related to current year	913,000	548,000	424,000
Additions for tax positions related to prior year	80,000	—	2,864,000
Reductions for tax positions of prior years	(279,000)	(485,000)	(666,000)
Balance of unrecognized tax benefits at December 31	<u>\$ 18,362,000</u>	<u>\$ 17,648,000</u>	<u>\$ 17,585,000</u>

In the event that certain unrecognized tax benefits are recognized, the effective tax rate will be affected. Approximately \$18,362,000 and \$17,105,000 of unrecognized tax benefit would impact the effective tax rate at December 31, 2012 and 2011, respectively, if recognized. The Company's policy is to classify interest accrued or penalties related to unrecognized tax benefits as a component of income tax expense. The Company accrued approximately \$777,000 and \$200,000 of interest and penalties related to estimated obligations based upon the tax positions taken in its tax returns at December 31, 2012 and 2011, respectively. Due to the pending completion of a recent state income tax examination, the Company anticipates that it is reasonably possible that there will be a decrease to the Company's unrecognized tax benefit position up to \$747,000 within the next 12 months of the reporting date because of an expected settlement with the tax authorities. In addition, due to potential statute expirations, there may be a decrease to the Company's unrecognized tax benefit position up to \$1,088,000 within the next 12 months of the reporting date.

All tax years remain open to examination by major taxing jurisdictions to which the Company is subject. The Company files a federal and many state returns. The Company does not anticipate significant changes to its uncertain tax positions through the next fiscal year.

**12. Employee Benefit Plan**

In 1999, the Company adopted a defined contribution plan that is intended to qualify under section 401(k) of the Internal Revenue Code. The 401(k) plan provides retirement benefits for eligible

**OPENTABLE, INC.**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**YEARS ENDED DECEMBER 31, 2012, 2011 AND 2010**

**12. Employee Benefit Plan (Continued)**

employees. The 401(k) plan stipulates that eligible employees may elect to contribute to it upon date of hire. The Company began matching employee contributions under the terms of the 401(k) plan in 2007. Matching contributions totaled \$192,000, \$164,000 and \$130,000 for the years ended December 31, 2012, 2011 and 2010, respectively.

**13. Segment Information**

The Company operates in one industry—online reservations and guest management solutions. The Company has two reportable segments: North America and International, as defined by Topic 280—Segment Reporting. Reportable segments have been identified based on how management makes operating decisions, assesses performance and allocates resources. The chief executive officer acts as the chief operating decision maker on behalf of both segments. The Company does not allocate assets discretely by reportable segments, and reviews asset information on a global basis, not by segment.

## 15. Subsequent Events

In January 2013, the Company announced the discontinuation of the Table Maestro service line. The Company evaluated the goodwill and intangible assets in the North America geographical reporting unit and concluded that there was no impairment as a result of discontinuing this service line. Additionally, the Company concluded that the discontinuation of this service line did not constitute a

**15. Subsequent Events (Continued)**

"discontinued operation" for financial reporting purposes and pro forma financial information is not required as the effects are not material to the Company's financial statements.

In February 2013, the Company acquired all of the outstanding shares of capital stock of Foodspotting, Inc., a provider of an app for finding and sharing photos of food, for a purchase price of approximately \$10 million in cash.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

**ITEM 9A. CONTROLS AND PROCEDURES**

*Evaluation of Disclosure Controls and Procedures*

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2012. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of December 31, 2012, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

*Management's Annual Report on Internal Control Over Financial Reporting*

Our management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Management assessed our internal control over financial reporting as of December 31, 2012. Management based its assessment on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on our assessment, management has concluded that our internal control over financial reporting was effective as of December 31, 2012. The certifications of our principal executive officer and principal financial officer attached as Exhibits 31.1 and 31.2 to this report include, in paragraph 4 of such certifications, information concerning our disclosure controls and procedures and internal controls over financial reporting.

Deloitte & Touche LLP, an independent registered public accounting firm, has issued a report on our internal control over financial reporting, which is included below.

*Changes in Internal Control over Financial Reporting*

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the three months ended December 31, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

***Inherent Limitations on Effectiveness of Controls***

Our management, including our Chief Executive Officer and Chief Financial Officer, believes that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at the reasonable assurance level. However, our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of  
OpenTable, Inc.  
San Francisco, California

We have audited the internal control over financial reporting of OpenTable, Inc. and subsidiaries (collectively, the "Company") as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures, as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2012, of the Company and our report dated February 25, 2013, expressed an unqualified opinion on those financial statements.

**PART III**

**ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

We have adopted a Code of Business Conduct and Ethics that applies to all of our directors, officers and employees, including our principal executive officer and principal financial officer. The Code of Business Conduct and Ethics is posted on our website at <http://investors.opentable.com/governance.cfm>.

We intend to satisfy the disclosure requirement under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, a provision of this Code of Business Conduct and Ethics by posting such information on our website, at the address and location specified above and, to the extent required by the listing standards of The NASDAQ Stock Market, by filing a Current Report on Form 8-K with the SEC, disclosing such information.

The other information required by this item will be contained in our definitive proxy statement to be filed with the SEC in connection with our 2013 annual meeting of stockholders (the "Proxy Statement"), which is expected to be filed not later than 120 days after the end of our fiscal year ended December 31, 2012, and is incorporated in this report by reference.

**ITEM 11. EXECUTIVE COMPENSATION**

The information required by this item will be set forth in the Proxy Statement and is incorporated herein by reference.

**ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

The information required by this item will be set forth in the Proxy Statement and is incorporated herein by reference.

**ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE**

The information, if any, required by this item will be set forth in the Proxy Statement and is incorporated herein by reference.

**ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES**

The information required by this item will be set forth in the Proxy Statement and is incorporated herein by reference.

**PART IV**

**ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES**

(a)(1) Financial Statements

The following are included in Item 8:

- Report of Independent Registered Public Accounting Firm
- Consolidated Balance Sheets as of December 31, 2012 and 2011

SECOND AMENDMENT TO  
AMENDED AND RESTATED LOAN AND SECURITY AGREEMENT

This Second Amendment to Amended and Restated Loan and Security Agreement (the "Amendment") is entered into as of October 2, 2012, by and between COMERICA BANK ("Bank") and OPENTABLE, INC. ("Borrower").

RECITALS

Borrower and Bank are parties to that certain Amended and Restated Loan and Security Agreement dated as of July 30, 2011 (as amended from time to time, the "Agreement"). The parties desire to amend the Agreement in accordance with the terms of this Amendment.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

AGREEMENT

- I. **Incorporation by Reference.** The Recitals and the documents referred to therein are incorporated herein by this reference. Except as otherwise noted, the terms not defined herein shall have the meaning set forth in the Agreement.
- II. **Amendment to the Agreement.** Subject to the satisfaction of the conditions precedent as set forth in Article IV hereof, the Agreement is hereby amended as set forth below.
- A. The following defined term in Exhibit A to the Agreement is hereby amended and restated in its entirety to read as follows:
- "Letter of Credit Sublimit" means a sublimit for Letters of Credit under the Revolving Line not to exceed \$1,250,000, subject to the Maximum Sublimit Amount.
- III. **Legal Effect.**
- A. The Agreement is hereby amended wherever necessary to reflect the changes described above. Borrower agrees that it has no defenses against the obligations to pay any amounts under the Agreement.
- B. Borrower understands and agrees that in modifying the existing Obligations, Bank is relying upon Borrower's representations, warranties, and agreements, as set forth in the Agreement and the other Loan Documents. Except as expressly modified pursuant to this Amendment, the terms of the Agreement and the other Loan Documents remain unchanged, and in full force and effect. Bank's agreement to modifications to the existing Agreement pursuant to this Amendment in no way shall obligate Bank to make any future modifications to the Agreement. Nothing in this Amendment shall constitute a satisfaction of the Obligations. It is the intention of Bank and Borrower to retain as liable parties, all makers and endorsers of the Agreement and the other Loan Documents, unless the party is expressly released by Bank in writing. No maker, endorser, or guarantor will be released by virtue of this Amendment. The terms of this paragraph apply not only to this Amendment, but also to all subsequent loan modification requests.
- C. This Amendment may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one instrument. This is an integrated Amendment and supersedes all prior negotiations and agreements regarding the subject matter hereof. All modifications hereto must be in writing and signed by the parties.

IV. **Conditions Precedent.** Except as specifically set forth in this Amendment, all of the terms and conditions of the Agreement and the other Loan Documents remain in full force and effect. The effectiveness of this Amendment is conditioned upon receipt by Bank of:

- A. This Amendment, duly executed by Borrower;
- B. A legal fee from Borrower in the amount of \$250; and
- C. Such other documents, and completion of such other matters, as Bank may reasonably deem necessary or appropriate.

IN WITNESS WHEREOF, the undersigned have executed this Amendment as of the first date above written.

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER  
PURSUANT TO SECTION 302 OF  
THE SARBANES-OXLEY ACT OF 2002**

I, Matthew Roberts, certify that:

1. I have reviewed this Annual Report on Form 10-K of OpenTable, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
