

Creating a more **resourceful world.**

“The way we manage energy and water will define this century.”

Itron Summary of Consolidated Financial Data

in thousands, except per share

FISCAL YEAR	2013	2012	2011	2010	2009
Operations					
Revenues	\$1,948,728	\$2,178,178	\$2,434,124	\$2,259,271	\$1,687,447
Operating income (loss)	\$(135,181)	\$151,126	\$(459,183)	\$184,197	\$45,027
Net income (loss)	\$(146,809)	\$108,275	\$(510,157)	\$104,770	\$(2,249)
Diluted earnings (loss) per share	\$(3.74)	\$2.71	\$(12.56)	\$2.56	\$(0.06)
Non-GAAP operating income	\$117,874	\$206,058	\$257,140	\$253,248	\$143,600
Non-GAAP net income	\$75,136	\$144,580	\$175,951	\$159,453	\$82,469
Non-GAAP diluted earnings per share	\$1.90	\$3.62	\$4.29	\$3.89	\$2.12
Balance Sheet					
Total assets	\$1,882,511	\$2,089,441	\$2,064,282	\$2,745,797	\$2,854,621
Total debt	\$378,750	\$417,500	\$452,502	\$610,941	\$781,764
Total Itron, Inc. shareholders' equity	\$855,236	\$992,967	\$906,925	\$1,428,295	\$1,400,514

Non-GAAP results exclude the expenses related to amortization of intangible assets, restructurings, acquisitions, goodwill impairment, amortization of debt placement fees, amortization of convertible debt discount, and the non-cash net loss associated with debt extinguishment. On a pre-tax basis, the amounts totaled \$254,611 in 2013, \$56,490 in 2012, \$727,094 in 2011, \$84,435 in 2010, and \$126,243 in 2009. Management believes that non-GAAP results provide useful information related to the ongoing operations of our business and enhance the overall understanding of our current and future performance. A schedule reconciling GAAP to non-GAAP results is available on our website at www.itron.com.

Philip Mezey

President and Chief
Executive Officer

Dear Shareholders,

As I reflect on my first full year as Itron's CEO, I am pleased with the great strides we have taken to position Itron for long-term growth and profitability. I began the year building a leadership team with the experience, talent and passion for our industry to lead Itron well into the future. With the steps we took in 2013, I am confident we laid the foundation for a stronger, more focused company.

At the heart of what we do is the belief that the way we manage energy and water will define this century. The work we do every day is incredibly important as the global population grows, as aging infrastructure deteriorates and as demand for finite resources increases.

2013 Highlighted Achievements

At the beginning of last year, I outlined a series of key initiatives around quality, collaboration and innovation to drive better performance and deliver greater value to our customers and our shareholders. Our progress on these initiatives is encouraging.

We launched a company-wide program to reinforce a culture of quality at Itron. These efforts yielded real results, with special warranty costs at the company declining by 85 percent from a peak level in 2011.

We also made significant advancements in collaboration and innovation, including:

- » Expanding our collaboration with Microsoft to its CityNext initiative emphasizing technology solutions for smart cities.
- » Extending our partnership with Cisco to bring true IPv6 multiservice networks to customers around the world, launching OpenWay as our global smart grid platform.
- » Enhancing our distribution automation offering by providing seamless integration of multi-vendor, multi-service applications under our OpenWay IPv6 network.

We had a number of very successful customer projects that highlight the value of our technology across electricity, gas and water, such as:

- » CenterPoint Energy, in Texas, extended its project by installing advanced gas communications modules to 3 million meters in the company's service territory.
- » BC Hydro, in Vancouver, British Columbia, substantially completed its deployment of 2 million smart meters using Itron's OpenWay IPv6 network architecture.
- » ATCO Gas completed its gas automation project in 2013, which is one of the largest automation projects in Canada.
- » AzeriGas, in Azerbaijan, successfully completed the first phase of its advanced prepayment system deployment and has now moved to the territories outside of the capital region.
- » Irish Water, RWW in Germany, DJB Delhi in India, and the City of Baltimore, among others, selected Itron for their smart water automation projects, addressing critical needs such as leakage and non-revenue losses, improving customer service and billing accuracy.

In addition to the progress on last year's initiatives, we organized Itron into three separate business lines: electric, gas and water. This organization brings greater visibility to each business line's unique portfolio, strategy and financial targets.

In another move to strengthen our company, Itron's governance committee appointed two new independent directors to our board: Lynda Ziegler joined Itron's board of directors effective Feb. 21, 2013, and Michael Pulli was elected to Itron's board effective Jan. 1, 2014. Lynda and Mike bring tremendous experience to Itron, and I look forward to their leadership as we move forward with aggressive operational, financial and strategic goals.

Financial Performance

Last year, we continued on our course to improve our financial performance. Although financial results declined compared to 2012, revenues and non-GAAP operating income increased sequentially in each quarter throughout the year. Revenues of \$1.9 billion reflect the substantial completion of several large smart grid projects in North America. Contracting activity increased as we moved through 2013. Total contract bookings during the year of \$1.9 billion increased by nearly five percent compared to 2012, helping to replenish our backlog.

Gross margin of 31.5 percent was down from 32.8 percent in 2012. Restructured manufacturing operations and efficiency projects offset some, but not all, of the impact of lower volumes and revenues. We took additional actions during the year to trim our cost structure. In September, we announced restructuring projects to reduce our global workforce by nine percent and close or consolidate several facilities. We began to realize a benefit in 2013 from these projects and other expense controls with a net \$12 million decrease in our sales and marketing, product development, and general and administrative expenses.

As we implemented operational improvements and invested in new technologies to fuel increased future earnings generation, we also returned cash to shareholders through share repurchase. In 2013, we repurchased 645,000 shares of Itron stock for a total of \$27 million. We have repurchased \$100 million of Itron stock since 2011, representing approximately seven percent of our shares. In February 2014, Itron's board of directors authorized a new share repurchase plan for up to \$50 million over 12 months, through March 2015.

A Look Ahead

There is no question our industry is facing pressing challenges. We live in a world where the population is expected to reach 8 billion by 2025, placing enormous demands on our resources. Today, 34 percent of treated water globally is lost or unaccounted for, and 61 percent of energy is wasted by the U.S. economy each year. Increasingly, the traditional utility model is being

challenged and renewables and distributed generation are forcing utilities to rethink how they operate. Our success is linked to how effectively we help our customers address these challenges.

The fundamental drivers of our business have not changed. However, global market dynamics are changing and will continue to evolve as the pace of technology adoption in our industry accelerates. My commitment includes a continual drive for operating efficiencies across the organization, allowing us to lower our costs and deliver long-term, sustainable improvements in our profitability. It also includes rethinking how we approach certain markets. While our gas and water business lines are meeting our financial targets, it is clear that a different set of actions is required for some parts of our electric business that are facing increasing competitive pressures and new customer expectations. Addressing these areas of our business is a priority in 2014.

There is tremendous opportunity to apply Itron's products and services around the world. Our approach is to build on our leadership in metering, measurement and communications and extend our broad product portfolio with new solutions to deliver even greater value to more than 8,000 current customers. We are committed to collaborating with partners to move innovations forward faster, which will result in improved time to market and new possibilities with more customers. We have a strong balance sheet to utilize and a committed corporate strategy team dedicated to driving new growth opportunities.

In Closing

As a world-leading technology and services company dedicated to the resourceful use of energy and water, I am proud of the progress we made in 2013. I look forward to leading Itron as we increase our efforts to deliver long-term, sustainable value to our customers, communities and investors.

I want to thank all of our customers and employees for their commitment to this company. We have challenges ahead, and with collaboration and innovation we can address them. Together, we will create a more resourceful world.

Sincerely,

Philip Mézey

President and Chief Executive Officer

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission file number 000-22418

ITRON, INC.

(Exact name of registrant as specified in its charter)

**Washington
(State of Incorporation)**

**91-1011792
(I.R.S. Employer Identification Number)**

**2111 N Molter Road, Liberty Lake, Washington 99019
(509) 924-9900
(Address and telephone number of registrant's principal executive offices)**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common stock, no par value	NASDAQ Global Select Market
Preferred share purchase rights	NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 28, 2013 (the last business day of the registrant's most recently completed second fiscal quarter), the aggregate market value of the shares of common stock held by non-affiliates of the registrant (based on the closing price for the common stock on the NASDAQ Global Select Market) was \$1,648,816,774.

As of January 31, 2014 there were outstanding 39,161,615 shares of the registrant's common stock, no par value, which is the only class of common stock of the registrant.

DOCUMENTS INCORPORATED BY REFERENCE

The information called for by Part III is incorporated by reference to the definitive Proxy Statement for the Annual Meeting of Shareholders of the Company to be held on May 1, 2014.

In this Annual Report on Form 10-K, the terms “we,” “us,” “our,” “Itron,” and the “Company” refer to Itron, Inc.

Certain Forward-Looking Statements

This document contains forward-looking statements concerning our operations, financial performance, revenues, earnings growth, liquidity, and other items. This document reflects our current plans and expectations and is based on information currently available as of the date of this Annual Report on Form 10-K. When we use the words “expect,” “intend,” “anticipate,” “believe,” “plan,” “project,” “estimate,” “future,” “objective,” “may,” “will,” “will continue,” and similar expressions, they are intended to identify forward-looking statements. Forward-looking statements rely on a number of assumptions and estimates. These assumptions and estimates could be inaccurate and cause our actual results to vary materially from expected results. Risks and uncertainties include 1) the rate and timing of customer demand for our products, 2) rescheduling or cancellations of current customer orders and commitments, 3) changes in estimated liabilities for product warranties and/or litigation, 4) our dependence on customers' acceptance of new products and their performance, 5) competition, 6) changes in domestic and international laws and regulations, 7) changes in foreign currency exchange rates and interest rates, 8) international business risks, 9) our own and our customers' or suppliers' access to and cost of capital, 10) future business combinations, and 11) other factors. You should not solely rely on these forward-looking statements as they are only valid as of the date of this Annual Report on Form 10-K. We do not have any obligation to publicly update or revise any forward-looking statement in this document. For a more complete description of these and other risks, refer to Item 1A: “Risk Factors” included in this Annual Report on Form 10-K.

PART I

ITEM 1: BUSINESS

Available Information

Documents we provide to the Securities and Exchange Commission (SEC) are available free of charge under the Investors section of our website at www.itron.com as soon as practicable after they are filed with or furnished to the SEC. In addition, these documents are available at the SEC's website (<http://www.sec.gov>) and at the SEC's Headquarters at 100 F Street, NE, Washington, DC 20549, or by calling 1-800-SEC-0330.

General

Itron is a technology company and one of the leading global suppliers of a broad range of standard, advanced, and smart meters and meter communication systems, including networks and communication modules, software, and services. Our communications network platform supports robust and standards-based internet protocol, power-line-carrier (PLC), and cellular network protocols according to our customers' needs around the world. Our software provides mobile and networked meter reading, customer care, billing, distribution design and analysis, forecasting, and load research. Our wide range of services includes delivery solutions and managed services on-site or through private cloud solutions.

We were incorporated in 1977 with a focus on meter reading technology. In 2004, we entered the electricity meter manufacturing business with the acquisition of Schlumberger Electricity Metering. In 2007, we expanded our presence in global meter manufacturing and systems with the acquisition of Actaris Metering Systems SA (Actaris).

The following is a discussion of our major products, our markets, and our operating segments. Refer to Item 7: “Management's Discussion and Analysis of Financial Condition and Results of Operations” included in this Annual Report on Form 10-K for specific segment results.

Our Business

We offer solutions that enable electric and gas utilities to build smart grids to manage assets, secure revenue, lower operational costs, improve customer service, and enable demand response. Our solutions include standard meters and next-generation advanced and smart metering products, systems, and services, which ultimately empower and benefit consumers.

We supply comprehensive solutions to address the unique challenges facing the water industry, including increasing customer demand and resource scarcity. We offer a complete product portfolio, including standard meters and next-generation advanced and smart metering products, systems, and services, for applications in the residential and commercial industrial markets for water and heat.

We classify metering systems into three categories: standard metering, advanced metering systems and technology, and smart metering systems and technology. These categories are described in more detail below:

Standard Metering

A standard meter measures electricity, natural gas, water, or thermal energy by mechanical, electromechanical, or electronic means, with no built-in remote-reading communication capability. Standard meters require manual reading, which is typically performed by a utility representative or meter reading service provider. Worldwide, we produce standard residential, commercial and industrial (C&I), and transmission and distribution (T&D) electricity, natural gas, water, and heat meters.

Advanced Metering Systems and Technology

Advanced metering uses a one-way communication module embedded in or attached to the meter to collect and store meter data, which is transmitted to handheld computers, mobile units, and/or fixed networks. This allows utilities to collect meter data for billing systems and analyze the data for more efficient resource management and operations. Worldwide, we produce electricity, natural gas, and water advanced metering systems and technology. Communication technologies can vary by region and country and include telephone, RF (radio frequency), cellular, PLC, and Ethernet devices.

Smart Metering Systems and Technology

Smart meters have two-way communication capability to automatically and regularly collect and transmit meter data to support various applications beyond monthly billings. Our smart metering solutions have substantially more features and functions than our advanced metering systems and technology. Smart meters are capable of collecting and storing interval data, remotely connecting and disconnecting, sending detailed information, receiving commands, and may interface with other devices, such as in-home displays, smart thermostats and appliances, home area networks, and advanced control systems.

Bookings and Backlog of Orders

Bookings for a reported period represent customer contracts and purchase orders received during the period that have met certain conditions, such as regulatory and/or contractual approval. Total backlog represents committed but undelivered contracts and purchase orders at period-end. Twelve-month backlog represents the portion of total backlog that we estimate will be recognized as revenue over the next 12 months. Backlog is not a complete measure of our future revenues as we also receive significant book-and-ship orders. Bookings and backlog may fluctuate significantly due to the timing of large project awards. In addition, annual or multi-year contracts are subject to rescheduling and cancellation by customers due to the long-term nature of the contracts. Beginning total backlog, plus bookings, minus revenues, will not equal ending total backlog due to miscellaneous contract adjustments, foreign currency fluctuations, and other factors.

Year Ended	Annual Bookings	Total Backlog	12-Month Backlog
		(in millions)	
December 31, 2013	\$ 1,946	\$ 1,068	\$ 549
December 31, 2012	1,861	1,035	568
December 31, 2011	2,120	1,296	766

Information on bookings by our operating segments is as follows:

Year Ended	Total Bookings	Electricity	Gas	Water
		(in millions)		
December 31, 2013	\$ 1,946	\$ 786	\$ 552	\$ 608
December 31, 2012	1,861	797	560	504
December 31, 2011	2,120	956	654	510

Our Operating Segments

We operate under the Itron brand worldwide and manage and report under three operating segments, Electricity, Gas, and Water. In March 2013, we separated the management of our Energy operating segment into Electricity and Gas to allow each business line to develop its own go-to-market strategy, prioritize its marketing and product development requirements, and focus on its strategic investments. Our sales, marketing, and delivery functions are managed under the three business lines - Electricity, Gas, and Water. Our product development and manufacturing operations are now managed on a worldwide basis to promote a global perspective in our operations and processes and still maintain alignment with the business lines. The transition to the new organizational structure, including changes to operations and financial reporting systems, was completed in the fourth quarter of 2013. The segment discussions in Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) and our consolidated financial statements have been revised to reflect our new operating segments. Refer to Item 7: "Management's Discussion and Analysis of Financial Condition and Results of

Operations" and Item 8: "Financial Statements and Supplementary Data," both of which are included in this Annual Report on Form 10-K.

Our Water operating segment includes both our global water and heat solutions.

Sales and Distribution

We use a combination of direct and indirect sales channels in our operating segments. A direct sales force is utilized for the largest electric, natural gas, and water utilities, with which we have long-established relationships. For smaller utilities, we typically use an indirect sales force that consists of distributors, sales representatives, partners, and meter manufacturer representatives.

No single customer represented more than 10% of total revenues for the years ended December 31, 2013, 2012, and 2011. Our 10 largest customers in each of the years ended December 31, 2013, 2012, and 2011, accounted for approximately 28%, 27%, and 33% of total revenues, respectively.

Raw Materials

Our products require a wide variety of components and materials, which are subject to price and supply fluctuations. We enter into standard purchase orders in the ordinary course of business, which can vary in terms and can include purchase orders for specific quantities based on market prices, as well as open-ended agreements that provide for estimated quantities over an extended shipment period, typically up to one year at an established unit cost. Although we have multiple sources of supply for most of our material requirements, certain components and raw materials are supplied by sole-source vendors, and our ability to perform certain contracts depends on the availability of these materials. Refer to Item 1A: "Risk Factors", included in this Annual Report on Form 10-K, for further discussion related to supply risks.

Product Development

Our product development is focused on both improving existing technology and developing innovative new technology for electricity, natural gas, water, and heat meters, sensing and control devices, data collection software, communication technologies, data warehousing, and knowledge application solutions. We spent approximately \$176 million, \$179 million, and \$161 million on product development in 2013, 2012 and 2011, which represented 9%, 8%, and 7% of total revenues, respectively.

Workforce

As of December 31, 2013, we had approximately 8,200 people in our workforce, including permanent and temporary employees and contractors. We have not experienced significant work stoppages and consider our employee relations to be good.

Competition

We provide a broad portfolio of products, solutions, software, and services to electric, gas, and water utility customers globally and, consequently, operate within a large and complex competitive landscape. Some of our competitors have diversified product portfolios and operate in multiple geographic markets, while others focus on specific regional markets and/or certain types of products, including some low-cost suppliers based in China and India that have significant market share for standard meter sales in their respective home/regional markets. Some of our competitors are part of multinational conglomerates. Our primary competitors for each operating segment are discussed below. We believe that our competitive advantage is based on our in-depth knowledge of the utility industry, our capacity to innovate, our ability to address customer concerns by providing complete end-to-end integrated solutions (including metering, network communications, data collection systems, meter data management software, and other metering software applications), our established customer relationships, and our track record of delivering reliable, accurate, and long-lived products and services. Refer to Item 1A: "Risk Factors" included in this Annual Report on Form 10-K for a discussion of the competitive pressures we face.

Electricity

We are among the leading global suppliers of electricity metering products, including standard meters, communication and network technologies, and other advanced and smart metering systems and technologies. Within the electricity business line, our primary global competitors include Landis+Gyr (Toshiba) and Elster (Melrose PLC). On a regional basis, other major competitors in the electricity product market include Sensus (The Resolute Fund, L.P.) GE Digital Energy (General Electric Company), and Echelon. Each of these companies offers some form of advanced/smart meter technology as well as standard meters. In addition, we compete, on a regional basis, with companies that specialize in communication and network technologies that are used with third-party standard meters, including Aclara (ESCO Technologies), Trilliant Networks, and Silver Spring Networks.

Gas

We are among the leading global suppliers of gas metering products, including standard meters, communication and network technologies, and other advanced and smart metering systems and technologies. Our primary global competitor is Elster. On a regional basis, other major competitors in the gas product market include Sensus and Landis+Gyr. Each of these companies offer some form of advanced/smart meter technology as well as standard meters. In addition, we compete, on a regional basis, with companies that specialize in communication and network technologies that are used with third-party standard meters, including Aclara.

Water

We are one of the leading global suppliers of standard and advanced water meters and communication modules. Our primary global competitors include Elster, Sensus, and Diehl Metering (Diehl Stiftung & Co. KG). On a regional basis, other major competitors in the water product market include Neptune Technologies (Roper Industries) and Badger. Each of these companies offers some form of advanced meter technology as well as standard meters. In addition, we compete, on a regional basis, with companies that specialize in communication and network technologies that are used with third-party standard meters, including Aclara.

Strategic Alliances

We pursue strategic alliances with other companies in areas where collaboration can produce product advancement and acceleration of entry into new markets. The objectives and goals of a strategic alliance can include one or more of the following: technology exchange, product development, joint sales and marketing, or access to new geographic markets. Refer to Item 1A: “Risk Factors” included in this Annual Report on Form 10-K for a discussion of risks associated with strategic alliances.

Intellectual Property

Our patents and patent applications cover a range of technologies, which relate to standard metering, advanced metering systems and technology, smart metering systems and technology, meter data management software, and knowledge application solutions. We also rely on a combination of copyrights and trade secrets to protect our products and technologies.

Disputes over the ownership, registration, and enforcement of intellectual property rights arise in the ordinary course of our business. While we believe patents and trademarks are important to our operations and in the aggregate constitute valuable assets, no single patent or trademark, or group of patents or trademarks, is critical to the success of our business. We license some of our technology to other companies, some of which are our competitors.

Environmental Regulations

In the ordinary course of our business we use metals, solvents, and similar materials that are stored on-site. We believe we are in compliance with environmental laws, rules, and regulations applicable to the operation of our business.

MANAGEMENT

Set forth below are the names, ages, and titles of our executive officers as of February 25, 2014.

Name	Age	Position
Philip C. Mezey	54	President and Chief Executive Officer
Steven M. Helmbrecht	51	Executive Vice President and Chief Financial Officer
John W. Holleran	59	Executive Vice President and Chief Operating Officer
Michel C. Cadieux	56	Senior Vice President, Human Resources
Russell E. Vanos	57	Senior Vice President, Strategy and Business Development
Shannon M. Votava	53	Vice President, General Counsel and Corporate Secretary

Philip C. Mezey is President and Chief Executive Officer, and a member of our Board of Directors. Mr. Mezey was appointed to his current position and to the Board of Directors in January 2013. Mr. Mezey joined Itron in March 2003 as Managing Director of Software Development for Itron's Energy Management Solutions Group as part of Itron's acquisition of Silicon Energy Corp. Mr. Mezey was promoted to Group Vice President and Manager of Software Solutions in 2004. In 2005, Mr. Mezey became Sr. Vice President, Software Solutions, and in 2007 Mr. Mezey became Sr. Vice President and Chief Operating Officer, Itron North America. Most recently, Mr. Mezey served as President and Chief Operating Officer, Energy from March 2011 through December 2012.

Steven M. Helmbrecht is Executive Vice President and Chief Financial Officer. Mr. Helmbrecht joined Itron in 2002 as Vice President and General Manager, International, and was named Sr. Vice President and Chief Financial Officer in 2005. Previously, Mr. Helmbrecht was Chief Financial Officer of LineSoft Corporation, which was acquired by Itron in 2002.

John W. Holleran is Executive Vice President and Chief Operating Officer. Mr. Holleran has held this role since January 2013. Mr. Holleran joined Itron in January 2007 as Sr. Vice President, General Counsel, and Corporate Secretary. Beginning in January 2012, Mr. Holleran served as Itron's Sr. Vice President, Special Projects, and Corporate Secretary.

Michel C. Cadieux is Senior Vice President, Human Resources, effective February 17, 2014. Before joining Itron, Mr. Cadieux was Senior Vice President of Human Resources and Security at Freescale Semiconductor, Inc. (Freescale) from 2008 to 2012. Mr. Cadieux worked at Advanced Micro Devices from 2000 to 2008, where he was Senior Vice President of Human Resources and Chief Talent Officer.

Russell E. Vanos is Senior Vice President, Strategy and Business Development. Mr. Vanos has served in this role since January 2013. Mr. Vanos joined Itron in 1980 and since then has held various positions in sales, marketing, and operations. Most recently Mr. Vanos served as Vice President, Global Smart Grid Solutions and Business Development from November 2011 through December 2012. Prior to this role Mr. Vanos served as Vice President and General Manager, Sales and Marketing from January 2011 to November 2011 and as Vice President, Marketing from January 2007 through December 2010.

Shannon M. Votava is Vice President, General Counsel and Corporate Secretary. Ms. Votava joined Itron in May 2010 as Assistant General Counsel and was promoted to Vice President and General Counsel in January 2012, and she assumed the responsibilities of Corporate Secretary in January 2013. Before joining Itron, Ms. Votava was Associate General Counsel, Commercial at Cooper Industries plc from October 2008 to April 2010 and General Counsel at Honeywell Electronic Materials, Inc. from 2003 to October 2008.

ITEM 1A: RISK FACTORS

We are dependent on the utility industry, which has experienced volatility in capital spending.

We derive the majority of our revenues from sales of products and services to utilities. Purchases of our products may be deferred as a result of many factors, including economic downturns, slowdowns in new residential and commercial construction, customers' access to capital upon acceptable terms, the timing and availability of government subsidies or other incentives, utility specific financial circumstances, mergers and acquisitions, regulatory decisions, weather conditions, and fluctuating interest rates. We have experienced, and may in the future experience, variability in operating results on an annual and a quarterly basis as a result of these factors.

Utility industry sales cycles can be lengthy and unpredictable.

The utility industry is subject to substantial government regulation. Regulations have often influenced the frequency of meter replacements. Sales cycles for standalone meter products have typically been based on annual or biennial bid-based agreements. Utilities place purchase orders against these agreements as their inventories decline, which can create fluctuations in our sales volumes.

Sales cycles for advanced and smart metering systems are generally long and unpredictable due to several factors, including budgeting, purchasing, and regulatory approval processes that can take several years to complete. Our utility customers typically issue requests for quotes and proposals, establish evaluation processes, review different technical options with vendors, analyze performance and cost/benefit justifications, and perform a regulatory review, in addition to applying the normal budget approval process. Today, governments around the world are implementing new laws and regulations to promote increased energy efficiency, slow or reverse growth in the consumption of scarce resources, reduce carbon dioxide emissions, and protect the environment. Many of the legislative and regulatory initiatives encourage utilities to develop a smart grid infrastructure, and some of these initiatives provide for government subsidies, grants, or other incentives to utilities and other participants in their industry to promote transition to smart grid technologies.

Section 1252 of the U.S. Energy Policy Act of 2005 requires electric utilities to consider offering their customers time-based rates. The Act also directs these utilities and state utility commissions to study and evaluate methods for implementing demand response, to shift consumption away from peak hours, and to improve power generation.

The European Union has issued the EU Energy Package, which includes directives and regulations intended to strengthen consumer rights and protection in the EU energy market. The EU's 20-20-20 goals include a 20% increase in energy efficiency, a 20% reduction of carbon dioxide emissions compared with 1990 levels, and producing 20% of its energy from renewable sources by 2020. The package sets targets for EU Member States to ensure the implementation of smart metering systems and outlines deployment by 2022, with 80% of electric consumers equipped with smart metering systems by 2020.

While we believe these initiatives will provide opportunities for sales of our products, the pace at which these markets will grow is unknown due to the timing of legislation, regulatory approvals related to the deployment of new technology, capital budgets of utilities, and purchasing decisions by our customers. If government regulations regarding the smart grid and smart metering are delayed, revised to permit lower or different investment levels in metering infrastructure, or terminated altogether, this could have a material adverse effect on our results of operation, cash flow, and financial condition.

A significant portion of our revenue is generated with a limited number of customers.

Historically, our revenues have been concentrated with a limited number of customers, which change over time. Our largest single customer represented 4% of total revenues for the year ended December 31, 2013. We are often a party to large, multi-year contracts that are subject to cancellation or rescheduling by our customers due to many factors, such as extreme, unexpected weather conditions that cause our customers to redeploy resources, convenience, regulatory issues, or acts of terrorism. Cancellation or postponement of one or more of these significant contracts could have a material adverse effect on our financial and operating results. In addition, if a large customer contract is not replaced upon its expiration with new business of similar magnitude, our financial and operating results would be adversely affected.

As we enter into agreements related to the deployment of smart metering systems and technology, the value of certain contracts can be substantially larger than contracts we have had with our customers in the past. These deployments last several years and can exceed the length of prior deployment agreements. The terms and conditions of these smart metering system agreements

related to testing, contractual liabilities, warranties, performance, and indemnities can be substantially different than the terms and conditions associated with our previous contracts.

Our quarterly results may fluctuate substantially due to several additional factors.

We have experienced variability in quarterly results, including losses, and believe our quarterly results will continue to fluctuate as a result of many factors, including those risks and events included throughout this section. Additional factors that may cause the price of our common stock to decline include:

- a higher proportion of products sold with fewer features and functionality, resulting in lower revenues and gross margins;
- a shift in sales channel mix, which could impact the revenue received and commissions paid;
- a decrease in sales volumes, which could result in lower gross margins as driven by lower absorption of manufacturing costs
- a change in accounting standards or practices that may impact us to a greater degree than other companies due to our product mix, which would impact revenue recognition, or our borrowing structure;
- a change in existing taxation rules or practices due to our specific operating structure that may not be comparable to other companies; and
- a shortfall in sales without a proportional decrease in expenses.

We may face product-failure exposure.

Our products are complex and may contain defects or experience failures due to any number of issues in design, materials, deployment and/or use. If any of our products contain a defect, compatibility or interoperability issue or other error, we may have to devote significant time and resources to find and correct the issue. We provide product warranties for varying lengths of time and establish allowances in anticipation of warranty expenses. In addition, we record contingent liabilities for additional product-failure related costs. These warranty and related product-failure allowances may be inadequate due to product defects, unanticipated component failures, as well as higher than anticipated material, labor, and other costs we may incur to replace projected product failures. A product recall or a significant number of product returns could be expensive; damage our reputation and relationships with utilities, meter and communication vendors, and other third-party vendors; result in the loss of business to competitors; or result in litigation against us. We may incur additional warranty and related expenses in the future with respect to new or established products, which could materially and adversely affect our operations and financial position.

Our customer contracts may contain provisions that could cause us to incur penalties, be liable for damages, and/or incur unanticipated expenses with respect to the functionality, deployment, operation, and availability of our products and services.

In addition to the risk of unanticipated warranty or recall expenses, our customer contracts may contain provisions that could cause us to incur penalties, be liable for damages, including liquidated damages, or incur other expenses, if we experience difficulties with respect to the functionality, deployment, operation, and availability of our products and services. In the event of late deliveries, late or improper installations or operations, failure to meet product or performance specifications or other product defects, or interruptions or delays in our managed service offerings, our customer contracts may expose us to penalties, liquidated damages, and other liabilities. In the event we were to incur contractual penalties, such as liquidated damages or other related costs that exceed our expectations, our business, financial condition, and operating results could be materially and adversely affected. Further, we could be required to recognize a current-period expense related to a specific component of a customer contract at the time we determine the products and/or services to be delivered under that component would result in a loss due to expected revenues estimated to be less than expected costs. Depending on the amounts of the associated revenues (if any) and the costs, this charge could be material to our results of operations in the period it is recognized.

We depend on our ability to develop new competitive products.

Our future success will depend, in part, on our ability to continue to design and manufacture new competitive products and to enhance and sustain our existing products, keep pace with technological advances and changing customer requirements, gain international market acceptance, and manage other factors in the markets in which we sell our products. Product development will require continued investment in order to maintain our competitive position, and the periods in which we incur significant product development costs may drive variability in our quarterly results. We may not have the necessary capital, or access to capital at acceptable terms, to make these investments. We have made, and expect to continue to make, substantial investments in technology development. However, we may experience unforeseen problems in the development or performance of our technologies or products. In addition, we may not meet our product development schedules. New products often require certifications or regulatory approvals before the products can be used and we cannot be certain that our new products will be approved in a timely manner. Finally, we may not achieve market acceptance of our new products and services.

We are affected by the availability and regulation of radio spectrum and interference with the radio spectrum that we use.

A significant number of our products use radio spectrum, which are subject to regulation by the Federal Communications Commission (FCC) in the United States. The FCC may adopt changes to the rules for our licensed and unlicensed frequency bands that are incompatible with our business. In the past, the FCC has adopted changes to the requirements for equipment using radio spectrum, and it is possible that the FCC or the U.S. Congress will adopt additional changes.

Although radio licenses are generally required for radio stations, Part 15 of the FCC's rules permits certain low-power radio devices (Part 15 devices) to operate on an unlicensed basis. Part 15 devices are designed for use on frequencies used by others. These other users may include licensed users, which have priority over Part 15 users. Part 15 devices cannot cause harmful interference to licensed users and must be designed to accept interference from licensed radio devices. In the United States, our advanced and smart metering systems are typically Part 15 devices that transmit information to (and receive information from, if applicable) handheld, mobile, or fixed network systems pursuant to these rules.

The FCC proposed a rulemaking proceeding in which it is considering adopting "spectrum etiquette" requirements for unlicensed Part 15 devices operating in the 902-928 MHz band, which many of our advanced and smart metering systems utilize. The outcome of the proceeding may require us to make material changes to our equipment.

We depend upon sufficient radio spectrum to be allocated by the FCC for our intended uses. As to the licensed frequencies, there is some risk that there may be insufficient available frequencies in some markets to sustain our planned operations. The unlicensed frequencies are available for a wide variety of uses and may not be entitled to protection from interference by other users who operate in accordance with FCC rules. The unlicensed frequencies are also often the subject of proposals to the FCC requesting a change in the rules under which such frequencies may be used. If the unlicensed frequencies become crowded to unacceptable levels, restrictive, or subject to changed rules governing their use, our business could be materially adversely affected.

We have committed, and will continue to commit, significant resources to the development of products that use particular radio frequencies. Action by the FCC could require modifications to our products. The inability to modify our products to meet such requirements, the possible delays in completing such modifications, and the cost of such modifications all could have a material adverse effect on our future business, financial condition, and results of operations.

Outside of the United States, certain of our products require the use of RF and are subject to regulations in those jurisdictions where we have deployed such equipment. In some jurisdictions, radio station licensees are generally required to operate a radio transmitter and such licenses may be granted for a fixed term and must be periodically renewed. In other jurisdictions, the rules permit certain low power devices to operate on an unlicensed basis. Our advanced and smart metering systems typically transmit to (and receive information from, if applicable) handheld, mobile, or fixed network reading devices in unlicensed bands pursuant to rules regulating such use. Generally, we use the unlicensed Industrial, Scientific, and Medical (ISM) bands with the various reading devices in our solutions. In Europe, we generally use the 433 MHz and 868 MHz bands. In the rest of the world, we primarily use the 433 MHz and 2.4000-2.4835 GHz bands, as well as other local unlicensed bands. To the extent we introduce new products designed for use in the United States or another country into a new market, such products may require significant modification or redesign in order to meet frequency requirements and other regulatory specifications. In some countries, limitations on frequency availability or the cost of making necessary modifications may preclude us from selling our products in those countries. In addition, new consumer products may create interference with the performance of our products, which could lead to claims against us.

We are facing increasing competition.

We face competitive pressures from a variety of companies in each of the markets we serve. Some of our present and potential future competitors have, or may have, substantially greater financial, marketing, technical, or manufacturing resources and, in some cases, have greater name recognition, customer relationships, and experience. Some competitors may enter markets we serve and sell products at lower prices in order to gain or grow market share. Our competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements. They may also be able to devote greater resources to the development, promotion, and sale of their products and services than we can. Some competitors have made, and others may make, strategic acquisitions or establish cooperative relationships among themselves or with third parties that enhance their ability to address the needs of our prospective customers. It is possible that new competitors or alliances among current and new competitors may emerge and rapidly gain significant market share. Other companies may also drive technological innovation and develop products that are equal in quality and performance or superior to our products, which could put pressure on our market position, reduce our overall sales, and require us to invest additional funds in new technology development. In addition, there is a risk that low-cost providers will expand their presence in our markets, improve their quality, or form alliances or cooperative relationships

with our competitors, thereby contributing to future price erosion. Some of our products and services may become commoditized, and we may have to adjust the prices of some of our products to stay competitive. Further, some utilities may purchase meters separately from the communication devices. The specifications for the meters would require interchangeability, which could lead to further commoditization of the meter, driving prices lower and reducing margins. Should we fail to compete successfully with current or future competitors, we could experience material adverse effects on our business, financial condition, results of operations, and cash flows.

Our acquisitions of and investments in third parties have risks.

We may complete additional acquisitions or make investments in the future, both within and outside of the United States. In order to finance future acquisitions, we may need to raise additional funds through public or private financings, and there are no assurances that such financing would be available at acceptable terms. Acquisitions and investments involve numerous risks such as the diversion of senior management's attention; unsuccessful integration of the acquired entity's personnel, operations, technologies, and products; incurrence of significant expenses to meet an acquiree's customer contractual commitments; lack of market acceptance of new services and technologies; or difficulties in operating businesses in international legal jurisdictions. Failure to properly or adequately address these issues could result in the diversion of management's attention and resources and materially and adversely impact our ability to manage our business. In addition, acquisitions and investments in third parties may involve the assumption of obligations, significant write-offs, or other charges associated with the acquisition. Impairment of an investment, goodwill, or an intangible asset may result if these risks were to materialize. For investments in entities that are not wholly owned by Itron, such as joint ventures, a loss of control as defined by U.S. generally accepted accounting principles (GAAP) could result in a significant change in accounting treatment and a change in the carrying value of the entity. There can be no assurances that an acquired business will perform as expected, accomplish our strategic objectives, or generate significant revenues, profits, or cash flows.

We may face adverse publicity, consumer or political opposition, or liability associated with our products.

The safety and security of the power grid, the accuracy and protection of the data collected by meters and transmitted via the smart grid, concerns about the safety and perceived health risks of using radio frequency communications, and privacy concerns of monitoring home appliance energy usage have been the focus of recent adverse publicity. Negative publicity and consumer opposition may cause utilities or their regulators to delay or modify planned smart grid initiatives. Smart grid projects may be, or may be perceived as, unsuccessful.

We may be subject to claims that there are adverse health effects from the radio frequencies utilized in connection with our products. If these claims prevail, our customers could suspend implementation or purchase substitute products, which could cause a loss of sales.

Changes in tax laws, valuation allowances, and unanticipated tax liabilities could adversely affect our effective income tax rate and profitability.

We are subject to income tax in the United States and numerous foreign jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves may be established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances. The provision for income taxes includes the impact of reserve positions and changes to reserves that are considered appropriate, as well as valuation allowances when we determine it is more likely than not that a deferred tax asset cannot be realized. In addition, future changes in tax laws in the jurisdictions in which we operate could have a material impact on our effective income tax rate and profitability. We regularly assess all of these matters to determine the adequacy of our tax provision, which is subject to significant judgment.

Disruption and turmoil in global credit and financial markets, which may be exacerbated by the inability of certain countries to continue to service their sovereign debt obligations, and the possible negative implications of such events for the global economy, may negatively impact our business, liquidity, operating results, and financial condition.

The current economic conditions, including volatility in the availability of credit and foreign exchange rates and extended economic slowdowns, have contributed to the instability in some global credit and financial markets. Additionally, at-risk financial institutions in certain countries may, without forewarning, seize a portion of depositors' account balances. The seized funds would be used to recapitalize the at-risk financial institution and would no longer be available for the depositors' use. If such seizure were to occur at financial institutions where we have funds on deposit, it could have a significant impact on our overall liquidity. While the

ultimate outcome of these events cannot be predicted, it is possible that such events may have a negative impact on the global economy and our business, liquidity, operating results, and financial condition.

We are subject to international business uncertainties, obstacles to the repatriation of earnings, and foreign currency fluctuations.

A substantial portion of our revenues is derived from operations conducted outside the United States. International sales and operations may be subjected to risks such as the imposition of government controls, government expropriation of facilities, lack of a well-established system of laws and enforcement of those laws, access to a legal system free of undue influence or corruption, political instability, terrorist activities, restrictions on the import or export of critical technology, currency exchange rate fluctuations, and adverse tax burdens. Lack of availability of qualified third-party financing, generally longer receivable collection periods than those commonly practiced in the United States, trade restrictions, changes in tariffs, labor disruptions, difficulties in staffing and managing international operations, difficulties in imposing and enforcing operational and financial controls at international locations, potential insolvency of international distributors, preference for local vendors, burdens of complying with different permitting standards and a wide variety of foreign laws, and obstacles to the repatriation of earnings and cash all present additional risk to our international operations. Fluctuations in the value of international currencies may impact our operating results due to the translation to the U.S. dollar as well as our ability to compete in international markets. International expansion and market acceptance depend on our ability to modify our technology to take into account such factors as the applicable regulatory and business environment, labor costs, and other economic conditions. In addition, the laws of certain countries do not protect our products or technologies in the same manner as the laws of the United States. There can be no assurance that these factors will not have a material adverse effect on our future international sales and, consequently, on our business, financial condition, and results of operations.

We depend on certain key vendors and components.

Certain of our products, subassemblies, and system components are procured from limited sources. Our reliance on such limited sources involves certain risks, including the possibility of shortages and reduced control over delivery schedules, quality, costs, and our vendors' access to capital upon acceptable terms. Any adverse change in the supply, or price, of these components could adversely affect our business, financial condition, and results of operations. In addition, we depend on a small number of contract manufacturing vendors for a large portion of our low-volume manufacturing business and all of our repair services for our domestic handheld meter reading units. Should any of these vendors become unable to perform up to their responsibilities, our operations could be materially disrupted.

Business interruptions could adversely affect our business.

Our worldwide operations could be subject to hurricanes, tornadoes, earthquakes, floods, fires, extreme weather conditions, medical epidemics or pandemics, or other natural or man-made disasters or business interruptions. The occurrence of any of these business disruptions could seriously harm our business, financial condition, and results of operations.

Our key manufacturing facilities are concentrated and in the event of a significant interruption in production at any of our manufacturing facilities, considerable expense, time, and effort could be required to establish alternative production lines to meet contractual obligations, which would have a material adverse effect on our business, financial condition, and results of operations.

Asset impairment could result in significant changes that would adversely impact our future operating results.

We have significant intangible assets, long-lived assets, goodwill, and deferred tax assets that are susceptible to valuation adjustments as a result of changes in various factors or conditions.

We assess impairment of amortizable intangible and long-lived assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors that could trigger an impairment of such assets include the following:

- underperformance relative to projected future operating results;
- changes in the manner or use of the acquired assets or the strategy for our overall business;
- negative industry or economic trends;
- decline in our stock price for a sustained period or decline in our market capitalization below net book value; and
- changes in our organization or management reporting structure, which could result in additional reporting units, requiring greater aggregation or disaggregation in our analysis by reporting unit and potentially alternative methods/assumptions of estimating fair values.

We assess the potential impairment of goodwill each year as of October 1. We also assess the potential impairment of goodwill whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Adverse changes in economic conditions or our operations could affect the assumptions we use to calculate the fair value, which in turn could result in an impairment charge in future periods that would impact our results of operations and financial position in that period.

The realization of our deferred tax assets is supported in part by projections of future taxable income. We record valuation allowances to reduce deferred tax assets to the extent we believe it is more likely than not that a portion of such assets will not be realized. In making such determinations, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies, and our ability to carry back losses to prior years. We are required to make assumptions and judgments about potential outcomes that lie outside management's control. Our most sensitive and critical factors are the projection, source, and character of future taxable income. Realization is not assured, and the amount of deferred tax assets considered realizable could be reduced in the near term if estimates of future taxable income during the carryforward periods are reduced or current tax planning strategies are not implemented.

We may face losses associated with alleged unauthorized use of third party intellectual property.

We may be subject to claims or inquiries regarding alleged unauthorized use of a third party's intellectual property. An adverse outcome in any intellectual property litigation or negotiation could subject us to significant liabilities to third parties, require us to license technology or other intellectual property rights from others, require us to comply with injunctions to cease marketing or the use of certain products or brands, or require us to redesign, re-engineer, or rebrand certain products or packaging, any of which could affect our business, financial condition, and results of operations. If we are required to seek licenses under patents or other intellectual property rights of others, we may not be able to acquire these licenses at acceptable terms, if at all. In addition, the cost of responding to an intellectual property infringement claim, in terms of legal fees, expenses, and the diversion of management resources, whether or not the claim is valid, could have a material adverse effect on our business, financial condition, and results of operations.

If our products infringe the intellectual property rights of others, we may be required to indemnify our customers for any damages they suffer. We generally indemnify our customers with respect to infringement by our products of the proprietary rights of third parties. Third parties may assert infringement claims against our customers. These claims may require us to initiate or defend protracted and costly litigation on behalf of our customers, regardless of the merits of these claims. If any of these claims succeed, we may be forced to pay damages on behalf of our customers or may be required to obtain licenses for the products they use. If we cannot obtain all necessary licenses on commercially reasonable terms, our customers may be forced to stop using our products.

We may be unable to adequately protect our intellectual property.

While we believe that our patents and other intellectual property have significant value, it is uncertain that this intellectual property or any intellectual property acquired or developed by us in the future will provide meaningful competitive advantages. There can be no assurance that our patents or pending applications will not be challenged, invalidated, or circumvented by competitors or that rights granted thereunder will provide meaningful proprietary protection. Moreover, competitors may infringe our patents or successfully avoid them through design innovation. To combat infringement or unauthorized use of our intellectual property, we may need to commence litigation, which can be expensive and time-consuming. In addition, in an infringement proceeding a court may decide that a patent or other intellectual property right of ours is not valid or is unenforceable, or may refuse to stop the other party from using the technology or other intellectual property right at issue on the grounds that it is non-infringing or the legal requirements for an injunction have not been met. Policing unauthorized use of our intellectual property is difficult and expensive, and we cannot provide assurance that we will be able to prevent misappropriation of our proprietary rights, particularly in countries that do not protect such rights in the same manner as in the United States.

We are subject to a variety of litigation that could adversely affect our results of operations and financial condition.

From time to time, we are involved in litigation that arises from our business. Litigation may, for example, relate to alleged infringements of intellectual property rights of others. Non-practicing entities may also make infringement claims in order to reach a settlement with us. In addition, these entities may bring claims against our customers, which, in some instances, could result in an indemnification of the customer. Litigation may also relate to, among other things, product failure or product liability claims, contractual disputes, employment matters, or securities litigation. Litigation can be expensive to defend and can divert the attention of management and other personnel for long periods of time, regardless of the ultimate outcome. We may be required to pay damage awards or settlements or become subject to equitable remedies that could adversely affect our financial condition and results of operations. While we currently maintain insurance coverage, such insurance may not provide adequate coverage against potential claims.

We have pension benefit obligations, which could have a material impact on our earnings, liabilities, and shareholders' equity and could have significant adverse impacts in future periods.

We sponsor both funded and unfunded defined benefit pension plans for our international employees, primarily in Germany, France, Italy, Indonesia, Brazil, and Spain. Our general funding policy for these qualified pension plans is to contribute amounts sufficient to satisfy regulatory funding standards of the respective countries for each plan.

The determination of pension plan expense, benefit obligation, and future contributions depends heavily on market factors such as the discount rate and the actual return on plan assets. We estimate pension plan expense, benefit obligation, and future contributions to these plans using assumptions with respect to these and other items. Changes to those assumptions could have a significant effect on future contributions as well as on our annual pension costs and/or result in a significant change to Shareholders' equity.

A number of key personnel are critical to the success of our business.

Our success depends in large part on the efforts of our highly qualified technical and management personnel and highly skilled individuals in all disciplines. The loss of one or more of these employees and the inability to attract and retain qualified replacements could have a material adverse effect on our business.

If we are unable to protect our information technology infrastructure and network against data corruption, cyber-based attacks or network security breaches, we could be exposed to customer liability and reputational risk.

In the course of our operations, we rely on interconnected technology systems for the operation of our products, managed services on behalf of our customers, accounting and other administrative processes, and compliance with various regulations. There are various risks associated with technology systems such as hardware or software failure, communications failure, data distortion or destruction, unauthorized access to data, misuse of proprietary or confidential data, unauthorized control through electronic means, programming mistakes, and other deliberate or inadvertent human errors. In particular, cyber attacks, terrorism, or other malicious acts could damage, destroy, or disrupt these systems. Any failure of technology systems could result in a loss of revenues, an increase in operating expenses, and costs to repair or replace damaged assets. Any of the above could also result in the loss or release of confidential customer information or other proprietary data that could adversely affect our reputation and result in costly litigation. As these potential cyber attacks become more common and sophisticated, we could be required to incur costs to strengthen our systems and respond to emerging concerns.

We may not realize the expected benefits from strategic alliances.

We have several strategic alliances with large and complex organizations and other companies with which we work to offer complementary products and services. There can be no assurance we will realize the expected benefits from these strategic alliances. If successful, these relationships may be mutually beneficial and result in shared growth. However, alliances carry an element of risk because, in most cases, we must both compete and collaborate with the same company from one market to the next. Should our strategic partnerships fail to perform, we could experience delays in product development or experience other operational difficulties.

We rely on information technology systems.

Our industry requires the continued operation of sophisticated information technology systems and network infrastructures, which may be subject to disruptions arising from events that are beyond our control. We are dependent on information technology systems, including, but not limited to, networks, applications, and outsourced services. We continually enhance and implement new systems and processes throughout our global operations.

We offer managed services and software utilizing several data center facilities located worldwide. Any damage to, or failure of, these systems could result in interruptions in the services we provide to our utility customers. As we continue to add capacity to our existing and future data centers, we may move or transfer data. Despite precautions taken during this process, any delayed or unsuccessful data transfers may impair the delivery of our services to our utility customers. We also sell vending and pre-payment systems with security features that, if compromised, may lead to claims against us.

We are completing a phased upgrade of our primary enterprise resource planning (ERP) systems to allow for greater depth and breadth of functionality worldwide. System conversions are expensive and time consuming undertakings that impact all areas of the Company. While successful implementations of each phase will provide many benefits to us, an unsuccessful or delayed implementation of any particular phase may cost us significant time and resources.

The failure of these systems to operate effectively, problems with transitioning to upgraded or replacement systems, or a breach in security of these systems due to computer viruses, hacking, acts of terrorism, and other causes could materially and adversely affect our business, financial condition, and results of operations by harming our ability to accurately forecast sales demand, manage our supply chain and production facilities, achieve accuracy in the conversion of electronic data and records, and report financial and management information on a timely and accurate basis. In addition, due to the systemic internal control features within ERP systems, we may experience difficulties that could affect our internal control over financial reporting.

Our credit facility limits our ability and the ability of many of our subsidiaries to take certain actions.

Our credit facility places restrictions on our ability, and the ability of many of our subsidiaries to, among other things:

- incur more debt;
- make certain investments;
- enter into transactions with affiliates;
- merge or consolidate;
- pay dividends, make distributions, and repurchase capital stock;
- create liens;
- enter into sale lease-back transactions;
- transfer or sell assets.

Our credit facility contains other customary covenants, including the requirement to meet specified financial ratios. Our ability to borrow under our credit facility will depend on the satisfaction of these covenants. Events beyond our control can affect our ability to meet those covenants. Our failure to comply with obligations under our borrowing arrangements may result in declaration of an event of default. An event of default, if not cured or waived, may permit acceleration of required payments against such indebtedness. We cannot be certain we will be able to remedy any such defaults. If our required payments are accelerated, we cannot be certain that we will have sufficient funds available to pay the indebtedness or that we will have the ability to raise sufficient capital to replace the indebtedness on terms favorable to us or at all. In addition, in the case of an event of default under our secured indebtedness such as our credit facility, the lenders may be permitted to foreclose on our assets securing that indebtedness.

Our credit facility is sensitive to interest rate fluctuations that could impact our financial position and results of operations.

Our ability to service our indebtedness is dependent on our ability to generate cash, which is influenced by many factors beyond our control.

Our ability to make payments on or refinance our indebtedness, fund planned capital expenditures, and continue research and development will depend on our ability to generate cash in the future. This is dependent on the degree to which we succeed in executing our business plans, which is influenced, in part, by general economic, financial, competitive, legislative, regulatory, counterparty, and other risks that are beyond our control. We may need to refinance all or a portion of our indebtedness on or before maturity. We cannot provide assurance that we will be able to refinance any of our indebtedness on commercially reasonable terms or at all.

We are exposed to counterparty default risks with our financial institutions and insurance providers.

If one or more of the depository institutions in which we maintain significant cash balances were to fail, our ability to access these funds might be temporarily or permanently limited, and we could face material liquidity problems and financial losses.

The lenders of our credit facility consist of several participating financial institutions. Our revolving line of credit allows us to provide letters of credit in support of our obligations for customer contracts and provides additional liquidity. If our lenders are not able to honor their line of credit commitments due to the loss of a participating financial institution or other circumstance, we would need to seek alternative financing, which may not be under acceptable terms, and therefore could adversely impact our ability to successfully bid on future sales contracts and adversely impact our liquidity and ability to fund some of our internal initiatives or future acquisitions.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results, prevent fraud, or maintain investor confidence.

Effective internal controls are necessary for us to provide reliable and accurate financial reports and effectively prevent fraud. We have devoted significant resources and time to comply with the internal control over financial reporting requirements of the Sarbanes-Oxley Act. In addition, Section 404 under the Sarbanes-Oxley Act requires that our auditors attest to the design and operating effectiveness of our controls over financial reporting. Our compliance with the annual internal control report requirement for each fiscal year will depend on the effectiveness of our financial reporting, data systems, and controls across our operating subsidiaries. Furthermore, an important part of our growth strategy has been, and will likely continue to be, the acquisition of complementary businesses, and we expect these systems and controls to become increasingly complex to the extent that we integrate acquisitions and our business grows. Likewise, the complexity of our transactions, systems, and controls may become more difficult to manage. We cannot be certain that these measures will ensure that we design, implement, and maintain adequate controls over our financial processes and reporting in the future, especially for acquisition targets that may not have been required to be in compliance with Section 404 of the Sarbanes-Oxley Act at the date of acquisition. Any failure to implement required new or improved controls, difficulties encountered in their implementation or operation, or difficulties in the assimilation of acquired businesses into our control system could harm our operating results or cause it to fail to meet our financial reporting obligations. Inadequate internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our stock and our access to capital.

We are subject to regulatory compliance.

We are subject to various governmental regulations in all of the jurisdictions in which we conduct business. Failure to comply with current or future regulations could result in the imposition of substantial fines, suspension of production, alteration of our production processes, cessation of operations, or other actions, which could materially and adversely affect our business, financial condition, and results of operations.

Changes in environmental regulations, violations of such regulations, or future environmental liabilities could cause us to incur significant costs and could adversely affect our operations.

Our business and our facilities are subject to numerous laws, regulations, and ordinances governing, among other things, the storage, discharge, handling, emission, generation, manufacture, disposal, remediation of, and exposure to toxic or other hazardous substances, and certain waste products. Many of these environmental laws and regulations subject current or previous owners or operators of land to liability for the costs of investigation, removal, or remediation of hazardous materials. In addition, these laws and regulations typically impose liability regardless of whether the owner or operator knew of, or was responsible for, the presence of any hazardous materials and regardless of whether the actions that led to the presence were conducted in compliance with the law. In the ordinary course of our business, we use metals, solvents, and similar materials, which are stored on-site. The waste created by the use of these materials is transported off-site on a regular basis by unaffiliated waste haulers. Many environmental laws and regulations require generators of waste to take remedial actions at, or in relation to, the off-site disposal location even if the disposal was conducted in compliance with the law. The requirements of these laws and regulations are complex, change frequently, and could become more stringent in the future. Failure to comply with current or future environmental regulations could result in the imposition of substantial fines, suspension of production, alteration of our production processes, cessation of operations, or other actions, which could materially and adversely affect our business, financial condition, and results of operations. There can be no assurance that a claim, investigation, or liability will not arise with respect to these activities, or that the cost of complying with governmental regulations in the future will not have a material adverse effect on us.

Our international sales and operations are subject to complex laws relating to foreign corrupt practices and anti-bribery laws, among many others, and a violation of, or change in, these laws could adversely affect our operations.

The Foreign Corrupt Practices Act in the United States requires United States companies to comply with an extensive legal framework to prevent bribery of foreign officials. The laws are complex and require that we closely monitor local practices of our overseas offices. The United States Department of Justice has recently heightened enforcement of these laws. In addition, other countries continue to implement similar laws that may have extra-territorial effect. In the United Kingdom, where we have operations, the U.K. Bribery Act imposes significant oversight obligations on us and could impact our operations outside of the United Kingdom. The costs for complying with these and similar laws may be significant and could require significant management time and focus. Any violation of these or similar laws, intentional or unintentional, could have a material adverse effect on our business, financial condition, or results of operations.

New regulations related to “conflict minerals” may force us to incur additional expenses, may result in damage to our business reputation, and may adversely impact our ability to conduct our business.

In August 2012, under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, the SEC adopted new requirements for companies that use certain minerals and derivative metals (referred to as “conflict minerals,” regardless of their actual country of origin) in their products. Some of these metals are commonly used in electronic equipment and devices, including our products. These new requirements now require companies to investigate, disclose and report whether or not such metals originated from the Democratic Republic of Congo or adjoining countries and required due diligence efforts beginning fiscal 2013, with initial disclosure requirements beginning in May 2014. There may be increased costs associated with complying with these disclosure requirements, including for diligence to determine the sources of conflict minerals used in our products and other potential changes to products, processes or sources of supply as a consequence of such verification activities. The implementation of these rules could adversely affect the sourcing, supply, and pricing of materials used in our products.

ITEM 1B: UNRESOLVED STAFF COMMENTS

None.

ITEM 2: PROPERTIES

The following table lists the number of manufacturing facilities, service and distribution locations, and offices by region.

	Manufacturing		Service and Distribution		Offices	
	Owned	Leased	Owned	Leased	Owned	Leased
North America	3	—	—	6	1	17
Europe	10	2	—	4	2	23
Asia/Pacific	1	3	—	6	—	23
Other	2	2	1	1	—	10
Total	16	7	1	17	3	73

Our major manufacturing facilities are owned, while smaller factories are typically leased. Our service and distribution locations primarily consist of assembly, localization, service, and/or distribution, and some also include product development and administrative functions. Localization typically includes modifying finished products from other Itron manufacturing locations to meet local specifications. Based on this, four facilities were reclassified from the manufacturing category to the service and distribution category for the current presentation. Our office locations consist primarily of sales and administration functions, and some also include product development functions. Our Electricity and Gas manufacturing facilities are located throughout the world, and our Water manufacturing facilities are located primarily in Asia/Pacific and Europe, with the rest primarily in South America. We own our headquarters facility, which is located in Liberty Lake, Washington. Our principal properties are owned and in good condition, and we believe our current facilities are sufficient to support our operations.

In October 2011 and September 2013, we announced projects to restructure our operations in order to increase efficiency and reduce our costs. As part of the restructuring in Asia/Pacific, one owned manufacturing facility was vacated during 2013 with operations transferred to a leased facility. The owned manufacturing facility is not included in the list above because it does not currently contribute to our operations, and we expect to sell it during the first quarter of 2014. In 2013, we sold one of our European Gas manufacturing facilities, in which we ceased manufacturing operations in 2012. It was classified as an office location as of December 31, 2012.

ITEM 3: LEGAL PROCEEDINGS

There are no material pending legal proceedings, as defined by Item 103 of Regulation S-K, at December 31, 2013. Refer to Item 8: "Financial Statements and Supplementary Data, Note 12: Commitments and Contingencies" included in this Annual Report on Form 10-K.

ITEM 4: MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5: MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information for Common Stock

Our common stock is traded on the NASDAQ Global Select Market. The following table reflects the range of high and low common stock sales prices for the four quarters of 2013 and 2012 as reported by the NASDAQ Global Select Market.

	2013				2012			
	High		Low		High		Low	
First Quarter	\$	47.90	\$	41.50	\$	48.23	\$	36.60
Second Quarter	\$	47.00	\$	39.15	\$	45.42	\$	33.50
Third Quarter	\$	43.72	\$	37.16	\$	45.85	\$	38.28
Fourth Quarter	\$	45.76	\$	38.79	\$	45.26	\$	38.71

Performance Graph

The following graph compares the five-year cumulative total return to shareholders on our common stock with the five-year cumulative total return of our peer group of companies used for the year ended December 31, 2013 and the NASDAQ Composite Index.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*
Among Itron, Inc., the NASDAQ Composite Index, and a Peer Group

* \$100 invested on 12/31/08 in stock or index, including investment of dividends.
 Fiscal years ending December 31.

The above presentation assumes \$100 invested on December 31, 2008 in the common stock of Itron, Inc., the peer group, and the NASDAQ Composite Index, with all dividends reinvested. With respect to companies in the peer group, the returns of each such corporation have been weighted to reflect relative stock market capitalization at the beginning of each annual period plotted. The stock prices shown above for our common stock are historical and not necessarily indicative of future price performance.

Each year, we reassess our peer group to identify global companies that are either direct competitors or have similar industry and business operating characteristics. Our 2013 peer group includes the following publicly traded companies: Badger Meter, Inc.,

Echelon Corporation, ESCO Technologies Inc., National Instruments Corporation, Roper Industries, Inc., and Silver Spring Networks, Inc. We added Silver Spring Networks, Inc. to our peer group in 2013, as it became a publicly traded company during 2013. However, we have not included the company in the cumulative total return graph above, as there is no impact to the cumulative total return in 2013, given that Silver Spring Networks, Inc. was not publicly traded at the beginning of 2013. In 2014, we will show both our old and new (including Silver Spring Networks, Inc.) peer groups.

Issuer Repurchase of Equity Securities

The table below summarizes information about the Company's purchases of its shares of common stock, based on settlement date, during the quarterly period ended December 31, 2013.

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share ⁽²⁾	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
				(in thousands)
October 1 through October 31	—	\$ —	—	\$ 26,434
November 1 through November 30	—	—	—	26,434
December 1 through December 31	86,392	39.48	86,392	23,023
Total	86,392	\$ 39.48	86,392	

⁽¹⁾ On March 8, 2013, our Board of Directors authorized a twelve-month repurchase program of up to \$50 million of Itron's common stock. Repurchases are made in the open market or in privately negotiated transactions, and in accordance with applicable securities laws. No shares were purchased outside of this plan.

⁽²⁾ Includes commissions.

Subsequent to December 31, 2013 and through February 25, 2014, we repurchased 75,203 shares of our common stock under the stock repurchase program authorized by the Board of Directors on March 8, 2013. The average price paid per share was \$39.20.

Additionally, on February 7, 2014, Itron's Board of Directors authorized a new repurchase program of up to \$50 million of our common stock over a 12-month period, which will take effect following the expiration of the current stock repurchase program on March 7, 2014. Repurchases are made in the open market or in privately negotiated transactions and in accordance with applicable securities laws.

Holders

At January 31, 2014, there were 259 holders of record of our common stock.

Dividends

Since the inception of the Company, we have not declared or paid cash dividends. We intend to retain future earnings for the development of our business and do not anticipate paying cash dividends in the foreseeable future.

ITEM 6: SELECTED CONSOLIDATED FINANCIAL DATA

The selected consolidated financial data below is derived from our consolidated financial statements, which have been audited by an independent registered public accounting firm. These selected consolidated financial and other data represent portions of our financial statements. You should read this information together with Item 7: "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Item 8: "Financial Statements and Supplementary Data" included in this Annual Report on Form 10-K. Historical results are not necessarily indicative of future performance.

(1) Working capital represents current assets less current liabilities.

(2) During 2011, we incurred a goodwill impairment charge of \$584.8 million. In addition, restructuring projects were approved and commenced to increase efficiency and lower our cost of manufacturing, for which we incurred costs of \$68.1 million in 2011.

(3) On May 1, 2012, we completed our acquisition of SmartSynch, Inc. for \$77.7 million in cash (net of \$6.7 million of cash and cash equivalents acquired).

(4) During 2013, we incurred a goodwill impairment charge of \$173.2 million. In addition, we incurred costs of \$35.5 million in 2013 related to restructuring projects to increase efficiency. Refer to Item 8: "Financial Statements and Supplementary Data, Note 5: Goodwill" and "Financial Statements and Supplementary Data, Note 13: Restructuring" included in this Annual Report on Form 10-K for further disclosures regarding the goodwill impairment and restructuring charges.

ITEM 7: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with Item 8: "Financial Statements and Supplementary Data."

Overview

We are a technology company, offering end-to-end smart metering solutions to electric, natural gas, and water utilities around the world. Our smart metering solutions, meter data management software, and knowledge application solutions bring additional value to a utility's metering and grid systems. Our professional services help our customers project-manage, install, implement, operate, and maintain their systems.

In March 2013, we separated the management of our Energy operating segment into Electricity and Gas to allow each business line to develop its own go-to-market strategy, prioritize its marketing and product development requirements, and focus on its strategic investments. Our sales, marketing, and delivery functions are managed under three business lines - Electricity, Gas, and Water. Our product development and manufacturing operations are now managed on a worldwide basis to promote a global perspective in our operations and processes and still maintain alignment with the business lines. The transition to the new organizational structure, including changes to operations and financial reporting systems, was completed in the fourth quarter of 2013. Our historical segment information for the years ended December 31, 2012 and 2011 has been recast to reflect our new operating segments.

Our Water operating segment includes both our global water and heat solutions.

We have three measures of segment performance: revenue, gross profit (margin), and operating income (margin). Intersegment revenues were minimal. Corporate operating expenses, interest income, interest expense, other income (expense), and income tax provision (benefit) are not allocated to the segments, nor included in the measure of segment profit or loss.

Revenues decreased 11% in 2013, compared with 2012. The revenue decrease was due primarily to the completion of several large OpenWay® projects in the Electricity segment in 2012, partially offset by a \$15.2 million increase in revenues in the Water segment. Revenues decreased 11% in 2012, compared with 2011. Similar to 2013, the 2012 revenue decline was the result of our large OpenWay projects nearing completion in the Electricity and Gas segments, while our Water operating segment increased \$4.9 million, or 1%, from 2011.

Total backlog was \$1.1 billion, and twelve-month backlog was \$549.0 million at December 31, 2013.

Total company gross margin decreased 130 basis points in 2013, compared with 2012. Gross margin decline in 2013 over the prior year was primarily driven by decreased volumes in our Electricity and Gas segments and less favorable product mix within all three segments. Additionally, we recognized a charge for increased costs associated with specific contract components with an OpenWay project in North America. Total company gross margin increased 210 basis points in 2012, compared with 2011, primarily due to lower warranty charges in the Electricity and Water operating segments. Additionally, benefits from our restructuring actions and manufacturing efficiencies partially offset the impact of decreased volumes.

During the fourth quarter of 2013 in conjunction with our annual goodwill impairment test, which is performed as of October 1, we recognized a goodwill impairment of \$173.2 million in our Electricity reporting unit as the result of delays in global smart grid projects and lower volumes and pricing pressures in certain regions in Europe and Asia/Pacific. The revised forecast for the Electricity business drove a decrease in the fair value of the reporting unit. A portion of the goodwill impairment was deductible for income tax purposes, resulting in an associated income tax benefit of \$11.8 million. The goodwill impairment charge is a non-cash expense that does not adversely affect the debt covenants under our existing credit facility. There were no goodwill impairments in the Gas and Water reporting units.

We recognized income tax (benefit)/provisions of \$(3.6) million, \$26.0 million, and \$4.4 million for the years ended December 31, 2013, 2012, and 2011. In 2013, our actual tax rate differed from the 35% U.S. federal statutory tax rate due to the following items which decreased the tax benefit: (1) nondeductible portion of the goodwill impairment; (2) increase in valuation allowance related to deferred tax assets in France for which we do not anticipate future realization; and (3) disallowed deductions due to a change in foreign legislation. The following items increased our tax benefit: (1) recognition of research and experimentation credits for 2012 and 2013 due to the signing of The American Relief Act of 2012 on January 2, 2013; (2) earnings of our subsidiaries outside of the U.S. in jurisdictions where our statutory tax rate is lower than in the U.S.; (3) the benefit of certain interest expense deductions; and (4) benefits of certain acquisition related elections for tax purposes. Our tax provisions for 2012 and 2011 reflect

the benefits of lower statutory tax rates on foreign earnings as compared with our U.S. federal statutory rate, foreign interest expense deductions and the benefits of certain acquisition related elections for tax purposes. During 2012 we recognized a benefit related to the release of certain reserves for uncertain tax positions. No foreign tax benefit was recorded for the goodwill impairment charge in 2011.

In September 2013, we announced restructuring projects (the 2013 Projects) to restructure our operations to improve profitability and increase efficiencies. The 2013 Projects will reduce headcount and close or consolidate several manufacturing and office facilities. Overall we expect to reduce our workforce by 9%, and we are approximately 50% complete as of December 31, 2013. We expect to substantially complete the 2013 Projects by the end of 2014. We have begun to realize savings from our 2013 Projects during 2013, and we expect full realization of the savings of the 2013 Projects by the end of 2014 and into 2015. Under the 2013 Projects, we recognized \$31.1 million in restructuring expenses, primarily related to severance, since these projects were announced in September 2013. Our 2011 projects were substantially complete as of June 30, 2013. Under the 2011 Projects, we incurred \$74.1 million in costs, including \$4.4 million in 2013. This was a reduction in the restructuring expense of approximately \$3.7 million from the expected total expense of \$77.8 at December 31, 2012. Restructuring expenses of \$1.7 million were recognized in 2012, associated with severance accruals and other facility exit costs, offset by a \$5.4 million correction to the goodwill impairment. For further details regarding the correction of the goodwill impairment, refer to Item 8: "Financial Statements and Supplementary Data, Note 5: Goodwill." The remaining expense of \$68 million associated with the 2011 Projects was incurred in 2011. Revenues and net operating income from the activities we have exited or will exit under the restructuring plan are not material to our operating segments or consolidated results.

On February 7, 2014, Itron's Board of Directors authorized a new repurchase program of up to \$50 million of our common stock over a 12-month period, which will take effect following the expiration of the current stock repurchase program on March 7, 2014. Repurchases are made in the open market or in privately negotiated transactions and in accordance with applicable securities laws. Refer to Part II, Item 5: "Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities" for additional information related to our current share repurchase program.

Meter and Module Summary

We classify meters into three categories:

- Standard metering – no built-in remote reading communication technology
- Advanced metering – one-way communication of meter data
- Smart metering – two-way communication including remote meter configuration and upgrade (consisting primarily of our OpenWay technology)

In addition, advanced and smart meter communication modules can be sold separately from the meter.

Our revenue is driven significantly by sales of meters and communication modules. A summary of our meter and communication module shipments is as follows:

	Year Ended December 31,		
	2013	2012	2011
	(units in thousands)		
Meters			
Standard	17,850	17,920	19,570
Advanced and smart	5,930	8,030	9,320
Total meters	<u>23,780</u>	<u>25,950</u>	<u>28,890</u>
Stand-alone communication modules			
Advanced and smart	<u>5,550</u>	<u>6,460</u>	<u>6,330</u>

Revenues

Revenues decreased 11%, or \$229.5 million, in 2013, compared with 2012. Revenues in 2013 were lower, primarily driven by the substantial completion of four of our five largest OpenWay projects in the Electricity segment in 2012 and by \$14.6 million in the unfavorable net translation impact of operations denominated in foreign currencies, partially offset by an increase in Water revenues during the year. Revenues decreased 11%, or \$255.9 million, in 2012, compared with 2011. Similar to 2013, revenues in 2012 were lower, primarily driven by several of our largest OpenWay projects nearing completion in 2012 in the Electricity and Gas segments and by \$92.2 million in unfavorable net translation of our operations denominated in foreign currencies, partially offset by an increase in Water revenues during the year. A more detailed analysis of these fluctuations is provided in *Operating Segment Results*.

No single customer represented more than 10% of total revenues for the years ended December 31, 2013, 2012, and 2011. Our 10 largest customers accounted for 28%, 27%, and 33% of total revenues in 2013, 2012, and 2011.

Gross Margins

Gross margin was 31.5% for 2013, compared with 32.8% in 2012. The decline was primarily the result of lower volumes in 2013 in both the Electricity and Gas segments, along with a less favorable mix of product sales in 2013 as compared with 2012 for all three segments and a higher warranty expense in the Gas segment. Additionally, we incurred a charge for increased costs associated with specific contract components within an OpenWay contract in North America. These decreases were partially offset by increased volumes in Water and benefits from our restructuring projects and manufacturing efficiencies. Gross margin was 32.8% in 2012, compared with 30.7% in 2011. The improvement was primarily the result of lower warranty costs in 2012 in each of the Electricity, Gas, and Water segments, which positively impacted gross margin by 170 basis points. Benefits from our restructuring projects and manufacturing efficiencies offset the impact of decreased volumes. A more detailed analysis of these fluctuations is provided in *Operating Segment Results*.

Operating Segment Results

For a description of our operating segments, refer to Item 8: “Financial Statements and Supplementary Data, Note 16: Segment Information” in this Annual Report on Form 10-K. The following tables and discussion highlight significant changes in trends or components of each operating segment.

Electricity:

Revenues - 2013 vs. 2012

Electricity revenues for 2013 decreased by \$187.8 million, or 18%, compared with 2012 revenues. The decrease was primarily driven by \$246.3 million in lower revenue of our five largest OpenWay projects in North America, as four of these projects were substantially completed during 2012. Lower prepayment meter shipments drove a decrease of \$24.8 million in our Asia/Pacific region. These decreases were partially offset by \$81.5 million in increased products and services in North America, apart from the five largest OpenWay projects, as well as by \$27.3 million in increased product shipments and services in EMEA. The net translation effect of our operations in foreign currencies negatively impacted 2013 revenues by \$18.1 million.

No customer represented more than 10% of the Electricity operating segment revenues in 2013.

Revenues - 2012 vs. 2011

Electricity revenues for 2012 decreased by \$215.1 million, or 17%, compared with 2011 revenues. The decrease was primarily driven by \$207.6 million in lower OpenWay project revenue in North America, as four of our five largest OpenWay projects were substantially completed during 2012. This revenue decrease in North America was partially offset by \$21.8 million of revenue increase as a result of the SmartSynch acquisition in May 2012. Lower prepayment meter shipments drove a decrease of \$27.3 million in our Asia/Pacific region, which was partially offset by \$23.0 million in higher revenue from increased product shipments and service in EMEA. The net translation effect of our operations in foreign currencies negatively impacted 2012 revenues by \$34.4 million.

One customer individually represented 17% of the Electricity operating segment revenues in 2012, while two customers individually represented 15% and 14% of the Electricity operating segment revenues in 2011.

Gross Margin - 2013 vs. 2012

Gross margin was 26.2% in 2013, compared with 28.8% in 2012. The lower margin was primarily driven by decreased volume in 2013 and less favorable product mix in all regions. Additionally, in 2013, we recognized a charge for increased costs associated with specific contract components with an OpenWay project in North America.

Gross Margin - 2012 vs. 2011

Gross margin was 28.8% in 2012, compared with 26.1% in 2011. The improved margin was primarily driven by \$19.8 million in lower warranty expense in 2012, as well as improved manufacturing efficiencies, global procurement, and the realization of the benefits of our restructuring activities.

Operating Expenses - 2013 vs. 2012

Electricity operating expenses increased by \$184.6 million, or 68.3%, in 2013, primarily due to the goodwill impairment of \$173.2 million recognized in 2013 for the Electricity reporting unit and \$23.9 million in additional restructuring expenses in 2013. We reduced sales and marketing expense by \$12.1 million as a result of our restructuring projects, offset by \$5.6 million in higher litigation expense within general and administrative expense. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets as a percentage of revenues were 31% in 2013 and 26% in 2012.

Operating Expenses - 2012 vs. 2011

Electricity operating expenses decreased by \$271.7 million or 50%, in 2012 primarily due to a goodwill impairment charge of \$254.7 million in 2011 and a decrease in restructuring charges of \$25.2 million associated with the Electricity reporting unit between 2011 and 2012. This was partially offset by an increase in product development expenses over the prior year by \$9.6 million, primarily as the result of the development of new and enhanced products and in preparation for sales opportunities in developing markets. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets as a percentage of revenues were 26% in 2012 and 21% in 2011.

Gas:

Revenues - 2013 vs. 2012

Gas revenues decreased by \$56.9 million, or 9%, in 2013, compared with 2012. Our Gas business continues to experience period-to-period variation in customer contracts and purchases. The decrease was driven by \$54.2 million in lower product sales in EMEA and \$18.7 million in lower communication module shipments and lower service revenue in North America, the effect of which partially offset by \$21.3 million in increased North America gas meter shipments, particularly smart meters.

No single customer represented more than 10% of the Gas operating segment revenues in 2013, 2012, and 2011.

Revenues - 2012 vs. 2011

Gas revenues decreased by \$45.8 million, or 7%, in 2012, compared with 2011, including \$27.7 million for the unfavorable translation effect of our revenues denominated in foreign currencies. The decrease was driven by lower communication module shipments and lower service revenue, partially offset by increased gas meter shipments, particularly smart meters. The overall decrease is due to typical period-to-period fluctuations in timing of customer projects.

Gross Margin - 2013 vs. 2012

Gross margin was 36.5% in 2013, compared with 37.5% in 2012. The 100 basis point decline in gross margin was primarily the result of less favorable product mix and higher warranty costs.

Gross Margin - 2012 vs. 2011

Gross margin was 37.5% in 2012, compared with 37.9% in 2011. Decreased revenues for smart gas communication modules and non-OpenWay services were partially offset by lower warranty charges in 2012.

Operating Expenses - 2013 vs. 2012

Gas operating expenses decreased by \$801,000, or 1%, in 2013. Lower sales and marketing and product development expenses were partially offset by higher general and administrative expenses. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets as a percentage of revenues, were 21% in 2013 and 20% in 2012.

Operating Expenses - 2012 vs. 2011

Gas operating expenses decreased by \$24.7 million, or 16% in 2012, primarily due to a decrease in restructuring expenses of \$25.4 million. This was partially offset by increases in product development for new and enhanced products. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets as a percentage of revenues were 20% in 2012 and 18% in 2011.

Water:

Revenues - 2013 vs. 2012

The increase in revenues of \$15.2 million, or 3%, in 2013 was driven primarily by growth in projects in North America of \$10.2 million. Latin America experienced growth of \$7.0 million, but was negatively impacted by foreign currency translation of \$4.3 million.

No single customer represented more than 10% of the Water operating segment revenues in 2013, 2012, and 2011.

Revenues - 2012 vs. 2011

Revenues increased \$4.9 million, or 1%, in 2012, while the translation effect of a stronger U.S. dollar against most foreign currencies during 2012 negatively impacted revenues by 6%. All regions generated revenue growth during 2012.

Gross Margin - 2013 vs. 2012

Water gross margin decreased to 34.6% in 2013, compared with 35.1% in 2012, driven predominantly by higher service revenues in North America, which have a lower margin, and partially offset by favorable product mix in EMEA.

Gross Margin - 2012 vs. 2011

Water gross margin increased to 35.1% in 2012, compared with 32.2% in 2011, primarily driven by \$12.4 million in lower warranty expense in 2012 and favorable product mix, which were partially offset by lower margin services for a large project in North America.

Operating Expenses - 2013 vs. 2012

In 2013, Water operating expenses were \$124.5 million compared with \$125.6 million in 2012. Decreases of \$5.9 million in sales and marketing expense and \$2.1 million in lower amortization of intangible expense were partially offset by increases in product development, general and administrative, and restructuring expenses. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets as percentages of revenues were 22% in 2013, compared with 24% and 2012.

Operating Expenses - 2012 vs. 2011

In 2012, Water operating expenses were \$125.6 million, compared with \$471.7 million in 2011 including the favorable impact of foreign exchange rates of \$7.6 million. Operating expenses in 2011 included a goodwill impairment charge of \$330.1 million and \$15.9 million in higher restructuring costs. Sales and marketing expenses in 2012 were \$6.2 million higher than in 2011 due to investments in preparation for opportunities in developing markets. Product development expenses in 2012 were \$4.5 million higher than in 2011 as the result of development of new and enhanced products to meet the demands of various markets. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets as percentages of revenues were 24% in 2012 and 2011.

Corporate unallocated:

Operating expenses not directly associated with an operating segment are classified as "Corporate unallocated." These expenses increased 7% to \$46.4 million in 2013, compared with 2012, primarily due to \$2.7 million in increased restructuring expenses in 2013, as well as \$3.8 million in sales and marketing costs, which are no longer allocated to the operating segments. These increases were partially offset by a decline in general and administrative expenses, including \$3.0 million in acquisition-related expenses incurred in 2012 that did not recur in 2013.

Corporate unallocated expenses increased 2% to \$43.5 million in 2012, compared with 2011, primarily due to acquisition related expenses for the SmartSynch acquisition, for management training and development costs in connection with the implementation of a new organizational structure, and for preliminary planning costs, prior to application development, for our global enterprise resource planning (ERP) software initiative. These increases were partially offset by lower corporate IT related and marketing spending.

Operating Expenses

The following table details our total operating expenses in dollars and as a percentage of revenues:

	Year Ended December 31,					
	2013	% of Revenues	2012	% of Revenues	2011	% of Revenues
	(in thousands)		(in thousands)		(in thousands)	
Sales and marketing	\$ 180,371	9%	\$ 197,603	9%	\$ 185,105	8%
Product development	176,019	9%	178,653	8%	161,305	7%
General and administrative	142,559	7%	138,290	6%	142,908	6%
Amortization of intangible assets	42,019	2%	47,810	2%	63,394	3%
Restructuring expense	35,497	2%	1,665	—%	68,082	3%
Goodwill impairment	173,249	9%	—	—%	584,847	24%
Total operating expenses	<u>\$ 749,714</u>	<u>38%</u>	<u>\$ 564,021</u>	<u>26%</u>	<u>\$ 1,205,641</u>	<u>50%</u>

2013 vs. 2012

Operating expenses increased \$185.7 million in 2013, compared with 2012. The 2013 operating expenses included \$173.2 million in goodwill impairment charges associated with the Electricity reporting unit, as well as \$35.5 million in restructuring expenses, which represented the majority of total expected expenses under our 2013 Projects initiated in the third quarter of 2013. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets represented 28% of revenues in 2013, compared with 26% in 2012. Sales and marketing and product development expenses decreased in 2013 compared with 2012, primarily due to our restructuring activities under the 2011 Projects that were completed in June 2013. In addition, scheduled decreases in intangible asset amortization resulted in \$5.8 million in lower operating expenses. These decreases were partially offset by an increase in general and administrative expenses of \$4.3 million, primarily as a result of higher litigation expense.

2012 vs. 2011

Operating expenses decreased \$641.6 million in 2012, compared with 2011. The 2011 operating expenses included \$584.8 million of goodwill impairment charges associated with the Electricity and Water reporting units, as well as \$68.1 million of restructuring expenses, which represented the majority of total expected expenses under our restructuring project initiated in 2011. Operating expenses for sales and marketing, product development, general and administrative, and amortization of intangible assets represented 26% of revenues in 2012, compared with 23% in 2011. Sales and marketing and product development expenses increased in 2012 compared with 2011, primarily due to increased product development costs for new and enhanced products and investments in targeted geographies in anticipation of sales opportunities. The increase was partially offset by favorable foreign currency translation effects and scheduled decreases in amortization of intangible assets.

Other Income (Expense)

The following table shows the components of other income (expense):

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Interest income	\$ 1,620	\$ 952	\$ 862
Interest expense	(9,030)	(8,518)	(31,079)
Amortization of prepaid debt fees	(1,656)	(1,597)	(5,715)
Other income (expense), net	(4,007)	(5,744)	(6,651)
Total other income (expense)	<u>\$ (13,073)</u>	<u>\$ (14,907)</u>	<u>\$ (42,583)</u>

Interest income: Interest income is generated from our cash and cash equivalents. Interest rates have continued to remain low. Interest income for the year ended December 31, 2013 included interest recognized on certain deposits with governmental entities related to tax contingencies.

Interest expense: Interest expense increased slightly from 2012 due to the impact of interest rate swaps which became effective during the third quarter of 2013 and a higher interest rate margin on the credit facility, partially offset by a lower principal balance of debt outstanding. The 2012 interest expense declined significantly due to the lower principal balance as well as lower interest rates beginning in August 2011. Total debt was \$378.8 million, \$417.5 million, and \$452.5 million at December 31, 2013, 2012, and 2011, respectively. In August 2011, we refinanced our credit facility. The interest rate on our 2011 credit facility was 1.67% at December 31, 2013 and 1.47% at December 31, 2012. The weighted average interest rate on the borrowings under our 2007 credit facility at the time of refinancing (August 2011) was 4.75% (including the effect of an interest rate swap).

Amortization of prepaid debt fees: Amortization of prepaid debt fees in 2013 was consistent with the 2012 level, following the refinancing of the 2007 credit facility in 2011, which resulted in a \$2.4 million write-off of prepaid debt fees. We incurred lower prepaid debt fees with the 2011 credit facility. Amortization of prepaid debt fees fluctuates each year dependent upon the timing of debt payments. When debt is repaid prior to the contractual due date, the related portion of unamortized prepaid debt fees is written-off. Refer to Item 8: “Financial Statements and Supplementary Data, Note 6: Debt” in this Annual Report on Form 10-K for additional details related to our long-term borrowings.

Other income (expense), net: Other expenses, net, consist primarily of unrealized and realized foreign currency gains and losses due to balances denominated in a currency other than the reporting entity's functional currency. Foreign currency losses, net of hedging, were \$3.3 million in 2013, compared with net foreign currency losses of \$3.8 million in 2012 and \$4.7 million in 2011.

Financial Condition

Cash Flow Information:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Operating activities	\$ 105,421	\$ 205,090	\$ 252,358
Investing activities	(56,771)	(125,445)	(78,741)
Financing activities	(57,438)	(77,528)	(209,453)
Effect of exchange rates on cash and cash equivalents	(2,818)	1,208	(555)
Increase (decrease) in cash and cash equivalents	<u>\$ (11,606)</u>	<u>\$ 3,325</u>	<u>\$ (36,391)</u>

Cash and cash equivalents at December 31, 2013 were \$124.8 million, compared with \$136.4 million at December 31, 2012. The decrease in cash and cash equivalents was primarily the result of lower net income, partially offset by decreases in business acquisitions and repurchases of common stock in 2013, compared with 2012. Cash and cash equivalents at December 31, 2012 were comparable to the prior year due to several offsetting factors, including lower net repayments on debt in 2012, compared with 2011, partially offset by increases in business acquisitions and repurchases of common stock and a decrease in cash provided by operating activities in 2012.

Operating activities

Net cash provided by operating activities in 2013 was \$99.7 million lower than in 2012. This decline was primarily due to the decrease in net income of \$81.6 million, exclusive of the impact of the goodwill impairment charge, and an increase in deferred taxes of \$21.0 million.

Net cash provided by operating activities in 2012 was \$47.3 million lower, compared with 2011. This decline was primarily due to: (1) a decline in operating income, exclusive of non-cash items, such as goodwill impairment, depreciation and amortization, and non-cash restructuring expense, and (2) the net increase in working capital balances of \$23.9 million in 2012, compared with a net decrease in working capital balances of \$4.7 million in 2011.

Investing activities

Net cash used in investing activities in 2013 was \$68.7 million lower than in 2012. This decrease in investing activities during 2013 was the result of a reduction of \$78.2 million in business acquisition payments. In 2013, business acquisition-related payments consisted of contingent payments related to the 2011 Asais acquisition. Business acquisition-related payments in 2012 included payments for the acquisition of SmartSynch. The decrease was partially offset by an increase in acquisitions of property, plant, and equipment of \$9.5 million in 2013.

Net cash used in investing activities in 2012 was \$46.7 million higher, compared with 2011. The increase in investing activities during 2012 was the result of business acquisitions of \$79.0 million, primarily related to the SmartSynch acquisition, as compared

with business acquisitions of \$20.1 million in 2011. The increase in cash used in business acquisitions in 2012 was partially offset by a decrease in acquisitions of property, plant, and equipment to \$50.5 million in 2012, compared with \$60.1 million in 2011.

Financing activities

Net cash used in financing activities in 2013 was \$20.1 million lower than in 2012, primarily as a result of a decrease of \$20.5 million in repurchases of common stock in 2013.

Net cash used in financing activities in 2012 was \$131.9 million lower compared with 2011. During 2012, net repayments on borrowings were \$35.0 million, compared with \$178.1 million in 2011. On October 24, 2011, our Board of Directors authorized a twelve-month repurchase program of up to \$100 million of our common stock, which, on September 13, 2012, was extended until February 15, 2013. During 2012, we repurchased \$47.4 million of our common stock, compared with \$29.4 million in 2011.

Effect of exchange rates on cash and cash equivalents

Changes in exchange rates on the cash balances of currencies held in foreign denominations resulted in a decrease of \$2.8 million, an increase of \$1.2 million, and a decrease of \$555,000 in 2013, 2012, and 2011, respectively. Our primary foreign currency exposure relates to non-U.S. dollar denominated transactions in our international subsidiary operations, the most significant of which is the euro.

Off-balance sheet arrangements:

We have no off-balance sheet financing agreements or guarantees as defined by Item 303 of Regulation S-K at December 31, 2013 and December 31, 2012 that we believe are reasonably likely to have a current or future effect on our financial condition, results of operations, or cash flows.

Disclosures about contractual obligations and commitments:

The following table summarizes our known obligations to make future payments pursuant to certain contracts as of December 31, 2013, as well as an estimate of the timing in which these obligations are expected to be satisfied.

	Total	Less than 1 year	1-3 years	3-5 years	Beyond 5 years
	(in thousands)				
Credit Facilities ⁽¹⁾					
USD denominated term loan	\$ 271,424	\$ 30,669	\$ 240,755	\$ —	\$ —
Multicurrency revolving line of credit	126,853	2,125	124,728	—	—
Operating lease obligations ⁽²⁾	52,691	11,710	18,259	15,567	7,155
Purchase and service commitments ⁽³⁾	205,377	203,505	1,840	32	—
Other long-term liabilities reflected on the balance sheet under generally accepted accounting principles ⁽⁴⁾	91,999	—	44,314	16,361	31,324
Total	\$ 748,344	\$ 248,009	\$ 429,896	\$ 31,960	\$ 38,479

(1) Borrowings are disclosed within Item 8: “Financial Statements and Supplementary Data, Note 6: Debt” included in this Annual Report on Form 10-K, with the addition of estimated interest expense but not including the amortization of prepaid debt fees.

(2) Operating lease obligations are disclosed in Item 8: “Financial Statements and Supplementary Data, Note 12: Commitments and Contingencies” included in this Annual Report on Form 10-K and do not include common area maintenance charges, real estate taxes, and insurance charges for which we are obligated.

(3) We enter into standard purchase orders in the ordinary course of business that typically obligate us to purchase materials and other items. Purchase orders can vary in terms, which include open-ended agreements that provide for estimated quantities over an extended shipment period, typically up to one year at an established unit cost. Our long-term executory purchase agreements that contain termination clauses have been classified as less than one year, as the commitments are the estimated amounts we would be required to pay at December 31, 2013 if the commitments were canceled.

(4) Other long-term liabilities consist of warranty obligations, estimated pension benefit payments, and other obligations. Estimated pension benefit payments include amounts from 2015-2023. Long-term unrecognized tax benefits totaling \$23.6 million (net of pre-payments), which include accrued interest and penalties, are not included in the above contractual

obligations and commitments table as we cannot reliably estimate the period of cash settlement with the respective taxing authorities. Additionally, because the amount and timing of the future cash outflows are uncertain, deferred revenue totaling \$32.7 million, which includes deferred revenue related to extended warranty guarantees, is not included in the table. For further information on defined benefit pension plans, income taxes, and warranty obligations and deferred revenue for extended warranties, see Item 8: "Financial Statements and Supplementary Data," Notes 8, 11, and 12, respectively, included in this Annual Report on Form 10-K.

Liquidity and Capital Resources:

Our principal sources of liquidity are cash flows from operations, borrowings, and sales of common stock. Cash flows may fluctuate and are sensitive to many factors including changes in working capital and the timing and magnitude of capital expenditures and payments on debt. Working capital, which represents current assets less current liabilities, was \$344.4 million at December 31, 2013, compared with \$353.6 million at December 31, 2012.

Borrowings

Our credit facility consists of a \$300 million U.S. dollar term loan and a multicurrency revolving line of credit (the revolver) with a principal amount of up to \$660 million. At December 31, 2013, \$120 million was outstanding under the revolver, and \$49.5 million was utilized by outstanding standby letters of credit, resulting in \$490.5 million available for additional borrowings.

For further description of the term loan and the revolver under our credit facility, refer to Item 8: "Financial Statements and Supplementary Data, Note 6: Debt" included in this Annual Report on Form 10-K.

For a description of our letters of credit and performance bonds, and the amounts available for additional borrowings or letters of credit under our lines of credit, including the revolver that is part of our credit facility, refer to Item 8: "Financial Statements and Supplementary Data, Note 12: Commitments and Contingencies" included in this Annual Report on Form 10-K.

Share Repurchases

On March 8, 2013, our Board of Directors authorized a repurchase program of up to \$50 million in shares of our common stock through March 7, 2014. Repurchases are made in the open market or in privately negotiated transactions and in accordance with applicable securities laws. Depending on market conditions and other factors, these repurchases may be commenced or suspended from time to time without prior notice. From March 8, 2013 through December 31, 2013, we repurchased approximately 645,000 shares of our common stock, totaling \$27.0 million, leaving \$23.0 million remaining under the repurchase program. Refer to Item 5: "Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities" and Item 8: "Financial Statements and Supplementary Data, Note 2: Earnings (Loss) Per Share and Capital Structure" for additional information related to our current share repurchase program.

On February 7, 2014, Itron's Board of Directors authorized a new repurchase program of up to \$50 million of our common stock over a 12-month period, which will take effect following the expiration of the current stock repurchase program on March 7, 2014.

Restructuring

During the third quarter of 2013, we announced the approval of projects to restructure our operations to improve profitability and increase efficiencies. We began implementing these projects in the third quarter of 2013, and we expect to substantially complete these projects by December 31, 2014.

Total expected costs were approximately \$31.3 million as of December 31, 2013. This is an increase of approximately \$2.2 million from the total expected costs at September 30, 2013. This increase was the result of asset impairments recognized at a manufacturing site to be closed and a small increase in the total headcount reduction.

A substantial portion of the total expected restructuring charges was recognized in the second half of 2013, and \$36.3 million was accrued at December 31, 2013, of which \$30.3 million is expected to be paid over the next 12 months. We have begun to realize benefits from our restructuring projects during 2013, and we expect full realization of the cost savings by the end of 2014 and into 2015. Certain projects are subject to a variety of labor and employment laws, rules, and regulations that could result in a delay in implementing projects at some locations. Real estate market conditions may impact the timing of our ability to sell some of the manufacturing facilities we have designated for closure and disposal. This may delay the completion of the restructuring projects beyond December 31, 2014. For further details regarding our restructuring activities, refer to Item 8: "Financial Statements and Supplementary Data, Note 13: Restructuring" included in this Annual Report on Form 10-K.

Income Tax

Our tax provision (benefit) as a percentage of income (loss) before tax typically differs from the U.S. federal statutory rate of 35%. Changes in our actual tax rate are subject to several factors, including fluctuations in operating results, new or revised tax legislation and accounting pronouncements, changes in the level of business in domestic and foreign jurisdictions, tax credits (including research and development and foreign tax), state income taxes, adjustments to valuation allowances, and interest expense and penalties related to uncertain tax positions, among other items. Changes in tax laws, valuation allowances, and unanticipated tax liabilities could significantly impact our tax rate.

Our tax benefit as a percentage of loss before tax was 2.5% for 2013. Our actual tax rate differed from the 35% U.S. federal statutory tax rate primarily due to the following items which decreased the tax benefit: (1) nondeductible portion of the goodwill impairment; (2) increase in valuation allowance related to deferred tax assets in France for which we do not anticipate future realization; and (3) disallowed deductions due to a change in foreign legislation. The following items increased our tax benefit: (1) recognition of research and experimentation credits for 2012 and 2013 due to the signing of The American Relief Act of 2012 on January 2, 2013; (2) earnings of our subsidiaries outside of the U.S. in jurisdictions where our statutory tax rate is lower than in the U.S.; (3) the benefit of certain interest expense deductions; and (4) benefits of certain acquisition related elections for tax purposes.

Our tax expense as a percentage of income before tax was 19.1% for 2012. Our actual tax rate was lower than the 35% U.S. federal statutory tax rate primarily due to: (1) earnings of our subsidiaries outside of the United States in jurisdictions where our statutory tax rate is lower than in the United States; (2) the benefit of certain interest expense deductions; (3) a benefit related to the release of reserves for uncertain tax positions; and (4) benefits of certain acquisition related elections for tax purposes.

Our tax expense as a percentage of loss before tax was (0.9%) for 2011. Our actual tax rate was lower than the 35% U.S. federal statutory tax rate primarily due to: (1) the impact of the goodwill impairment, which was not deductible; (2) earnings of our subsidiaries outside of the United States in jurisdictions where our statutory tax rate is lower than in the United States; (3) the benefit of certain interest expense deductions; (4) a benefit related to the settlement of foreign tax litigation; and (5) benefits of certain acquisition related elections for tax purposes.

Our deferred tax assets consist primarily of tax losses and temporary differences related to depreciation, amortization and accrued expenses. Since 2007 one of our Luxembourg entities has incurred losses that we believed would not be utilized and accordingly, the associated deferred tax asset was not recorded. During the fourth quarter of 2013 we have included the losses of the Luxembourg entity on its financial statements as a result of new information supporting the assertion of the ability to generate income in Luxembourg in future periods. At December 31, 2013 the Luxembourg net operating loss carryforward was \$408.1 million. A full valuation allowance is recorded for this asset due to a history of losses. We will continue to evaluate the need for a valuation allowance against this tax asset and will adjust the valuation allowance as deemed appropriate which, when adjusted, will result in an impact to the effective tax rate.

Our deferred tax assets at December 31, 2013 do not include the tax effect on \$55.2 million of excess tax benefits from employee stock plan exercises. Common stock will be increased by \$20.5 million when such excess tax benefits reduce cash taxes payable.

Our cash income tax payments (refunds) for 2013, 2012, and 2011 were as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
U.S. federal taxes paid (refunded)	\$ (13)	\$ 15,500	\$ 5,900
State income taxes paid (refunded)	(18)	2,831	2,450
Foreign and local income taxes paid	18,690	22,468	19,779
Total income taxes paid	<u>\$ 18,659</u>	<u>\$ 40,799</u>	<u>\$ 28,129</u>

Based on current projections, we expect to pay, net of refunds, approximately \$300,000 in state taxes and \$19.9 million in foreign and local income taxes in 2014. Currently, we do not expect to pay any U.S. federal taxes in 2014.

As of December 31, 2013, there was \$40.3 million of cash and short-term investments held by certain foreign subsidiaries that could be repatriated to fund U.S. operations, and additional tax costs may be required. We do not provide U.S. deferred taxes related to the cash in these foreign subsidiaries because our investment is considered permanent in duration. Tax is one of many factors that we consider in the management of global cash. Included in the determination of the tax costs in repatriating foreign

cash into the United States are the amount of earnings and profits in a particular jurisdiction, withholding taxes that would be imposed, and available foreign tax credits. Accordingly, the amount of taxes that we would need to accrue and pay to repatriate foreign cash could vary significantly.

The American Taxpayer Relief Act of 2012 (the "Act") was signed into law on January 2, 2013 and extended several business tax provisions including: (1) the active financing income and controlled foreign corporation look-through exceptions to certain foreign income; and (2) the research and experimentation credit. The tax effects of the Act were recognized in the first quarter of 2013. We currently expect our 2014 annual effective tax rate to be higher than 2013 due to: (1) the expiration of the research and experimentation credit and the controlled foreign corporation look-through exception to certain foreign income; (2) the impact of valuation allowances in foreign jurisdictions; and (3) the impacts of foreign legislation.

Other Liquidity Considerations

In several of our consolidated international subsidiaries, we have joint venture partners, who are minority shareholders. Although these entities are not wholly-owned by Itron, Inc., we consolidate them because we have a greater than 50% ownership interest or because we exercise control over the operations. The noncontrolling interest balance in our Consolidated Balance Sheets represents the proportional share of the equity of the joint venture entities, which is attributable to the minority shareholders. Approximately \$17.1 million of our consolidated cash balance at December 31, 2013 resides in our joint venture entities. As a result, the minority shareholders of these entities control their proportional share of this cash balance, and there may be limitations on our ability to repatriate cash to the U.S. from these entities.

For a description of our funded and unfunded non-U.S. defined benefit pension plans and our expected 2014 contributions, refer to Item 8: "Financial Statements and Supplementary Data, Note 8: Defined Benefit Pension Plans" included in this Annual Report on Form 10-K.

At December 31, 2013, we have accrued \$15.3 million of bonus and profit sharing plans expense for the achievement of annual financial and nonfinancial targets, compared with \$22.1 million at December 31, 2012. These awards will be paid in cash during the first quarter of 2014.

General Liquidity Overview

We expect to grow through a combination of internal new product development, licensing technology from and to others, distribution agreements, partnering arrangements, and acquisitions of technology or other companies. We expect these activities to be funded with existing cash, cash flow from operations, borrowings, and the sale of common stock or other securities. We believe existing sources of liquidity will be sufficient to fund our existing operations and obligations for the next 12 months and into the foreseeable future, but offer no assurances. Our liquidity could be affected by the stability of the electricity, gas, and water industries, competitive pressures, changes in estimated liabilities for product warranties and/or litigation, future business combinations, capital market fluctuations, international risks, and other factors described under Item 1A: "Risk Factors," as well as Item 7A: "Quantitative and Qualitative Disclosures About Market Risk," both included in this Annual Report on Form 10-K.

Contingencies

Refer to Item 8: "Financial Statements and Supplementary Data, Note 12: Commitments and Contingencies" included in this Annual Report on Form 10-K.

Critical Accounting Estimates

Revenue Recognition

The majority of our revenue arrangements involve multiple deliverables, which require us to determine the fair value of each deliverable and then allocate the total arrangement consideration among the separate deliverables based on the relative fair value percentages. Revenues for each deliverable are then recognized based on the type of deliverable, such as 1) when the products are shipped, 2) services are delivered, 3) percentage-of-completion when implementation services are essential to other deliverables in the arrangement, 4) upon receipt of customer acceptance, or 5) transfer of title and risk of loss. A majority of our revenue is recognized when products are shipped to or received by a customer or when services are provided.

Fair value represents the estimated price charged if an element were sold separately. If the fair value of any undelivered element included in a multiple deliverable arrangement cannot be objectively determined, revenue is deferred until all elements are delivered and services have been performed, or until the fair value can be objectively determined for any remaining undelivered elements. We review our fair values on an annual basis or more frequently if a significant trend is noted.

If implementation services are essential to a software arrangement, revenue is recognized using either the percentage-of-completion methodology of contract accounting if project costs can be reliably estimated or the completed contract methodology if project costs cannot be reliably estimated. The estimation of costs through completion of a project is subject to many variables such as the length of time to complete, changes in wages, subcontractor performance, supplier information, and business volume assumptions. Changes in underlying assumptions/estimates may adversely or positively affect financial performance.

Under contract accounting, if we estimate that the completion of a contract component (unit of accounting) will result in a loss, the loss is recognized in the period in which it is estimated. We reevaluate the estimated loss through the completion of the contract component, and adjust the estimated loss for changes in facts and circumstances.

Certain of our revenue arrangements include an extended or noncustomary warranty provision that covers all or a portion of a customer's replacement or repair costs beyond the standard or customary warranty period. Whether or not the extended warranty is separately priced in the arrangement, a portion of the arrangement's total consideration is allocated to this extended warranty deliverable. This revenue is deferred and recognized over the extended warranty coverage period. Extended or noncustomary warranties do not represent a significant portion of our revenue.

We allocate consideration to each deliverable in an arrangement based on its relative selling price. We determine selling price using VSOE, if it exists, otherwise we use third-party evidence (TPE). We define VSOE as a median price of recent standalone transactions that are priced within a narrow range. TPE is determined based on the prices charged by our competitors for a similar deliverable when sold separately. If neither VSOE nor TPE of selling price exists for a unit of accounting, we use estimated selling price (ESP). The objective of ESP is to determine the price at which we would transact if the product or service were regularly sold by us on a standalone basis. Our determination of ESP involves a weighting of several factors based on the specific facts and circumstances of the arrangement. The factors considered include the cost to produce the deliverable, the anticipated margin on that deliverable, our ongoing pricing strategy and policies, and the characteristics of the varying markets in which the deliverable is sold.

We analyze the selling prices used in our allocation of arrangement consideration on an annual basis. Selling prices are analyzed on a more frequent basis if a significant change in our business necessitates a more timely analysis or if we experience significant variances in our selling prices.

Warranty

We offer standard warranties on our hardware products and large application software products. We accrue the estimated cost of new product warranties based on historical and projected product performance trends and costs during the warranty period. Testing of new products in the development stage helps identify and correct potential warranty issues prior to manufacturing. Quality control efforts during manufacturing reduce our exposure to warranty claims. If our quality control efforts fail to detect a fault in one of our products, we may experience an increase in warranty claims. We track warranty claims to identify potential warranty trends. If an unusual trend is noted, an additional warranty accrual would be recorded if a failure event is probable and the cost can be reasonably estimated. When new products are introduced, our process relies on historical averages until sufficient data are available. As actual experience becomes available, it is used to modify the original estimate to ensure the expected warranty costs are within a range of likely outcomes. Management regularly evaluates the sufficiency of the warranty provisions and makes adjustments when necessary. The warranty allowances may fluctuate due to higher than anticipated material, labor, and other costs we may incur to repair or replace projected product failures, and we may incur additional warranty and related expenses in the future with respect to new or established products, which could adversely affect our gross margin. The long-term warranty balance includes estimated warranty claims beyond one year.

Restructuring and Asset Impairments

We record a liability for costs associated with an exit or disposal activity at its fair value in the period in which the liability is incurred. Employee termination benefits considered post-employment benefits are accrued when the obligation is probable and estimable, such as benefits stipulated by human resource policies and practices or statutory requirements. One-time termination benefits are expensed at the date the employee is notified. If the employee must provide future service greater than 60 days, such benefits are expensed ratably over the future service period. For contract termination costs, we record a liability upon the later of when we terminate a contract in accordance with the contract terms or when we cease using the rights conveyed by the contract.

Asset impairments are determined at the asset group level. An impairment may be recorded for assets that are to be abandoned, are to be sold for less than net book value, or are held for sale in which the estimated proceeds are less than the net book value less costs to sell. We may also recognize impairment on an asset group, which is held and used, when the carrying value is not recoverable and exceeds the asset group's fair value. If an asset group is considered a business, a portion of our goodwill balance is allocated to it based on relative fair value.

In determining restructuring charges, we analyze our future operating requirements, including the required headcount by business functions and facility space requirements. Our restructuring costs and any resulting accruals involve significant estimates using the best information available at the time the estimates are made. Our estimates involve a number of risks and uncertainties, some of which are beyond our control, including real estate market conditions and local labor and employment laws, rules, and regulations. If the amounts and timing of cash flows from restructuring activities are significantly different from what we have estimated, the actual amount of restructuring and asset impairment charges could be materially different, either higher or lower, than those we have recorded.

Income Taxes

We estimate income tax expense in each of the taxing jurisdictions in which we operate. Changes in our actual tax rate are subject to several factors, including fluctuations in operating results, new or revised tax legislation and accounting pronouncements, changes in the level of business in domestic and foreign jurisdictions, tax credits (including research and development and foreign tax), state income taxes, adjustments to valuation allowances, and interest expense and penalties related to uncertain tax positions, among other items. Changes in tax laws, valuation allowances, and unanticipated tax liabilities could significantly impact our tax rate.

We record valuation allowances to reduce deferred tax assets to the extent we believe it is more likely than not that a portion of such assets will not be realized. In making such determinations, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies, and our ability to carry back losses to prior years. We are required to make assumptions and judgments about potential outcomes that lie outside management's control. Our most sensitive and critical factors are the projection, source, and character of future taxable income. Although realization is not assured, management believes it is more likely than not that deferred tax assets will be realized. The amount of deferred tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward periods are reduced or current tax planning strategies are not implemented.

We are subject to audits in multiple taxing jurisdictions in which we operate. These audits may involve complex issues, which may require an extended period of time to resolve. We believe we have recorded adequate income tax provisions and reserves for uncertain tax positions.

In evaluating uncertain tax positions, we consider the relative risks and merits of positions taken in tax returns filed and to be filed, considering statutory, judicial, and regulatory guidance applicable to those positions. We make assumptions and judgments about potential outcomes that lie outside management's control. To the extent the tax authorities disagree with our conclusions and depending on the final resolution of those disagreements, our actual tax rate may be materially affected in the period of final settlement with the tax authorities.

Inventories

Items are removed from inventory using the first-in, first-out method. Inventories include raw materials, sub-assemblies, and finished goods. Inventory amounts include the cost to manufacture the item, such as the cost of raw materials, labor, and other applied direct and indirect costs. We also review idle facility expense, freight, handling costs, and wasted materials to determine if abnormal amounts should be recognized as current-period charges. We review our inventory for obsolescence and marketability. If the estimated market value, which is based upon assumptions about future demand and market conditions, falls below the original cost, the inventory value is reduced to the market value. If technology rapidly changes or actual market conditions are less favorable than those projected by management, inventory write-downs may be required. Our inventory levels may vary period to period as a result of our factory scheduling and timing of contract fulfillments.

Goodwill and Intangible Assets

Goodwill and intangible assets may result from our acquisitions. We use estimates, including estimates of useful lives of intangible assets, the amount and timing of related future cash flows, and fair values of the related operations, in determining the value assigned to goodwill and intangible assets. Our finite-lived intangible assets are amortized over their estimated useful lives based on estimated discounted cash flows. IPR&D is considered an indefinite-lived intangible asset and is not subject to amortization until the associated projects are completed or terminated. Finite-lived intangible assets are tested for impairment at the asset group level when events or changes in circumstances indicate the carrying value may not be recoverable. Indefinite-lived intangible assets are tested for impairment annually, when events or changes in circumstances indicate the asset may be impaired, or at the time when their useful lives are determined to be no longer indefinite.

Goodwill is assigned to our reporting units based on the expected benefit from the synergies arising from each business combination, determined by using certain financial metrics, including the forecasted discounted cash flows associated with each reporting unit. Prior to 2012, we had four reporting units: Itron North America (INA), Itron International (INL) Electricity, INL Gas, and INL

Water. Effective January 1, 2012, our three reporting units are Electricity, Gas, and Water. The reporting units are aligned with our reporting segments, effective in the fourth quarter of 2013.

We test goodwill for impairment each year as of October 1, or more frequently should a significant impairment indicator occur. As part of the impairment test, we may elect to perform an assessment of qualitative factors. If this qualitative assessment indicates that it is more likely than not that the fair value of a reporting unit, including goodwill, is less than its carrying amount, or if we elect to bypass the qualitative assessment, we would then proceed with the two-step impairment test. The impairment test involves comparing the fair values of the reporting units to their carrying amounts. If the carrying amount of a reporting unit exceeds its fair value, a second step is required to measure the goodwill impairment loss amount. This second step determines the current fair values of all assets and liabilities of the reporting unit and then compares the implied fair value of the reporting unit's goodwill to the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of the goodwill, an impairment loss is recognized in an amount equal to the excess.

Determining the fair value of a reporting unit is judgmental in nature and involves the use of significant estimates and assumptions. We forecast discounted future cash flows at the reporting unit level using risk-adjusted discount rates and estimated future revenues and operating costs, which take into consideration factors such as existing backlog, expected future orders, supplier contracts, and expectations of competitive and economic environments. We also identify similar publicly traded companies and develop a correlation, referred to as a multiple, to apply to the operating results of the reporting units. These combined fair values are then reconciled to the aggregate market value of our common stock on the date of valuation, while considering a reasonable control premium.

Based on our qualitative analysis as of October 1, 2013, we determined that it was more likely than not that the fair value of the Gas and Water reporting units exceeded their respective carrying values. As a result, it was not necessary to complete the two-step impairment test for those reporting units. However, during the fourth quarter of 2013 in conjunction with our annual goodwill impairment test, we recognized a goodwill impairment of \$173.2 million in our Electricity reporting unit as the result of delays in global smart grid projects and lower volumes and pricing pressures in certain regions in Europe and Asia/Pacific. The revised forecast for the Electricity business drove a decrease in the fair value of the reporting unit. The goodwill impairment did not impact the debt covenant compliance under our existing credit facility.

The goodwill balance in the Electricity reporting unit before and after the goodwill impairment was as follows:

Reporting Unit	Before Impairment	Impairment	After Impairment
	(in thousands)		
Electricity	\$ 231,894	\$ 173,249	\$ 58,645

Changes in market demand, fluctuations in the economies in which we operate, the volatility and decline in the worldwide equity markets, and a further decline in our market capitalization could negatively impact the remaining carrying value of our goodwill, which could have a significant effect on our current and future results of operations and financial condition.

Derivative Instruments

All derivative instruments, whether designated in hedging relationships or not, are recorded on the Consolidated Balance Sheets at fair value as either assets or liabilities. The components and fair values of our derivative instruments are determined using the fair value measurements of significant other observable inputs (also known as "Level 2"), as defined by U.S. generally accepted accounting principles. We include the effect of our counterparty credit risk based on current published credit default swap rates when the net fair value of our derivative instruments is in a net asset position and the effect of our own nonperformance risk when the net fair value of our derivative instruments is in a net liability position. Level 2 inputs consist of quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in non-active markets; and model-derived valuations in which significant inputs are corroborated by observable market data either directly or indirectly through correlation or other means (inputs may include yield curves, volatility, credit risks, and default rates). Derivatives are not used for trading or speculative purposes. Our derivatives are with credit-worthy multinational financial institutions, with whom we have master netting agreements; however, our derivative positions are not recorded on a net basis in the consolidated balance sheets. There are no credit-risk-related contingent features within our derivative instruments.

Defined Benefit Pension Plans

We sponsor both funded and unfunded defined benefit pension plans for our international employees, primarily in Germany, France, Italy, Indonesia, Brazil, and Spain. We recognize a liability for the projected benefit obligation in excess of plan assets or an asset for plan assets in excess of the projected benefit obligation. We also recognize the funded status of our defined benefit

pension plans on our Consolidated Balance Sheets and recognize as a component of other comprehensive income (loss) (OCI), net of tax, the actuarial gains or losses and prior service costs or credits, if any, that arise during the period but are not recognized as components of net periodic benefit cost.

Several economic assumptions and actuarial data are used in calculating the expense and obligations related to these plans. The assumptions are updated annually at December 31 and include the discount rate, the expected remaining service life, the expected rate of return on plan assets, and the rate of future compensation increase. The discount rate is a significant assumption used to value our pension benefit obligation. We determine a discount rate for our plans based on the estimated duration of each plan's liabilities. For our euro denominated defined benefit pension plans, which represent 95% of our benefit obligation, we use three discount rates, with consideration of the duration of the plans, using a hypothetical yield curve developed from euro-denominated AA-rated corporate bond issues, partially weighted for market value, with minimum amounts outstanding of €250 million for bonds with less than 10 years to maturity and €50 million for bonds with 10 or more years to maturity, and excluding the highest and lowest yielding 10% of bonds within each maturity group. The discount rates used, depending on the duration of the plans, were 2.75%, 3.25% and 3.50%, respectively. The weighted average discount rate used to measure the projected benefit obligation for all of the plans at December 31, 2013 was 3.76%. A change of 25 basis points in the discount rate would change our pension benefit obligation by approximately \$3.5 million. The financial and actuarial assumptions used at December 31, 2013 may differ materially from actual results due to changing market and economic conditions and other factors. These differences could result in a significant change in the amount of pension expense recorded in future periods. Gains and losses resulting from changes in actuarial assumptions, including the discount rate, are recognized in OCI in the period in which they occur.

Our general funding policy for these qualified pension plans is to contribute amounts at least sufficient to satisfy funding standards of the respective countries for each plan. Refer to Item 8: "Financial Statements and Supplementary Data, Note 8: Defined Benefit Pension Plans" included in this Annual Report on Form 10-K for our expected contributions for 2014.

Contingencies

A loss contingency is recorded if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. We evaluate, among other factors, the degree of probability of an unfavorable outcome and our ability to make a reasonable estimate of the amount of the ultimate loss. Loss contingencies that we determine to be reasonably possible, but not probable, are disclosed but not recorded. Changes in these factors and related estimates could materially affect our financial position and results of operations. Legal costs to defend against contingent liabilities are expensed as incurred.

Stock-Based Compensation

We measure and recognize compensation expense for all stock-based awards made to employees and directors, including awards of stock options, stock sold pursuant to our Employee Stock Purchase Plan (ESPP), and the issuance of restricted stock units and unrestricted stock awards, based on estimated fair values. The fair value of stock options is estimated at the date of grant using the Black-Scholes option-pricing model, which includes assumptions for the dividend yield, expected volatility, risk-free interest rate, and expected term. The fair value of restricted stock units with a market condition is estimated at the date of award using a Monte Carlo simulation model, which includes assumptions for the dividend yield, expected volatility, risk-free interest rate and the expected term. In valuing our stock options and restricted stock units with a market condition, significant judgment is required in determining the expected volatility of our common stock and the expected term that individuals will hold their stock options prior to exercising. Expected volatility for stock options is based on the historical and implied volatility of our own common stock while the volatility for our restricted stock units with a market condition is based on the historical volatility of our own stock and the stock for companies comprising the market index within the market condition. The expected term of stock option grants is derived from the historical actual term of option grants and an estimate of future exercises during the remaining contractual period of the option. While volatility and estimated life are assumptions that do not bear the risk of change subsequent to the grant date of stock options, these assumptions may be difficult to measure as they represent future expectations based on historical experience. Further, our expected volatility and expected life may change in the future, which could substantially change the grant-date fair value of future awards of stock options and ultimately the expense we record. For ESPP awards, the fair value is the difference between the market close price of our common stock on the date of purchase and the discounted purchase price. For restricted stock units without a market condition and unrestricted stock awards, the fair value is the market close price of our common stock on the date of grant. We consider many factors when estimating expected forfeitures, including types of awards, employee class, and historical experience. Actual results and future estimates may differ substantially from our current estimates. We expense stock-based compensation at the date of grant for unrestricted stock awards. For awards with only a service condition, we expense stock-based compensation, adjusted for estimated forfeitures, using the straight-line method over the requisite service period for the entire award. For awards with both performance and service conditions, we expense the stock-based compensation, adjusted for estimated forfeitures, on a straight-line basis over the requisite service period for each separately vesting portion of the award. Excess tax benefits are credited to common stock when the deduction reduces cash taxes payable. When we have tax deductions in excess of the compensation cost, they are classified as financing cash inflows in the Consolidated Statements of Cash Flows.

Effective October 1, 2013, we changed the terms of the ESPP to reduce the discount to 5% from the fair market value of the stock at the end of each fiscal quarter. As a result of this change, the ESPP is no longer considered compensatory, and no compensation expense is recognized for sales of our common stock to employees.

ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business, we are exposed to interest rate and foreign currency exchange rate risks that could impact our financial position and results of operations. As part of our risk management strategy, we may use derivative financial instruments to hedge certain foreign currency and interest rate exposures. Our objective is to offset gains and losses resulting from these exposures with losses and gains on the derivative contracts used to hedge them, therefore reducing the impact of volatility on earnings or protecting the fair values of assets and liabilities. We use derivative contracts only to manage existing underlying exposures. Accordingly, we do not use derivative contracts for trading or speculative purposes.

Interest Rate Risk

We are exposed to interest rate risk through our variable rate debt instruments. In May 2012, we entered into six forward starting pay-fixed receive one-month LIBOR interest rate swaps. The interest rate swaps convert \$200 million of our LIBOR based debt from a floating LIBOR interest rate to a fixed interest rate of 1.00% (excluding the applicable margin on the debt) and are effective July 31, 2013 to August 8, 2016.

The table below provides information about our financial instruments that are sensitive to changes in interest rates and the scheduled minimum repayment of principal and estimated cash interest payments over the remaining lives of our debt at December 31, 2013. Weighted average variable rates in the table are based on implied forward rates in the Reuters U.S. dollar yield curve as of December 31, 2013 and our estimated leverage ratio, which determines our additional interest rate margin at December 31, 2013.

	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>	<u>2018</u>	<u>Total</u>	<u>Fair Value</u>
	(in thousands)						
<i>Variable Rate Debt</i>							
Principal: U.S. dollar term loan	\$ 26,250	\$ 30,000	\$ 202,500	\$ —	\$ —	\$ 258,750	\$ 258,011
Average interest rate	1.73 %	2.06 %	2.86%	—%	—%		
Principal: Multicurrency revolving line of credit	\$ —	\$ —	\$ 120,000	\$ —	\$ —	\$ 120,000	\$ 119,609
Average interest rate	1.73 %	2.06 %	2.86%	—%	—%		
<i>Interest rate swap on LIBOR based debt</i>							
Average interest rate (pay)	1.00 %	1.00 %	1.00%	—%	—%		
Average interest rate (receive)	0.23 %	0.56 %	1.36%	—%	—%		
Net/spread	(0.77)%	(0.44)%	0.36%	—%	—%		

Based on a sensitivity analysis as of December 31, 2013, we estimate that, if market interest rates average one percentage point higher in 2013 than in the table above, our financial results in 2013 would not be materially impacted.

We continually monitor and assess our interest rate risk and may institute additional interest rate swaps or other derivative instruments to manage such risk in the future.

Foreign Currency Exchange Rate Risk

We conduct business in a number of countries. As a result, over half of our revenues and operating expenses are denominated in foreign currencies, which expose our account balances to movements in foreign currency exchange rates that could have a material effect on our financial results. Our primary foreign currency exposure relates to non-U.S. dollar denominated transactions in our international subsidiary operations, the most significant of which is the euro. Revenues denominated in functional currencies other than the U.S. dollar was 59% of total revenues for the year ended December 31, 2013, compared with 59% and 58% for the years ended December 31, 2012 and 2011, respectively.

We are also exposed to foreign exchange risk when we enter into non-functional currency transactions, both intercompany and third-party. At each period-end, foreign currency monetary assets and liabilities are revalued with the change recorded to other income and expense. We enter into monthly foreign exchange forward contracts (a total of 528 contracts were entered into during the year ended December 31, 2013), not designated for hedge accounting, with the intent to reduce earnings volatility associated

with certain of these balances. The notional amounts of the contracts ranged from \$251,000 to \$12.0 million, offsetting our exposures from the euro, British pound, Canadian dollar, Australian dollar, Brazilian real, and various other currencies.

In future periods, we may use additional derivative contracts to protect against foreign currency exchange rate risks.

ITEM 8: FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF MANAGEMENT

To the Board of Directors and Shareholders of Itron, Inc.

Management is responsible for the preparation of our consolidated financial statements and related information appearing in this Annual Report on Form 10-K. Management believes that the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements reasonably present our results of operations, financial position, and cash flows in conformity with U.S. generally accepted accounting principles. Management has included in our financial statements amounts based on estimates and judgments that it believes are reasonable under the circumstances.

Management's explanation and interpretation of our overall operating results and financial position, with the basic financial statements presented, should be read in conjunction with the entire report. The notes to the consolidated financial statements, an integral part of the basic financial statements, provide additional detailed financial information. Our Board of Directors has an Audit/Finance Committee composed of independent directors. The Committee meets regularly with financial management and Ernst & Young LLP to review internal control, auditing, and financial reporting matters.

Philip C. Mezey
President and Chief Executive Officer

Steven M. Helmbrecht
Executive Vice President and Chief Financial Officer

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Itron, Inc.

We have audited the accompanying consolidated balance sheets of Itron, Inc. as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income (loss), equity and cash flows for each of the three years in the period ended December 31, 2013. Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Itron, Inc. at December 31, 2013 and 2012, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Itron, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated February 25, 2014 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

ITRON, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2013

In this Annual Report, the terms “we,” “us,” “our,” “Itron,” and the “Company” refer to Itron, Inc.

Note 1: Summary of Significant Accounting Policies

We were incorporated in the state of Washington in 1977. We provide a portfolio of solutions to utilities for the electricity, gas, and water markets throughout the world.

Financial Statement Preparation

The consolidated financial statements presented in this Annual Report include the Consolidated Statements of Operations, Comprehensive Income (Loss), Equity, and Cash Flows for the years ended December 31, 2013, 2012, and 2011 and the Consolidated Balance Sheets as of December 31, 2013 and 2012 of Itron, Inc. and its subsidiaries.

Basis of Consolidation

We consolidate all entities in which we have a greater than 50% ownership interest or in which we exercise control over the operations. We use the equity method of accounting for entities in which we have a 50% or less investment and exercise significant influence. Entities in which we have less than a 20% investment and where we do not exercise significant influence are accounted for under the cost method. Intercompany transactions and balances are eliminated upon consolidation.

Noncontrolling Interests

In several of our consolidated international subsidiaries, we have joint venture partners, who are minority shareholders. Although these entities are not wholly-owned by Itron, we consolidate them because we have a greater than 50% ownership interest or because we exercise control over the operations. The noncontrolling interest balance is adjusted each period to reflect the allocation of net income (loss) and other comprehensive income (loss) attributable to the noncontrolling interests, as shown in our Consolidated Statements of Operations and our Consolidated Statements of Comprehensive Income (Loss). The noncontrolling interest balance in our Consolidated Balance Sheets represents the proportional share of the equity of the joint venture entities, which is attributable to the minority shareholders.

Business Acquisitions

On May 1, 2012, we completed the acquisition of SmartSynch, Inc. (SmartSynch). SmartSynch was a provider of smart grid solutions that utilize cellular networks for communications.

In January 2011, we completed the acquisition of Asais S.A.S. and Asais Conseil S.A.S. (collectively Asais), an energy information management software and consulting services provider located in France. The acquisition consisted of cash and contingent consideration. Additional acquisitions were completed in 2011. This acquisition was immaterial to our financial position, results of operations, and cash flows. (See *Business Combinations* policy below.)

Cash and Cash Equivalents

We consider all highly liquid instruments with remaining maturities of three months or less at the date of acquisition to be cash equivalents.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are recorded for invoices issued to customers in accordance with our contractual arrangements. Interest and late payment fees are minimal. Unbilled receivables are recorded when revenues are recognized upon product shipment or service delivery and invoicing occurs at a later date. We record an allowance for doubtful accounts representing our estimate of the probable losses in accounts receivable at the date of the balance sheet based on our historical experience of bad debts and our specific review of outstanding receivables. Accounts receivable are written-off against the allowance when we believe an account, or a portion thereof, is no longer collectible.

Inventories

Inventories are stated at the lower of cost or market using the first-in, first-out method. Cost includes raw materials and labor, plus applied direct and indirect costs.

Derivative Instruments

All derivative instruments, whether designated in hedging relationships or not, are recorded on the Consolidated Balance Sheets at fair value as either assets or liabilities. The components and fair values of our derivative instruments are determined using the fair value measurements of significant other observable inputs (Level 2), as defined by GAAP. The net fair value of our derivative instruments may switch between a net asset and a net liability depending on market circumstances at the end of the period. We include the effect of our counterparty credit risk based on current published credit default swap rates when the net fair value of our derivative instruments are in a net asset position and the effect of our own nonperformance risk when the net fair value of our derivative instruments are in a net liability position.

For any derivative designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. For any derivative designated as a cash flow hedge, the effective portions of changes in the fair value of the derivative are recorded as a component of other comprehensive income (loss) (OCI) and are recognized in earnings when the hedged item affects earnings. Ineffective portions of cash flow hedges are recognized in other income (expense) in the Consolidated Statements of Operations. For a hedge of a net investment, the effective portion of any unrealized gain or loss from the foreign currency revaluation of the hedging instrument is reported in OCI as a net unrealized gain or loss on derivative instruments. Upon termination of a net investment hedge, the net derivative gain/loss will remain in accumulated OCI until such time when earnings are impacted by a sale or liquidation of the associated operations. Ineffective portions of fair value changes or the changes in fair value of derivative instruments that do not qualify for hedging activities are recognized in other income (expense) in the Consolidated Statements of Operations. We classify cash flows from our derivative programs as cash flows from operating activities in the Consolidated Statements of Cash Flows.

Derivatives are not used for trading or speculative purposes. Our derivatives are with credit worthy multinational commercial banks, with whom we have master netting agreements; however, our derivative positions are not recorded on a net basis in the consolidated balance sheets. There are no credit-risk-related contingent features within our derivative instruments. Refer to Note 7 and Note 14 for further disclosures of our derivative instruments and their impact on OCI.

Property, Plant, and Equipment

Property, plant, and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally 30 years for buildings and improvements and three to ten years for machinery and equipment, computers and software, and furniture. Leasehold improvements are capitalized and depreciated over the term of the applicable lease, including renewable periods if reasonably assured, or over the useful lives, whichever is shorter. Construction in process represents capital expenditures incurred for assets not yet placed in service. Costs related to internally developed software and software purchased for internal uses are capitalized and are amortized over the estimated useful lives of the assets. Repair and maintenance costs are expensed as incurred. We have no major planned maintenance activities.

We review long-lived assets for impairment whenever events or circumstances indicate the carrying amount of an asset group may not be recoverable. Assets held for sale are classified within other current assets in the Consolidated Balance Sheets, are reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. Gains and losses from asset disposals and impairment losses are classified within the Consolidated Statement of Operations according to the use of the asset, except those gains and losses recognized in conjunction with our restructuring activities, which are classified within restructuring expense.

Prepaid Debt Fees

Prepaid debt fees represent the capitalized direct costs incurred related to the issuance of debt and are recorded as noncurrent assets. These costs are amortized to interest expense over the terms of the respective borrowings, including contingent maturity or call features, using the effective interest method, or straight-line method when associated with a revolving credit facility. When debt is repaid early, the related portion of unamortized prepaid debt fees is written-off and included in interest expense.

Business Combinations

On the date of acquisition, the assets acquired, liabilities assumed, and any noncontrolling interests in the acquiree are recorded at their fair values. The acquiree's results of operations are also included as of the date of acquisition in our consolidated results. Intangible assets that arise from contractual/legal rights, or are capable of being separated, as well as in-process research and development (IPR&D), are measured and recorded at fair value, and amortized over the estimated useful life. IPR&D is not amortized until such time as the associated development projects are completed or terminated. If a development project is completed, the IPR&D is reclassified as a core technology intangible asset and amortized over its estimated useful life. If the development project is terminated, the recorded value of the associated IPR&D is immediately expensed. If practicable, assets acquired and liabilities assumed arising from contingencies are measured and recorded at fair value. If not practicable, such assets and liabilities are measured and recorded when it is probable that a gain or loss has occurred and the amount can be reasonably estimated. The residual balance of the purchase price, after fair value allocations to all identified assets and liabilities, represents goodwill. Acquisition-related costs are expensed as incurred. Restructuring costs associated with an acquisition are generally expensed in periods subsequent to the acquisition date, and changes in deferred tax asset valuation allowances and acquired income tax uncertainties, including penalties and interest, after the measurement period are recognized as a component of the provision for income taxes. Our acquisitions may include contingent consideration, which require us to recognize the fair value of the estimated liability at the time of the acquisition. Subsequent changes in the estimate of the amount to be paid under the contingent consideration arrangement are recognized in the consolidated statements of operations. Cash payments for contingent or deferred consideration are classified within cash flows from investing activities within the consolidated statements of cash flows.

Goodwill and Intangible Assets

Goodwill and intangible assets may result from our acquisitions. We use estimates, including estimates of useful lives of intangible assets, the amount and timing of related future cash flows, and fair values of the related operations, in determining the value assigned to goodwill and intangible assets. Our finite-lived intangible assets are amortized over their estimated useful lives based on estimated discounted cash flows. IPR&D is considered an indefinite-lived intangible asset and is not subject to amortization until the associated projects are completed or terminated. Intangible assets are tested for impairment at the asset group level when events or changes in circumstances indicate the carrying value may not be recoverable. Indefinite-lived intangible assets are tested for impairment annually, when events or changes in circumstances indicate the asset may be impaired, or at the time when their useful lives are determined to no longer be indefinite.

Goodwill is assigned to our reporting units based on the expected benefit from the synergies arising from each business combination, determined by using certain financial metrics, including the forecasted discounted cash flows associated with each reporting unit. Prior to 2012, we had four reporting units: Itron North America (INA), Itron International (INL) Electricity, INL Gas, and INL Water. Effective January 1, 2012, we changed to three reporting units, which are Electricity, Gas, and Water. Each reporting unit corresponds with its respective operating segment, effective in the fourth quarter of 2013.

We test goodwill for impairment each year as of October 1, or more frequently should a significant impairment indicator occur. As part of the impairment test, we may elect to perform an assessment of qualitative factors. If this qualitative assessment indicates that it is more likely than not that the fair value of a reporting unit, including goodwill, is less than its carrying amount, or if we elect to bypass the qualitative assessment, we would then proceed with the two-step impairment test. The impairment test involves comparing the fair values of the reporting units to their carrying amounts. If the carrying amount of a reporting unit exceeds its fair value, a second step is required to measure the goodwill impairment loss amount. This second step determines the current fair values of all assets and liabilities of the reporting unit and then compares the implied fair value of the reporting unit's goodwill to the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of the goodwill, an impairment loss is recognized in an amount equal to the excess.

Determining the fair value of a reporting unit is judgmental in nature and involves the use of significant estimates and assumptions. We forecast discounted future cash flows at the reporting unit level using risk-adjusted discount rates and estimated future revenues and operating costs, which take into consideration factors such as existing backlog, expected future orders, supplier contracts, and expectations of competitive and economic environments. We also identify similar publicly traded companies and develop a correlation, referred to as a multiple, to apply to the operating results of the reporting units. These combined fair values are then reconciled to the aggregate market value of our common stock on the date of valuation, while considering a reasonable control premium.

Contingencies

A loss contingency is recorded if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. We evaluate, among other factors, the degree of probability of an unfavorable outcome and our ability to make a reasonable estimate of the amount of the ultimate loss. Loss contingencies that we determine to be reasonably possible, but not probable, are disclosed but not recorded. Changes in these factors and related estimates could materially affect our financial position and results of operations. Legal costs to defend against contingent liabilities are expensed as incurred.

Bonus and Profit Sharing

We have various employee bonus and profit sharing plans, which provide award amounts for the achievement of annual financial and nonfinancial targets. If management determines it is probable that the targets will be achieved, and the amounts can be reasonably estimated, a compensation accrual is recorded based on the proportional achievement of the financial and nonfinancial targets. Although we monitor and accrue expenses quarterly based on our progress toward the achievement of the annual targets, the actual results at the end of the year may result in awards that are significantly greater or less than the estimates made in earlier quarters.

Warranty

We offer standard warranties on our hardware products and large application software products. We accrue the estimated cost of new product warranties based on historical and projected product performance trends and costs during the warranty period. Testing of new products in the development stage helps identify and correct potential warranty issues prior to manufacturing. Quality control efforts during manufacturing reduce our exposure to warranty claims. When our quality control efforts fail to detect a fault in one of our products, we experience an increase in warranty claims. We track warranty claims to identify potential warranty trends. If an unusual trend is noted, an additional warranty accrual would be recorded if a failure event is probable and the cost can be reasonably estimated. When new products are introduced, our process relies on historical averages of similar products until sufficient data are available. As actual experience becomes available, it is used to modify the original estimate to ensure the expected warranty costs are within a range of likely outcomes. Management regularly evaluates the sufficiency of the warranty provisions and makes adjustments when necessary. The warranty allowances may fluctuate due to higher than anticipated material, labor, and other costs we may incur to repair or replace projected product failures, and we may incur additional warranty and related expenses in the future with respect to new or established products, which could adversely affect our financial position and results of operations. The long-term warranty balance includes estimated warranty claims beyond one year. Warranty expense is classified within cost of revenues.

Restructuring and Asset Impairments

We record a liability for costs associated with an exit or disposal activity at its fair value in the period in which the liability is incurred. Employee termination benefits considered postemployment benefits are accrued when the obligation is probable and estimable, such as benefits stipulated by human resource policies and practices or statutory requirements. One-time termination benefits are expensed at the date the employee is notified. If the employee must provide future service greater than 60 days, such benefits are expensed ratably over the future service period. For contract termination costs, we record a liability upon the latter of when we terminate a contract in accordance with the contract terms or when we cease using the rights conveyed by the contract.

Asset impairments are determined at the asset group level. An impairment may be recorded for assets that are to be abandoned, are to be sold for less than net book value, or are held for sale in which the estimated proceeds less costs to sell are less than the net book value. We may also recognize impairment on an asset group, which is held and used, when the carrying value is not recoverable and exceeds the asset group's fair value. If an asset group is considered a business, a portion of our goodwill balance is allocated to it based on relative fair value.

Defined Benefit Pension Plans

We sponsor both funded and unfunded defined benefit pension plans for certain international employees. We recognize a liability for the projected benefit obligation in excess of plan assets or an asset for plan assets in excess of the projected benefit obligation. We also recognize the funded status of our defined benefit pension plans on our Consolidated Balance Sheets and recognize as a component of OCI, net of tax, the actuarial gains or losses and prior service costs or credits, if any, that arise during the period but that are not recognized as components of net periodic benefit cost.

Share Repurchase Plan

From time to time, we may repurchase shares of Itron common stock under programs authorized by our Board of Directors. Share repurchases are made in the open market or in privately negotiated transactions and in accordance with applicable securities laws. Under applicable Washington State law, shares repurchased are retired and not displayed separately as treasury stock on the financial statements; the value of the repurchased shares is deducted from common stock.

Revenue Recognition

Revenues consist primarily of hardware sales, software license fees, software implementation, project management services, installation, consulting, and post-sale maintenance support. Revenues are recognized when (1) persuasive evidence of an arrangement exists, (2) delivery has occurred or services have been rendered, (3) the sales price is fixed or determinable, and (4) collectability is reasonably assured.

The majority of our revenue arrangements involve multiple deliverables, which combine two or more of the following: hardware, meter reading system software, installation, and/or project management services. Revenue arrangements with multiple deliverables are divided into separate units of accounting if the delivered item(s) has value to the customer on a standalone basis and delivery/performance of the undelivered item(s) is probable. The total arrangement consideration is allocated among the separate units of accounting based on their relative fair values and the applicable revenue recognition criteria considered for each unit of accounting. The amount allocable to a delivered item is limited to the amount that we are entitled to collect and that is not contingent upon the delivery/performance of additional items. Revenues for each deliverable are then recognized based on the type of deliverable, such as 1) when the products are shipped, 2) services are delivered, 3) percentage-of-completion when implementation services are essential to other deliverables in the arrangement, 4) upon receipt of customer acceptance, or 5) transfer of title and risk of loss. The majority of our revenue is recognized when products are shipped to or received by a customer or when services are provided.

Hardware revenues are recognized at the time of shipment, receipt by the customer, or, if applicable, upon completion of customer acceptance provisions.

Generally, network software revenue is recognized when shipped if all other revenue recognition criteria are met and services are not essential to the functionality of the software. If implementation services are essential to the functionality of the network software, software and implementation revenues are recognized using the percentage-of-completion methodology of contract accounting when project costs are reliably estimated.

If the data collection system does not use standard internet protocols and network design services are deemed complex and extensive, revenue from network software and services is recognized using the units-of-delivery method of contract accounting, as network design services and network software are essential to the functionality of the related hardware (network). This methodology results in the deferral of costs and revenues as professional services and software implementation commence prior to deployment of hardware.

In the unusual instances when we are unable to reliably estimate the cost to complete a contract at its inception, we use the completed contract method of contract accounting. Revenues and costs are recognized upon substantial completion when remaining costs are insignificant and potential risks are minimal.

Under contract accounting, if we estimate that the completion of a contract component (unit of accounting) will result in a loss, the loss is recognized in the period in which it is estimated. We reevaluate the estimated loss through the completion of the contract component, and adjust the estimated loss for changes in facts and circumstances.

We also enter into multiple deliverable software arrangements that do not include hardware. For this type of arrangement, revenue recognition is dependent upon the availability of vendor specific objective evidence (VSOE) of fair value for each of the deliverables. The lack of VSOE, or the existence of extended payment terms or other inherent risks, may affect the timing of revenue recognition for multiple deliverable software arrangements.

Certain of our revenue arrangements include an extended or noncustomary warranty provision that covers all or a portion of a customer's replacement or repair costs beyond the standard or customary warranty period. Whether or not the extended warranty is separately priced in the arrangement, a portion of the arrangement's total consideration is allocated to this extended warranty deliverable. This revenue is deferred and recognized over the extended warranty coverage period. Extended or noncustomary warranties do not represent a significant portion of our revenue.

We allocate consideration to each deliverable in an arrangement based on its relative selling price. We determine selling price using VSOE, if it exists, otherwise we use third-party evidence (TPE). We define VSOE as a median price of recent standalone transactions that are priced within a narrow range. TPE is determined based on the prices charged by our competitors for a similar deliverable when sold separately. If neither VSOE nor TPE of selling price exists for a unit of accounting, we use estimated selling price (ESP) to determine the price at which we would transact if the product or service were regularly sold by us on a standalone basis. Our determination of ESP involves a weighting of several factors based on the specific facts and circumstances of the arrangement. The factors considered include the cost to produce the deliverable, the anticipated margin on that deliverable, our ongoing pricing strategy and policies, and the characteristics of the varying markets in which the deliverable is sold.

We analyze the selling prices used in our allocation of arrangement consideration on an annual basis. Selling prices are analyzed on a more frequent basis if a significant change in our business necessitates a more timely analysis or if we experience significant variances in our selling prices.

Unearned revenue is recorded when a customer pays for products or services, but the criteria for revenue recognition have not been met as of the balance sheet date. Unearned revenues of \$69.8 million and \$74.9 million at December 31, 2013 and 2012 related primarily to professional services and software associated with our smart metering contracts, extended or noncustomary warranty, and prepaid post-contract support. Deferred costs are recorded for products or services for which ownership (typically defined as title and risk of loss) has transferred to the customer, but the criteria for revenue recognition have not been met as of the balance sheet date. Deferred costs were \$23.5 million and \$24.4 million at December 31, 2013 and 2012 and are recorded within other assets in the Consolidated Balance Sheets.

Hardware and software post-sale maintenance support fees are recognized ratably over the life of the related service contract. Shipping and handling costs and incidental expenses billed to customers are recorded as revenue, with the associated cost charged to cost of revenues. We record sales, use, and value added taxes billed to our customers on a net basis.

Product and Software Development Costs

Product and software development costs primarily include employee compensation and third party contracting fees. We do not capitalize product development costs, and we do not generally capitalize software development expenses as the costs incurred are immaterial for the relatively short period of time between technological feasibility and the completion of software development.

Stock-Based Compensation

We measure and recognize compensation expense for all stock-based awards made to employees and directors, including stock options, stock sold pursuant to our Employee Stock Purchase Plan (ESPP), and the issuance of restricted stock units and unrestricted stock awards, based on estimated fair values. The fair value of stock options is estimated at the date of grant using the Black-Scholes option-pricing model, which includes assumptions for the dividend yield, expected volatility, risk-free interest rate, and expected term. For ESPP awards, the fair value is the difference between the market close price of our common stock on the date of purchase and the discounted purchase price. For performance-based restricted stock units and unrestricted stock awards with no market conditions, the fair value is the market close price of our common stock on the date of grant. For restricted stock units with market conditions, the fair value is estimated at the date of award using a Monte Carlo simulation model, which includes assumptions for dividend yield and expected volatility for our common stock and the common stock for companies within the Russell 3000 index, as well as the risk-free interest rate and expected term of the awards. We expense stock-based compensation at the date of grant for unrestricted stock awards. For awards with only a service condition, we expense stock-based compensation, adjusted for estimated forfeitures, using the straight-line method over the requisite service period for the entire award. For awards with performance and service conditions, if vesting is probable, we expense the stock-based compensation, adjusted for estimated forfeitures, on a straight-line basis over the requisite service period for each separately vesting portion of the award. For awards with a market condition, we expense the fair value over the requisite service period. Excess tax benefits are credited to common stock when the deduction reduces cash taxes payable. When we have tax deductions in excess of the compensation cost, they are classified as financing cash inflows in the Consolidated Statements of Cash Flows.

Effective October 1, 2013, we changed the terms of the ESPP to reduce the discount to 5% from the fair market value of the stock at the end of each fiscal quarter. As a result of this change, the ESPP is no longer considered compensatory, and no compensation expense is recognized for sales of our common stock to employees.

Income Taxes

We account for income taxes using the asset and liability method of accounting. Deferred tax assets and liabilities are recognized based upon anticipated future tax consequences, in each of the jurisdictions that we operate, attributable to: (1) the differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases; and (2) net operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The calculation of our tax liabilities involves applying complex tax regulations in different tax jurisdictions to our tax positions. The effect on deferred tax assets and liabilities of a change in tax legislation and/or rates is recognized in the period that includes the enactment date. A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets if it is not more likely than not that such assets will be realized. We do not record tax liabilities on undistributed earnings of international subsidiaries that are permanently reinvested.

Foreign Exchange

Our consolidated financial statements are reported in U.S. dollars. Assets and liabilities of international subsidiaries with non-U.S. dollar functional currencies are translated to U.S. dollars at the exchange rates in effect on the balance sheet date, or the last business day of the period, if applicable. Revenues and expenses for each subsidiary are translated to U.S. dollars using a weighted average rate for the relevant reporting period. Translation adjustments resulting from this process are included, net of tax, in OCI. Gains and losses that arise from exchange rate fluctuations for monetary asset and liability balances that are not denominated in an entity's functional currency are included within other income (expense), net in the Consolidated Statements of Operations. Currency gains and losses of intercompany balances deemed to be long-term in nature or designated as a hedge of the net investment in international subsidiaries are included, net of tax, in OCI.

Fair Value Measurements

For assets and liabilities measured at fair value, the GAAP fair value hierarchy prioritizes the inputs used in different valuation methodologies, assigning the highest priority to unadjusted quoted prices for identical assets and liabilities in actively traded markets (Level 1) and the lowest priority to unobservable inputs (Level 3). Level 2 inputs consist of quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in non-active markets; and model-derived valuations in which significant inputs are corroborated by observable market data either directly or indirectly through correlation or other means. Inputs may include yield curves, volatility, credit risks, and default rates.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Due to various factors affecting future costs and operations, actual results could differ materially from these estimates.

New Accounting Pronouncements

The Financial Accounting Standards Board issued Accounting Standards Update (ASU) 2013.11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists* on July 18, 2013. The ASU requires that an unrecognized tax benefit should be presented as a reduction of a deferred tax asset when settlement in this manner is available under the law. We adopted this amendment as of January 1, 2014. The result of adoption will be to reclassify certain long-term liabilities to long-term deferred tax assets, and the adoption will not result in a change to the tax provision. We do not believe that the impact on the balance sheet will be material.

Note 2: Earnings (Loss) Per Share and Capital Structure

The following table sets forth the computation of basic and diluted earnings (loss) per share (EPS):

	Year Ended December 31,		
	2013	2012	2011
	(in thousands, except per share data)		
Net income (loss) available to common shareholders	\$ (146,809)	\$ 108,275	\$ (510,157)
Weighted average common shares outstanding - Basic	39,281	39,625	40,612
Dilutive effect of stock-based awards	—	309	—
Weighted average common shares outstanding - Diluted	39,281	39,934	40,612
Earnings (loss) per common share - Basic	\$ (3.74)	\$ 2.73	\$ (12.56)
Earnings (loss) per common share - Diluted	\$ (3.74)	\$ 2.71	\$ (12.56)

Stock-based Awards

For stock-based awards, the dilutive effect is calculated using the treasury stock method. Under this method, the dilutive effect is computed as if the awards were exercised at the beginning of the period (or at time of issuance, if later) and assumes the related proceeds were used to repurchase common stock at the average market price during the period. Related proceeds include the amount the employee must pay upon exercise, future compensation cost associated with the stock award, and the amount of excess tax benefits, if any. As a result of our net losses for 2013 and 2011, there was no dilutive effect to the weighted average common shares outstanding for these years. Approximately 1.4 million, 1.1 million, and 1.3 million stock-based awards were excluded from the calculation of diluted EPS for the years ended December 31, 2013, 2012, and 2011, respectively, because they were anti-dilutive. These stock-based awards could be dilutive in future periods.

Preferred Stock

We have authorized the issuance of 10 million shares of preferred stock with no par value. In the event of a liquidation, dissolution, or winding up of the affairs of the corporation, whether voluntary or involuntary, the holders of any outstanding preferred stock will be entitled to be paid a preferential amount per share to be determined by the Board of Directors prior to any payment to holders of common stock. There was no preferred stock issued or outstanding at December 31, 2013, 2012, and 2011.

Stock Repurchase Plan

On March 8, 2013, the Board authorized a twelve-month repurchase program of up to \$50 million in shares of our common stock. From March 8, 2013 through December 31, 2013, we have repurchased approximately 645,000 shares of our common stock, totaling \$27.0 million, with \$23.0 million remaining under the repurchase program. Repurchases are made in the open market or in privately negotiated transactions and in accordance with applicable securities laws.

Note 3: Certain Balance Sheet Components*Accounts receivable, net*

	December 31, 2013	December 31, 2012
	(in thousands)	
Trade receivables (net of allowance of \$8,368 and \$7,372)	\$ 328,240	\$ 329,352
Unbilled receivables	28,469	45,974
Total accounts receivable, net	\$ 356,709	\$ 375,326

At December 31, 2013 and 2012, \$3.2 million and \$20.0 million were recorded within trade receivables as billed but not yet paid by customers in accordance with contract retainage provisions. At December 31, 2013 and 2012, contract retainage amounts that were unbilled and classified as unbilled receivables were \$4.3 million and \$11.1 million. These contract retainage amounts within trade receivables and unbilled receivables are expected to be collected within the following 12 months.

At December 31, 2013, long-term unbilled receivables totaled \$4.7 million. These long-term unbilled receivables are classified within other long-term assets, as collection is not anticipated within the following 12 months. We had no long-term billed contract retainage receivables at December 31, 2013, as we expect to collect all contract retainage receivables within the following 12 months. We had no long-term unbilled receivables or long-term billed contract retainage receivables at December 31, 2012.

Allowance for doubtful account activity

	Year Ended December 31,	
	2013	2012
	(in thousands)	
Beginning balance	\$ 7,372	\$ 6,049
Provision of doubtful accounts, net	1,740	1,851
Accounts written-off	(636)	(595)
Effects of change in exchange rates	(108)	67
Ending balance	<u>\$ 8,368</u>	<u>\$ 7,372</u>

Inventories

	December 31, 2013	December 31, 2012
		(in thousands)
Materials	\$ 102,596	\$ 92,038
Work in process	13,770	12,568
Finished goods	61,101	66,113
Total inventories	<u>\$ 177,467</u>	<u>\$ 170,719</u>

Our inventory levels may vary period to period as a result of our factory scheduling and the timing of contract fulfillments, which may include the buildup of finished goods for shipment.

Consigned inventory is held at third-party locations; however, we retain title to the inventory until purchased by the third-party. Consigned inventory, consisting of raw materials and finished goods, was \$6.4 million and \$5.0 million at December 31, 2013 and 2012, respectively.

Property, plant, and equipment, net

	December 31, 2013	December 31, 2012

Depreciation expense

	Year Ended December 31,		
	2013	2012	2011
		(in thousands)	
Depreciation expense	\$ 56,826	\$ 61,661	\$ 66,072

During 2013, we placed our ERP software assets in service and transferred them from construction in progress to computers and software.

Note 4: Intangible Assets

The gross carrying amount and accumulated amortization of our intangible assets, other than goodwill, are as follows:

	December 31, 2013			December 31, 2012		
	Gross Assets	Accumulated Amortization	Net	Gross Assets	Accumulated Amortization	Net
	(in thousands)					
Core-developed technology	\$ 428,890	\$ (356,017)	\$ 72,873	\$ 407,024	\$ (332,763)	\$ 74,261
Customer contracts and relationships	291,185	(173,952)	117,233	292,252	(154,890)	137,362
Trademarks and trade names	73,117	(67,449)	5,668	72,770	(65,090)	7,680
Other	11,089	(11,023)	66	11,094	(11,026)	68
Total intangible assets subject to amortization	804,281	(608,441)	195,840	783,140	(563,769)	219,371
In-process research and development	—	—	—	19,400	—	19,400
Total intangible assets	<u>\$ 804,281</u>	<u>\$ (608,441)</u>	<u>\$ 195,840</u>	<u>\$ 802,540</u>	<u>\$ (563,769)</u>	<u>\$ 238,771</u>

A summary of the intangible asset account activity is as follows:

	Year Ended December 31,	
	2013	2012
	(in thousands)	
Beginning balance, intangible assets, gross	\$ 802,540	\$ 749,194
Intangible assets acquired	(1,500)	43,400
Assets no longer in use written-off	—	(100)
Effect of change in exchange rates	3,241	10,046
Ending balance, intangible assets, gross	<u>\$ 804,281</u>	<u>\$ 802,540</u>

Intangible assets acquired in 2012 were related to the SmartSynch acquisition on May 1, 2012, including IPR&D assets that consisted primarily of projects to upgrade the hardware components of cellular communication modules to be compatible with 3G cellular network standards. Upon completion of these projects in March 2013, we performed a qualitative assessment and determined that it was more than likely that the carrying amount of IPR&D was not impaired. Accordingly, the carrying amount of IPR&D was reclassified as core-developed technology and will be amortized, based on the SmartSynch acquisition discounted cash flow valuation model, over its expected useful life of seven years. For the year ended December 31, 2013, the adjustment of \$1.5 million to intangible assets acquired is associated with the correction of an error for a long-term revenue contract from the SmartSynch acquisition. See Note 5 for further discussion of the correction of the error and its impact on goodwill.

During 2012, certain assets that had been fully amortized and were no longer in use were removed from our asset ledger.

Intangible assets of our international subsidiaries are recorded in their respective functional currencies; therefore, the carrying amounts of intangible assets increase or decrease, with a corresponding change in accumulated OCI, due to changes in foreign currency exchange rates.

Estimated future annual amortization expense is as follows:

Years ending December 31,	Estimated Annual Amortization
	(in thousands)
2014	\$ 44,542
2015	35,740
2016	28,113
2017	20,908
2018	14,776
Beyond 2018	51,761
Total intangible assets subject to amortization	\$ 195,840

Note 5: Goodwill

The following table reflects goodwill allocated to each reporting segment at December 31, 2013 and 2012:

	Electricity	Gas	Water	Total Company
	(in thousands)			
Goodwill balance at January 1, 2012				
Goodwill before impairment	\$ 436,576	\$ 372,025	\$ 413,156	\$ 1,221,757

Goodwill, net	\$ 60,232	\$ 394,878	\$ 93,468	\$ 548,578

During our annual goodwill impairment test, performed as of October 1, 2013, we performed the first step of the goodwill impairment test, in which we determined that the carrying value of the Electricity reporting unit exceeded its fair value, primarily due to delays in global smart grid projects and lower volumes and pricing pressures in certain regions in Europe and Asia/Pacific. The revised forecast for the Electricity business drove a decrease in the fair value of the reporting unit. As a result, we performed the second step of the goodwill impairment test for the Electricity reporting unit, which indicated a goodwill impairment of \$173.2 million was necessary. This charge was recorded during the fourth quarter of 2013. We also tested the Gas and Water reporting units, in conjunction with our annual goodwill impairment testing. We used the qualitative assessment methodology, as we determined it was more likely than not that the fair values of these two reporting units exceeded their respective carrying values. As a result, we did not need to perform the quantitative impairment test for the Gas and Water reporting units, and no goodwill impairments were recognized. Refer to Note 1 for a description of our reporting units and the methods used to determine the fair values of our reporting units and to determine the amount of any goodwill impairment.

During the second quarter of 2013, we finalized the purchase price allocation related to the SmartSynch acquisition, which was completed on May 1, 2012, and recorded certain adjustments that are reflected in *Adjustments of previous acquisitions* above. These adjustments primarily affected the fair value calculation of certain accrued liabilities associated with specific contracts. Among these adjustments is the correction of an error associated with a long-term revenue contract acquired from SmartSynch. In May 2013, we determined that certain manufacturing costs were not reflected in the model used to value this contract at acquisition. Once these costs were properly added to the total cost and profitability estimates, we determined the total contract would result in a loss of \$2.4 million over the contract term. Therefore, we recognized a liability for this expected loss on the contract and made a corresponding adjustment to goodwill. Further, we had previously recognized a customer relationship intangible asset of \$1.5 million associated with this contract, with amortization scheduled to begin in 2014 based on the contract's original projected cash flow. Since the contract is in an overall loss position, we determined that the intangible asset had no value. We reduced the value of this intangible asset to zero with a corresponding adjustment to goodwill. In accordance with relevant accounting guidance, we evaluated the materiality of the error from a qualitative and quantitative perspective. Based on such evaluation, we concluded that recognizing the contract liability and adjusting the intangible asset value during the three months ended June 30, 2013 would not be material, quantitatively or qualitatively, to our results of operations for the three months ended June 30, 2013 or our expected full year results of operations for 2013 and would not have had a material impact on our results for the year ended December 31, 2012. Because these adjustments were not material individually or in aggregate, we did not retrospectively adjust the comparative amounts on the Consolidated Balance Sheet as of December 31, 2012.

In the preceding table, "Other" includes activities associated with our restructuring projects announced in the fourth quarter of 2011. During the third quarter of 2012, we identified an error in our consolidated financial statements for the year ended December 31, 2011, which resulted in an overstatement of restructuring expense related to the expected sale of a non-core business. The identified assets to be disposed originally included \$6.7 million of goodwill, which was impaired and charged to restructuring expense as a result of the expected sale proceeds being less than the carrying value of the identified assets. During the third quarter of 2012, we determined the amount of goodwill that should have been allocated to the asset disposal group was \$1.3 million. In accordance with the relevant guidance, management evaluated the materiality of the error from a qualitative and quantitative perspective. Based on such evaluation, we concluded that correcting the goodwill allocated to this business asset group was not material, quantitatively or qualitatively, to our results of operations for the year ended December 31, 2012 and would not have had a material impact on our results for the year ended December 31, 2011. Accordingly, we recorded a non-cash adjustment during the third quarter of 2012 to reduce restructuring expense and increase goodwill by \$5.4 million. Additionally, in 2012, we sold a non-core business in Europe to which we allocated \$675,000 of goodwill, which was recognized as restructuring expense.

Goodwill and accumulated impairment losses associated with our international subsidiaries are recorded in their respective functional currencies; therefore, the carrying amounts of these balances increase or decrease, with a corresponding change in accumulated OCI, due to changes in foreign currency exchange rates.

Note 6: Debt

The components of our borrowings are as follows:

	<u>December 31, 2013</u>	<u>December 31, 2012</u>
	<u>(in thousands)</u>	
Credit Facilities		
USD denominated term loan	\$ 258,750	\$ 277,500
Multicurrency revolving line of credit	120,000	140,000
Total debt	<u>378,750</u>	<u>417,500</u>
Less: Current portion of debt	26,250	18,750
Long-term debt	<u>\$ 352,500</u>	<u>\$ 398,750</u>

Credit Facilities

In August 2011, we entered into a senior secured credit facility (2011 credit facility), which replaced the senior secured credit facility we entered into in 2007 (2007 credit facility). The 2011 credit facility consists of a \$300 million U.S. dollar term loan (the term loan) and a multicurrency revolving line of credit (the revolver) with a principal amount of up to \$660 million. Both the term loan and the revolver mature on August 8, 2016, and amounts borrowed under the revolver are classified as long-term. Amounts borrowed under the revolver during the credit facility term may be repaid and reborrowed until the revolver's maturity, at which time the revolver will terminate, and all outstanding loans, together with all accrued and unpaid interest, must be repaid. Amounts not borrowed under the revolver are subject to a commitment fee, which is paid in arrears on the last day of each fiscal quarter, ranging from 0.20% to 0.40% per annum depending on our total leverage ratio as of the most recently ended fiscal quarter. Amounts

repaid on the term loan may not be reborrowed. The 2011 credit facility permits us and certain of our foreign subsidiaries to borrow in U.S. dollars, euros, British pounds, or, with lender approval, other currencies readily convertible into U.S. dollars. All obligations under the 2011 credit facility are guaranteed by Itron, Inc. and material U.S. domestic subsidiaries and are secured by a pledge of substantially all of the assets of Itron, Inc. and material U.S. domestic subsidiaries, including a pledge of 100% of the capital stock of material U.S. domestic subsidiaries and up to 66% of the voting stock (100% of the non-voting stock) of their first-tier foreign subsidiaries. In addition, the obligations of any foreign subsidiary who is a foreign borrower, as defined by the 2011 credit facility, are guaranteed by the foreign subsidiary and by its direct and indirect foreign parents. The 2011 credit facility includes debt covenants, which contain certain financial thresholds and place certain restrictions on the incurrence of debt, investments, and the issuance of dividends. We were in compliance with the debt covenants under the 2011 credit facility at December 31, 2013.

Scheduled principal repayments for the term loan are due quarterly in the amounts of \$5.6 million through June 2014, \$7.5 million from September 2014 through June 2016, and the remainder due at maturity on August 8, 2016. The term loan may be repaid early in whole or in part, subject to certain minimum thresholds, without penalty.

Required minimum principal payments on our outstanding credit facilities are as follows:

	Minimum Payments	
	(in thousands)	
2014	\$	26,250
2015		30,000
2016		322,500
2017		—
2018		—
Total minimum payments on debt	\$	378,750

Under the 2011 credit facility, we elect applicable market interest rates for both the term loan and any outstanding revolving loans. We also pay an applicable margin, which is based on our total leverage ratio (as defined in the credit agreement). The applicable rates per annum may be based on either: (1) the LIBOR rate, plus an applicable margin, or (2) the Alternate Base Rate, plus an applicable margin. The Alternate Base Rate election is equal to the greatest of three rates: (i) the prime rate, (ii) the Federal Reserve effective rate plus 1/2 of 1%, or (iii) one month LIBOR plus 1%. At December 31, 2013, the interest rate for both the term loan and the revolver was 1.67% (the LIBOR rate plus a margin of 1.50%).

Total credit facility repayments were as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
2011 credit facility term loan	\$ 18,750	\$ 15,002	\$ 7,500
2011 credit facility multicurrency revolving line of credit ⁽¹⁾	55,000	100,000	40,000
2007 credit facility term loans	—	—	406,950
2007 credit facility revolving line of credit ⁽²⁾	—	—	170,000
Total credit facility repayments	\$ 73,750	\$ 115,002	\$ 624,450

⁽¹⁾ We borrowed \$35.0 million and \$80.0 million under the multicurrency revolving line of credit during 2013 and 2012, respectively.

⁽²⁾ See repayment of the convertible senior subordinated notes below.

At December 31, 2013, \$120 million was outstanding under the 2011 credit facility revolver, and \$49.5 million was utilized by outstanding standby letters of credit, resulting in \$490.5 million available for additional borrowings.

Prepaid debt fees of approximately \$897,000 were capitalized in the second quarter of 2012 associated with the increase in the revolver in April 2012. At December 31, 2013 and 2012, unamortized prepaid debt fees were as follows:

	<u>December 31, 2013</u>	<u>December 31, 2012</u>
	(in thousands)	
Unamortized prepaid debt fees	\$ 3,810	\$ 5,367

Convertible Senior Subordinated Notes

On August 1, 2011, in accordance with the terms of the convertible senior subordinated notes (convertible notes), we repurchased \$184.8 million of the convertible notes at their principal amount plus accrued and unpaid interest. On September 30, 2011, we redeemed the remaining \$38.8 million of the convertible notes, plus accrued and unpaid interest.

The convertible notes were separated between the liability and equity components using our estimated non-convertible debt borrowing rate at the time the convertible notes were issued, which was determined to be 7.38%. This rate also reflected the effective interest rate on the liability component for all periods during which the convertible notes were outstanding. The carrying amount of the equity component of \$31.8 million is retained as a permanent component of our shareholders' equity, and no gain or loss was recognized upon derecognition of the convertible notes as the fair value of the consideration transferred to the holders equaled the fair value of the liability component.

The discount on the liability component was fully amortized by the end of the second quarter of 2011. The interest expense relating to both the contractual interest coupon and amortization of the discount on the liability component is as follows:

	<u>Year Ended December 31,</u>		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
	(in thousands)		
Contractual interest coupon	\$ —	\$ —	\$ 3,420
Amortization of the discount on the liability component	—	—	5,336
Total interest expense on convertible notes	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 8,756</u>

Note 7: Derivative Financial Instruments

As part of our risk management strategy, we use derivative instruments to hedge certain foreign currency and interest rate exposures. Refer to Note 1, Note 14, and Note 15 for additional disclosures on our derivative instruments.

The fair values of our derivative instruments are determined using the income approach and significant other observable inputs (also known as “Level 2”). We have used observable market inputs based on the type of derivative and the nature of the underlying instrument. The key inputs include interest rate yield curves (swap rates and futures) and foreign exchange spot and forward rates, all of which are available in an active market. We have utilized the mid-market pricing convention for these inputs at December 31, 2013. We include the effect of our counterparty credit risk based on current published credit default swap rates when the net fair value of our derivative instruments is in a net asset position. We consider our own nonperformance risk when the net fair value of our derivative instruments is in a net liability position by discounting our derivative liabilities to reflect the potential credit risk to our counterparty through applying a current market indicative credit spread to all cash flows.

The fair values of our derivative instruments at December 31, 2013 and 2012 are as follows:

	Balance Sheet Location	Fair Value	
		December 31, 2013	December 31, 2012
(in thousands)			
Asset Derivatives			
Derivatives not designated as hedging instruments under ASC 815-20			
Foreign exchange forward contracts	Other current assets	\$ 41	\$ 146
Liability Derivatives			
Derivatives designated as hedging instruments under ASC 815-20			
Interest rate swap contracts	Other current liabilities	\$ 1,557	\$ 629
Interest rate swap contracts	Other long-term obligations	474	2,096
Derivatives not designated as hedging instruments under ASC 815-20			
Foreign exchange forward contracts	Other current liabilities	\$ 145	\$ 114
Total liability derivatives		\$ 2,176	\$ 2,839

A summary of the potential effect of netting arrangements on our financial position related to the offsetting of our recognized derivative assets and liabilities under master netting arrangements or similar agreements is as follows:

Offsetting of Derivative Assets

	Gross Amounts of Recognized Assets Presented in the Consolidated Balance Sheets	Gross Amounts Not Offset in the Consolidated Balance Sheets		Net Amount
		Derivative Financial Instruments	Cash Collateral Received	
(in thousands)				
December 31, 2013	\$ 41	\$ (40)	\$ —	\$ 1
December 31, 2012	\$ 146	\$ (135)	\$ —	\$ 11

Offsetting of Derivative Liabilities

	Gross Amounts of Recognized Liabilities Presented in the Consolidated Balance Sheets	Gross Amounts Not Offset in the Consolidated Balance Sheets		Net Amount
		Derivative Financial Instruments	Cash Collateral Pledged	
(in thousands)				
December 31, 2013	\$ 2,176	\$ (40)	\$ —	\$ 2,136
December 31, 2012	\$ 2,839	\$ (135)	\$ —	\$ 2,704

Our derivative assets and liabilities consist of foreign exchange forward and interest rate swap contracts with seven counterparties at December 31, 2013 and eight counterparties at December 31, 2012. No derivative asset or liability balance with any of our counterparties was individually significant at December 31, 2013 or 2012. Our derivative contracts with each of these counterparties exist under agreements that provide for the net settlement of all contracts through a single payment in a single currency in the event of default. We have no pledges of cash collateral against our obligations nor have we received pledges of cash collateral from our counterparties under the associated derivative contracts.

OCI during the reporting period for our derivative and nonderivative instruments designated as hedging instruments (collectively, hedging instruments), net of tax, was as follows:

	2013	2012
	(in thousands)	
Net unrealized gain (loss) on hedging instruments at January 1,	\$ (16,069)	\$ (14,380)
Unrealized gain (loss) on derivative instruments	2	(1,689)
Realized (gains) losses reclassified into net income (loss)	431	—
Net unrealized gain (loss) on hedging instruments at December 31,	<u>\$ (15,636)</u>	<u>\$ (16,069)</u>

Following the termination of our net investment hedge in August 2011, the net derivative loss of \$14.4 million will remain in accumulated OCI until such time when earnings are impacted by a sale or liquidation of the associated foreign operation.

Cash Flow Hedges

As a result of our floating rate debt, we are exposed to variability in our cash flows from changes in the applicable interest rate index. We enter into swaps to achieve a fixed rate of interest on the hedged portion of debt in order to increase our ability to forecast interest expense. The objective of these swaps is to reduce the variability of cash flows from increases in the LIBOR base borrowing rates on our floating rate credit facility. The swaps do not protect us from changes to the applicable margin under our credit facility.

In May 2012, we entered into six forward starting pay-fixed receive one-month LIBOR interest rate swaps. The interest rate swaps convert \$200 million of our LIBOR based debt from a floating LIBOR interest rate to a fixed interest rate of 1.00% (excluding the applicable margin on the debt) and are effective July 31, 2013 to August 8, 2016. The cash flow hedges are expected to be highly effective in achieving offsetting cash flows attributable to the hedged risk through the term of the hedge. Consequently, effective changes in the fair value of the interest rate swaps are recorded as a component of OCI and will be recognized in earnings when the hedged item affects earnings. The amounts paid or received on the hedges will be recognized as adjustments to interest expense. The amount of net losses expected to be reclassified into earnings in the next 12 months is \$1.5 million. At December 31, 2013, our LIBOR-based debt balance was \$378.8 million.

In 2007, we entered into a pay fixed 6.59% receive three-month Euro Interbank Offered Rate (EURIBOR), plus 2%, amortizing interest rate swap to convert a significant portion of our euro denominated variable-rate term loan to fixed-rate debt, plus or minus the variance in the applicable margin from 2%, with an original maturity date of December 31, 2012. The objective of this swap was to protect us from increases in the EURIBOR base borrowing rates. The swaps did not protect us from changes to the applicable margin under our credit agreement. Throughout the duration of the hedging relationship, this cash flow hedge was expected to be highly effective in achieving offsetting cash flows attributable to the hedged risk. Consequently, effective changes in the fair value of the interest rate swap were recorded as a component of OCI and were recognized in earnings when the hedged item affected earnings. The amounts paid or received on the hedge were recognized as adjustments to interest expense. In August 2011, we repaid our 2007 credit facility, which included the euro-denominated term loan. In conjunction with the debt repayment, we paid \$2.9 million to terminate the related interest rate swap, and the accumulated loss in OCI was reclassified to interest expense.

In 2010, we entered into two interest rate swaps with one-year terms, which each converted \$100 million of our U.S. dollar term loan from a floating LIBOR interest rate to fixed interest rates of 2.11% and 2.15%, respectively. These swaps expired on June 30, 2011 and did not include the additional interest rate margin applicable to our term debt.

The before-tax effect of our cash flow derivative instruments on the Consolidated Balance Sheets and the Consolidated Statements of Operations for the years ended December 31 are as follows:

Derivatives in ASC 815-20 Cash Flow Hedging Relationships	Amount of Gain (Loss) Recognized in OCI on Derivative (Effective Portion)			Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)			Gain (Loss) Recognized in Income on Derivative (Ineffective Portion)				
				Location	Amount		Location	Amount			
	2013	2012	2011		2013	2012	2011	2013	2012	2011	
	(in thousands)				(in thousands)			(in thousands)			
Interest rate swap contracts	\$ (3)	\$ (2,725)	\$ (4,200)	Interest expense	\$ 697	\$ —	\$ (7,254)	Interest expense	\$ —	\$ —	\$ (201)

We will continue to monitor and assess our interest rate risk and may institute additional interest rate swaps or other derivative instruments to manage such risk in the future.

Net Investment Hedge

We are exposed to foreign exchange risk through our international subsidiaries. As a result of our acquisition of an international company in 2007, we entered into a euro denominated term loan, which exposed us to fluctuations in the euro foreign exchange rate. Therefore, we designated this foreign currency denominated term loan as a hedge of our net investment in international operations. The non-functional currency term loan was revalued into U.S. dollars at each balance sheet date, and the changes in value associated with currency fluctuations were recorded as adjustments to long-term debt with offsetting gains and losses recorded in OCI. The loan was repaid in full in August 2011 as part of the repayment of our 2007 credit facility. The net derivative loss will remain in accumulated OCI until such time when earnings are impacted by a sale or liquidation of the associated foreign operation.

The before-tax and net of tax effects of our net investment hedge nonderivative financial instrument on OCI for the years ended December 31 are as follows:

Nonderivative Financial Instruments in ASC 815-20 Net Investment Hedging Relationships	Euro Denominated Term Loan Designated as a Hedge of Our Net Investment in International Operations		
	2013	2012	2011
	(in thousands)		
Gain (loss) recognized in OCI on derivative (Effective Portion)			
Before tax	\$ —	\$ —	\$ (14,278)
Net of tax	\$ —	\$ —	\$ (8,866)

Derivatives Not Designated as Hedging Relationships

We are also exposed to foreign exchange risk when we enter into non-functional currency transactions, both intercompany and third-party. At each period-end, non-functional currency monetary assets and liabilities are revalued with the change recorded to other income and expense. We enter into monthly foreign exchange forward contracts (a total of 528 contracts were entered into during the year ended December 31, 2013), which are not designated for hedge accounting, with the intent to reduce earnings volatility associated with currency exposures. The notional amounts of the contracts ranged from \$251,000 to \$12.0 million, offsetting our exposures from the euro, British pound, Canadian dollar, Australian dollar, Brazilian real, and various other currencies.

The effect of our foreign exchange forward derivative instruments on the Consolidated Statements of Operations for the years ended December 31 is as follows:

Derivatives Not Designated as Hedging Instrument under ASC 815-20	Gain (Loss) Recognized on Derivatives in Other Income (Expense)		
	2013	2012	2011
	(in thousands)		
Foreign exchange forward contracts	\$ (145)	\$ (422)	\$ (2,022)

Note 8: Defined Benefit Pension Plans

We sponsor both funded and unfunded defined benefit pension plans for our international employees, primarily in Germany, France, Italy, Indonesia, Brazil, and Spain, offering death and disability, retirement, and special termination benefits. The defined benefit obligation is calculated annually by using the projected unit credit method. The measurement date for the pension plans was December 31, 2013.

Our general funding policy for these qualified pension plans is to contribute amounts sufficient to satisfy regulatory funding standards of the respective countries for each plan. We contributed \$436,000 and \$440,000 to the defined benefit pension plans for the years ended December 31, 2013 and 2012, respectively. The timing of when contributions are made can vary by plan and from year to year. For 2014, assuming that actual plan asset returns are consistent with our expected rate of return, and that interest rates remain constant, we expect to contribute approximately \$450,000 to our defined benefit pension plans.

The following tables summarize the benefit obligation, plan assets, funded status of the defined benefit plans, amounts recognized in the Consolidated Balance Sheets and amounts recognized in accumulated other comprehensive income at December 31, 2013 and 2012.

	Year Ended December 31,	
	2013	2012
	(in thousands)	
Change in benefit obligation:		
Benefit obligation at January 1,	\$ 101,766	\$ 72,601
Service cost	4,205	2,700
Interest cost	3,355	3,625
Actuarial (gain) loss	(6,160)	24,492
Benefits paid	(5,369)	(4,131)
Foreign currency exchange rate changes	2,698	2,395
Other	2,167	84
Benefit obligation at December 31,	<u>\$ 102,662</u>	<u>\$ 101,766</u>
Change in plan assets:		
Fair value of plan assets at January 1,	\$ 8,561	\$ 7,980
Actual return on plan assets	119	225
Company contributions	436	440
Benefits paid	(537)	(227)
Foreign currency exchange rate changes	(267)	143
Other	3,368	—
Fair value of plan assets at December 31,	<u>11,680</u>	<u>8,561</u>
Ending balance at fair value (net pension plan benefit liability)	<u><u>\$ 90,982</u></u>	<u><u>\$ 93,205</u></u>

The weighted average discount rate used to measure our benefit obligations, which is based on published bond indexes, increased by 40 basis points from December 31, 2012 to December 31, 2013, driving a \$6.2 million actuarial gain during 2013, which is recognized in OCI. The significant actuarial weighted average assumptions are discussed in greater detail below.

Our defined benefit pension plans are denominated in the functional currencies of the respective countries in which the plans are sponsored; therefore, the balances increase or decrease, with a corresponding change in OCI, due to changes in foreign currency exchange rates. Amounts recognized on the Consolidated Balance Sheets consist of:

	At December 31,	
	2013	2012
	(in thousands)	
Assets		
Plan assets in other long-term assets	\$ 1,426	\$ 227
Liabilities		
Current portion of pension plan liability in wages and benefits payable	3,721	2,899
Long-term portion of pension plan liability	88,687	90,533
Net pension plan benefit liability	<u><u>\$ 90,982</u></u>	<u><u>\$ 93,205</u></u>

Amounts in accumulated other comprehensive income (pre-tax) that have not yet been recognized as components of net periodic benefit costs consist of:

	At December 31,	
	2013	2012
	(in thousands)	
Net actuarial loss	\$ 13,262	\$ 20,676
Net prior service cost	1,133	1,063
Amount included in accumulated other comprehensive income	<u>\$ 14,395</u>	<u>\$ 21,739</u>

Amounts recognized in OCI (pre-tax) are as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Net actuarial (gain) loss	\$ (5,881)	\$ 24,492	\$ (597)
Settlement/curtailment loss	(325)	(13)	(25)
Plan asset (gain) loss	516	108	(105)
Amortization of net actuarial gain (loss)	(926)	(161)	85
Amortization of prior service cost	(70)	(68)	(74)
Other	(658)	—	(1)
Other comprehensive (income) loss	<u>\$ (7,344)</u>	<u>\$ 24,358</u>	<u>\$ (717)</u>

The estimated net actuarial loss and prior service cost that will be amortized from accumulated other comprehensive income into net periodic benefit cost during 2014 is \$0.6 million.

Net periodic pension benefit costs for our plans include the following components:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Service cost	\$ 4,205	\$ 2,700	\$ 2,512
Interest cost	3,355	3,625	3,754
Expected return on plan assets	(635)	(331)	(322)
Amortization of prior service costs	70	68	74
Amortization of actuarial net (gain) loss	926	161	(85)
Settlements and other	(493)	97	25
Net periodic benefit cost	<u>\$ 7,428</u>	<u>\$ 6,320</u>	<u>\$ 5,958</u>

The significant actuarial weighted average assumptions used in determining the benefit obligations and net periodic benefit cost for our benefit plans are as follows:

	At and For The Year Ended December 31,		
	2013	2012	2011
Actuarial assumptions used to determine benefit obligations at end of period:			
Discount rate	3.76%	3.36%	5.51%
Expected annual rate of compensation increase	3.33%	3.41%	3.38%
Actuarial assumptions used to determine net periodic benefit cost for the period:			
Discount rate	3.36%	5.51%	5.35%
Expected rate of return on plan assets	3.63%	4.08%	4.00%
Expected annual rate of compensation increase	3.41%	3.38%	3.35%

We determine a discount rate for our plans based on the estimated duration of each plan's liabilities. For our euro denominated defined benefit pension plans, which represent 95% of our benefit obligation, we use three discount rates, with consideration of the duration of the plans, using a hypothetical yield curve developed from euro-denominated AA-rated corporate bond issues, partially weighted for market value, with minimum amounts outstanding of €250 million for bonds with less than 10 years to maturity and €50 million for bonds with 10 or more years to maturity, and excluding the highest and lowest yielding 10% of bonds within each maturity group. The discount rates used, depending on the duration of the plans, were 2.75%, 3.25%, and 3.50%. As a result of the 40 basis point increase in the weighted average discount rate used to measure our benefit obligations, the actuarial gain, which is recognized in OCI, was \$6.2 million in 2013.

Our expected rate of return on plan assets is derived from a study of actual historic returns achieved and anticipated future long-term performance of plan assets. While the study primarily gives consideration to recent insurers' performance and historical returns, the assumption represents a long-term prospective return.

The total accumulated benefit obligation for our defined benefit pension plans was \$93.3 million and \$90.8 million at December 31, 2013 and 2012, respectively.

We have two plans in which the fair value of plan assets exceeds the plan's accumulated benefit obligation.

The total obligation and fair value of plan assets for plans with accumulated benefit obligations exceeding the fair value of plan assets are as follows:

	At December 31,	
	2013	2012
	(in thousands)	
Projected benefit obligation	\$ 99,694	\$ 100,357
Accumulated benefit obligation	90,803	89,687
Fair value of plan assets	7,286	6,925

Our asset investment strategy focuses on maintaining a portfolio using primarily insurance funds, which are accounted for as investments and measured at fair value, in order to achieve our long-term investment objectives on a risk adjusted basis. Our general funding policy for these qualified pension plans is to contribute amounts sufficient to satisfy regulatory funding standards of the respective countries for each plan.

The fair values of our plan investments by asset category as of December 31, 2013, and 2012 are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Unobservable Inputs (Level 3)
	(in thousands)		
2013			
Cash	\$ 846	\$ 846	\$ —
Insurance funds	8,260	—	8,260
Other securities	2,574	—	2,574
Total fair value of plan assets	<u>\$ 11,680</u>	<u>\$ 846</u>	<u>\$ 10,834</u>
2012			
Cash	\$ 903	\$ 903	\$ —
Insurance funds	7,658	—	7,658
Total fair value of plan assets	<u>\$ 8,561</u>	<u>\$ 903</u>	<u>\$ 7,658</u>

As the plan assets are not significant to our total company assets, no further breakdown is provided.

Annual benefit payments, including amounts to be paid from our assets for unfunded plans, and reflecting expected future service, as appropriate, are expected to be paid as follows:

Year Ending December 31,	Estimated Annual Benefit Payments
	(in thousands)
2014	\$ 4,521
2015	3,781
2016	4,093
2017	4,464
2018	4,394
2019 - 2023	26,825

Note 9: Stock-Based Compensation

We record stock-based compensation expense for awards of stock options, stock sold pursuant to our ESPP, and the issuance of restricted stock units and unrestricted stock awards. We expense stock-based compensation primarily using the straight-line method over the requisite service period. For the years ended December 31, stock-based compensation expense and the related tax benefit were as follows:

	2013	2012	2011
	(in thousands)		
Stock options	\$ 2,074	\$ 1,547	\$ 1,445
Restricted stock units	15,475	16,583	13,842
Unrestricted stock awards	811	769	469
ESPP	490	613	655
Total stock-based compensation	<u>\$ 18,850</u>	<u>\$ 19,512</u>	<u>\$ 16,411</u>
Related tax benefit	<u>\$ 5,152</u>	<u>\$ 5,377</u>	<u>\$ 4,478</u>

We issue new shares of common stock upon the exercise of stock options or when vesting conditions on restricted stock units are fully satisfied.

Subject to stock splits, dividends, and other similar events, 3,500,000 shares of common stock are reserved and authorized for issuance under our 2010 Stock Incentive Plan (Stock Incentive Plan). Awards consist of stock options, restricted stock units, and unrestricted stock awards. At December 31, 2013, 747,416 shares were available for grant under the Stock Incentive Plan. The Stock Incentive Plan shares are subject to a fungible share provision such that, with respect to grants made after December 31, 2009, the authorized share reserve is reduced by (i) one share for every one share subject to a stock option or share appreciation right granted under the Plan and (ii) 1.7 shares for every one share of common stock that was subject to an award other than an option or stock appreciation right.

Stock Options

Options to purchase our common stock are granted to certain employees, senior management, and members of the Board of Directors with an exercise price equal to the market close price of the stock on the date the Board of Directors approves the grant. Options generally become exercisable in three equal annual installments beginning one year from the date of grant and generally expire 10 years from the date of grant. Compensation expense is recognized only for those options expected to vest, with forfeitures estimated based on our historical experience and future expectations.

The fair values of stock options granted were estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	Year Ended December 31,		
	2013	2012	2011
Dividend yield	—	—	—
Expected volatility	38.1%	42.1%	46.5%
Risk-free interest rate	1.0%	0.8%	1.6%
Expected term (years)	5.5	5.1	4.9

Expected volatility is based on a combination of the historical volatility of our common stock and the implied volatility of our traded options for the related expected term. We believe this combined approach is reflective of current and historical market conditions and is an appropriate indicator of expected volatility. The risk-free interest rate is the rate available as of the award date on zero-coupon U.S. government issues with a term equal to the expected life of the award. The expected life is the weighted average expected life of an award based on the period of time between the date the award is granted and the estimated date the award will be fully exercised. Factors considered in estimating the expected life include historical experience of similar awards, contractual terms, vesting schedules, and expectations of future employee behavior. We have not paid dividends in the past and do not plan to pay dividends in the foreseeable future.

A summary of our stock option activity for the years ended December 31 is as follows:

	Shares (in thousands)	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life (years)	Aggregate Intrinsic Value ⁽¹⁾ (in thousands)	Weighted Average Grant Date Fair Value
Outstanding, January 1, 2011	1,102	\$ 55.21	5.6	\$ 10,883	
Granted	113	51.12			\$ 21.38
Exercised	(42)	19.71		1,283	
Forfeited	(63)	58.50			
Expired	(1)	7.00			
Outstanding, December 31, 2011	<u>1,109</u>	<u>\$ 55.97</u>	<u>4.5</u>	<u>\$ 2,323</u>	
Granted	196	\$ 43.27			\$ 16.51
Exercised	(54)	21.91		\$ 1,078	
Expired	(114)	69.37			
Outstanding, December 31, 2012	<u>1,137</u>	<u>\$ 54.06</u>	<u>4.8</u>	<u>\$ 3,815</u>	
Granted	129	\$ 42.76			\$ 15.44
Exercised	(74)	23.87		\$ 1,377	
Expired	(12)	49.04			
Outstanding, December 31, 2013	<u>1,180</u>	<u>\$ 54.79</u>	<u>4.6</u>	<u>\$ 1,300</u>	
Exercisable, December 31, 2013	<u>906</u>	<u>\$ 58.19</u>	<u>3.4</u>	<u>\$ 1,275</u>	
Expected to vest, December 31, 2013	<u>263</u>	<u>\$ 43.59</u>	<u>8.8</u>	<u>\$ 25</u>	

⁽¹⁾ The aggregate intrinsic value of outstanding stock options represents amounts that would have been received by the optionees had all in-the-money options been exercised on that date. Specifically, it is the amount by which the market value of Itron's stock exceeded the exercise price of the outstanding in-the-money options before applicable income taxes, based on our closing stock price on the last business day of the period. The aggregate intrinsic value of stock options exercised during the period is calculated based on our stock price at the date of exercise.

As of December 31, 2013, total unrecognized stock-based compensation expense related to nonvested stock options was approximately \$3.1 million, which is expected to be recognized over a weighted average period of approximately 1.9 years.

Restricted Stock Units

Certain employees, senior management, and members of the Board of Directors receive restricted stock units as a component of their total compensation. The fair value of a restricted stock unit is the market close price of our common stock on the date of grant. Restricted stock units generally vest over a three year period. Compensation expense, net of forfeitures, is recognized over the vesting period.

Subsequent to vesting, the restricted stock units are converted into shares of our common stock on a one-for-one basis and issued to employees. We are entitled to an income tax deduction in an amount equal to the taxable income reported by the employees upon vesting of the restricted stock units.

Prior to 2013, the performance-based restricted stock units issued under the Long-Term Performance Restricted Stock Unit Award Agreement (Performance Award Agreement) were determined based on the attainment of certain performance goals after the end of the one-year performance period. During the year, if management determined that it was probable that the targets would be achieved, compensation expense, net of forfeitures, was recognized on a straight-line basis over the annual performance and subsequent vesting period for each separately vesting portion of the award. Performance awards typically vested and were released in three equal installments at the end of each year following attainment of the performance goals. For U.S. participants who retire during the vesting period, unvested restricted stock units immediately vest at the date of retirement. For the 2012 performance awards, no awards became eligible for vesting as minimum performance thresholds for the 2012 performance year were not met.

For 2013, the performance-based restricted stock units to be issued under the Performance Award Agreement are determined based on (1) our achievement of specified non-GAAP EPS targets, as established at the beginning of each year for each of the calendar years contained in the performance periods (2-year and 3-year awards) (the performance condition) and (2) our total shareholder return (TSR) relative to the TSR attained by companies that are included in the Russell 3000 Index during the performance periods

(the market condition). Compensation expense, net of forfeitures, is recognized on a straight-line basis, and the units vest upon achievement of the performance condition, provided participants are employed by Itron at the end of the respective performance periods. For U.S. participants who retire during the performance period, a pro-rated number of restricted stock units (based on the number of days of employment during the performance period) immediately vest based on the attainment of the performance goals as assessed after the end of the performance period.

Depending on the level of achievement of the performance condition, the actual number of shares to be earned ranges between 0% and 160% of the awards originally granted. At the end of the 2-year and 3-year performance periods, if the performance conditions are achieved at or above threshold, the number of shares earned is further adjusted by a TSR multiplier payout percentage, which ranges between 75% and 125%, based on the market condition. Therefore, based on the attainment of the performance and market conditions, the actual number of shares that vest may range from 0% to 200% of the awards originally granted. Due to the presence of the TSR multiplier market condition, we utilize a Monte Carlo valuation model to determine the fair value of the awards at the grant date. This pricing model uses multiple simulations to evaluate the probability of our achievement of various stock price levels to determine our expected TSR performance ranking. The weighted-average assumptions used to estimate the fair value of performance-based restricted stock units awarded and the resulting weighted average fair-value are as follows:

	Year Ended December 31, 2013
Dividend yield	—
Expected volatility	39.1%
Risk-free interest rate	0.3%
Expected term (years)	2.5
Weighted-average fair value	\$45.03

Expected volatility is based on the historical volatility of our common stock for the related expected term. We believe this approach is reflective of current and historical market conditions and is an appropriate indicator of expected volatility. The risk-free interest rate is the rate available as of the award date on zero-coupon U.S. government issues with a term equal to the expected term of the award. The expected term is the term of an award based on the period of time between the date of the award and the date the award is expected to vest. The expected term assumption is based upon the plan's performance period as of the date of the award. We have not paid dividends in the past and do not plan to pay dividends in the foreseeable future.

The following table summarizes restricted stock unit activity for the years ended December 31:

	Number of Restricted Stock Units	Weighted Average Grant Date Fair Value	Aggregate Intrinsic Value⁽¹⁾
	(in thousands)		(in thousands)
Outstanding, January 1, 2011	588		
Granted ⁽²⁾	355	\$ 54.71	
Released	(271)		\$ 20,413
Forfeited	(47)		
Outstanding, December 31, 2011	<u>625</u>		
Granted	464	\$ 47.21	
Released	(275)		\$ 16,855
Forfeited	(40)		
Outstanding, December 31, 2012	<u>774</u>		
Granted	255	\$ 42.51	
Released	(331)		\$ 17,983
Forfeited	(40)		
Outstanding, December 31, 2013	<u>658</u>		
Vested but not released, December 31, 2013	<u>8</u>		<u>\$ 324</u>
Expected to vest, December 31, 2013	<u>589</u>		<u>\$ 24,391</u>

⁽¹⁾ The aggregate intrinsic value is the market value of the stock, before applicable income taxes, based on the closing price on the stock release dates or at the end of the period for restricted stock units expected to vest.

⁽²⁾ These restricted stock units include 61,500 shares for the 2011 awards under the Performance Award Agreement, which are eligible for vesting at December 31, 2011.

At December 31, 2013, unrecognized compensation expense on restricted stock units was \$15.2 million, which is expected to be recognized over a weighted average period of approximately 1.6 years.

Unrestricted Stock Awards

We grant unrestricted stock awards to members of our Board of Directors as part of their compensation. Awards are fully vested and expensed when granted. The fair value of unrestricted stock awards is the market close price of our common stock on the date of grant.

The following table summarizes unrestricted stock award activity for the years ended December 31:

	2013	2012	2011
	(in thousands, except per share data)		
Shares of unrestricted stock granted	18	19	11
Weighted average grant date fair value per share	\$ 44.12	\$ 41.43	\$ 41.19

Employee Stock Purchase Plan

Under the terms of the ESPP, employees can deduct up to 10% of their regular cash compensation to purchase our common stock at a discount from the fair market value of the stock at the end of each fiscal quarter, subject to other limitations under the plan. The sale of the stock to the employees occurs at the beginning of the subsequent quarter. Effective October 1, 2013, we changed the terms of the ESPP to reduce the discount from 15% to 5% from the fair market value of the stock at the end of each fiscal quarter. As a result of this change, the ESPP will no longer be considered compensatory, and no compensation expense will be recognized for future sales of our common stock to employees. Prior to October 1, 2013, the plan was considered compensatory.

The following table summarizes ESPP activity for the years ended December 31:

	<u>2013</u>	<u>2012</u>	<u>2011</u>
	(in thousands, except per share data)		
Shares of stock sold to employees ⁽¹⁾	94	101	99
Weighted average fair value per ESPP award ⁽²⁾	\$ 6.61	\$ 6.29	\$ 6.22

⁽¹⁾ Stock sold to employees during each fiscal quarter under the ESPP is associated with the offering period ending on the last day of the previous fiscal quarter.

⁽²⁾ Relating to awards associated with the offering periods during the years ended December 31. Effective October 1, 2013, the ESPP is no longer compensatory and therefore the 2013 weighted average fair value per award is for the nine months ended September 30, 2013.

At December 31, 2013, all compensation cost associated with the ESPP had been recognized. There were approximately 506,000 shares of common stock available for future issuance under the ESPP at December 31, 2013.

Note 10: Defined Contribution, Bonus, and Profit Sharing Plans

Defined Contribution Plans

In the United States, United Kingdom, Brazil, and certain other countries, we make contributions to defined contribution plans. For our U.S. employee savings plan, which represents a majority of our contribution expense, we provide a 50% match on the first 6% of the employee salary deferral, subject to statutory limitations. For our international defined contribution plans, we provide various levels of contributions, based on salary, subject to stipulated or statutory limitations. The expense for our defined contribution plans was as follows:

	<u>Year Ended December 31,</u>		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
	(in thousands)		
Defined contribution plans expense	\$ 7,392	\$ 7,551	\$ 7,228

Bonus and Profit Sharing Plans and Awards

We have employee bonus and profit sharing plans in which many of our employees participate, as well as an award program, which allows for recognition of individual employees' achievements. The bonus and profit sharing plans provide award amounts for the achievement of annual performance and financial targets. Actual bonus and profit sharing award amounts are determined at the end of the year if the performance and financial targets are met. As the bonuses are being earned during the year, we estimate a compensation accrual each quarter based on the progress towards achieving the goals, the estimated financial forecast for the year, and the probability of achieving results. Bonus and profit sharing plans and award expense was as follows:

	<u>Year Ended December 31,</u>		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
	(in thousands)		
Bonus and profit sharing plans and award expense	\$ 15,745	\$ 25,297	\$ 28,926

Note 11: Income Taxes

The following table summarizes the provision (benefit) for U.S. federal, state, and foreign taxes on income from continuing operations:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Current:			
Federal	\$ 145	\$ 11,935	\$ 5,472
State and local	1,089	1,387	2,045
Foreign	21,860	19,448	9,898
Total current	<u>23,094</u>	<u>32,770</u>	<u>17,415</u>
Deferred:			
Federal	(16,413)	12,195	17,861
State and local	(2,472)	468	(2,099)
Foreign	(25,872)	(32,293)	(42,554)
Total deferred	<u>(44,757)</u>	<u>(19,630)</u>	<u>(26,792)</u>
Change in valuation allowance	17,999	12,855	13,807
Total provision (benefit) for income taxes	<u>\$ (3,664)</u>	<u>\$ 25,995</u>	<u>\$ 4,430</u>

A reconciliation of income taxes at the U.S. federal statutory rate of 35% to the consolidated actual tax rate is as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Income (loss) before income taxes			
Domestic	\$ 19,016	\$ 167,299	\$ 125,010
Foreign	(167,270)	(31,080)	(626,776)
Total income (loss) before income taxes	<u>\$ (148,254)</u>	<u>\$ 136,219</u>	<u>\$ (501,766)</u>
Expected federal income tax provision (benefit)	\$ (51,889)	\$ 47,677	\$ (175,618)
Goodwill impairment	49,730	(1,905)	207,054
Change in valuation allowance	17,999	12,855	13,807
Luxembourg net operating loss	(5,443)	(12,767)	(5,289)
Stock-based compensation	1,598	1,787	951
Foreign earnings	(10,212)	(23,769)	(19,222)
Tax credits	(10,352)	(2,174)	(6,877)
Uncertain tax positions, including interest and penalties	1,360	(2,740)	(3,996)
Change in tax rates	1,442	174	(1,522)
State income tax provision (benefit), net of federal effect	(2,291)	1,242	(768)
U.S. tax provision on foreign earnings	(245)	2,370	—
Domestic production activities deduction	(146)	(2,612)	(4,313)
Local foreign taxes	3,212	3,635	3,525
Other, net	1,573	2,222	(3,302)
Total provision for income taxes	<u>\$ (3,664)</u>	<u>\$ 25,995</u>	<u>\$ 4,430</u>

Our tax benefit as a percentage of loss before tax was 2.5% for 2013. Our actual tax rate differed from the 35% U.S. federal statutory tax rate due to the following items which decreased the tax benefit: (1) nondeductible portion of the goodwill impairment; (2) increase in valuation allowance related to deferred tax assets in France for which we do not anticipate future realization; and (3)

disallowed deductions due to a change in foreign legislation. The following items increased our tax benefit: (1) recognition of research and experimentation credits for 2012 and 2013 due to the signing of The American Relief Act of 2012 on January 2, 2013; (2) earnings of our subsidiaries outside of the U.S. in jurisdictions where our statutory tax rate is lower than in the U.S.; (3) the benefit of certain interest expense deductions; and (4) benefits of certain acquisition related elections for tax purposes.

Our tax provisions for 2012 and 2011 reflect the benefits of lower statutory tax rates on foreign earnings as compared with our U.S. federal statutory rate, foreign interest expense deductions and the benefits of certain acquisition related elections for tax purposes. During 2012, we recognized a benefit related to the release of reserve for uncertain tax positions. No foreign tax benefit was recorded for the goodwill impairment charge in 2011.

Deferred tax assets and liabilities consist of the following:

	At December 31,	
	2013	2012
	(in thousands)	
Deferred tax assets		
Loss carryforwards ⁽¹⁾	\$ 174,360	\$ 164,254
Accrued expenses	40,593	32,998
Depreciation and amortization	16,770	9,632
Warranty reserves	16,704	16,712
Tax credits ⁽²⁾	16,073	7,054
Pension plan benefits expense	13,464	14,834
Equity compensation	9,908	10,501
Inventory valuation	2,942	4,557
Other deferred tax assets, net	9,858	5,824
Total deferred tax assets	<u>300,672</u>	<u>266,366</u>
Valuation allowance	<u>(161,026)</u>	<u>(138,910)</u>
Total deferred tax assets, net of valuation allowance	<u>139,646</u>	<u>127,456</u>
Deferred tax liabilities		
Depreciation and amortization	(50,606)	(59,210)
Tax effect of accumulated translation	(1,551)	(2,012)
Other deferred tax liabilities, net	(2,883)	(4,826)
Total deferred tax liabilities	<u>(55,040)</u>	<u>(66,048)</u>
Net deferred tax assets	<u>\$ 84,606</u>	<u>\$ 61,408</u>

(1) For tax return purposes at December 31, 2013, we had U.S. federal loss carryforwards of \$23.1 million that expire during the years 2020 and 2021. At December 31, 2013, we have net operating loss carryforwards in Luxembourg of \$408.1 million that can be carried forward indefinitely, offset by a full valuation allowance (see discussion below). The remaining portion of the loss carryforwards are composed primarily of losses in various other foreign jurisdictions. The majority of these losses can be carried forward indefinitely. At December 31, 2013, there was a valuation allowance of \$161.0 million primarily associated with foreign loss carryforwards.

(2) For tax return purposes at December 31, 2013, we had: (1) U.S. general business credits of \$28.0 million, which begin to expire in 2021; (2) U.S. alternative minimum tax credits of \$2.5 million that can be carried forward indefinitely; and (3) U.S. foreign tax credits of \$900,000, which begin to expire in 2019.

Since 2007 one of our Luxembourg entities has incurred losses that the Company believed would not be utilized and accordingly, the associated deferred tax asset was not recorded. During the fourth quarter of 2013 the Company has included the losses of the Luxembourg entity on its financial statements as a result of new information supporting the assertion of the ability to generate income in Luxembourg in future periods.

At December 31, 2013 the Luxembourg net operating loss carryforward was \$408.1 million. A full valuation allowance is recorded for this asset due to a history of losses. The Company will continue to evaluate the need for a valuation allowance against this tax asset and will adjust the valuation allowance as deemed appropriate which, when adjusted, will result in an impact to the effective tax rate.

We record valuation allowances to reduce deferred tax assets to the extent we believe it is more likely than not that a portion of such assets will not be realized. In making such determinations, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies, and our ability to carry back losses to prior years. We are required to make assumptions and judgments about potential outcomes that lie outside management's control. Our most sensitive and critical factors are the projection, source, and character of future taxable income. Although realization is not assured, management believes it is more likely than not that deferred tax assets, net of valuation allowance, will be realized. The amount of deferred tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward periods are reduced or current tax planning strategies are not implemented.

Our deferred tax assets at December 31, 2013 do not include the tax effect on \$55.2 million of excess tax benefits from employee stock plan exercises. Common stock will be increased by \$20.5 million when such excess tax benefits reduce cash taxes payable.

We do not provide U.S. deferred taxes on temporary differences related to our foreign investments that are considered permanent in duration. These temporary differences consist primarily of undistributed foreign earnings of \$22.5 million and \$48.8 million at December 31, 2013 and 2012, respectively. Foreign taxes have been provided on these undistributed foreign earnings. We have not computed the unrecognized deferred income tax liability on these temporary differences. There are many assumptions that must be considered to calculate the liability, thereby making it impractical to compute at this time.

We are subject to income tax in the United States and numerous foreign jurisdictions. Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are fully supportable. We adjust these reserves in light of changing facts and circumstances, such as the outcome of tax audits. The provision for income taxes includes the impact of reserve positions and changes to reserves that are considered appropriate.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

Unrecognized tax benefits at January 1, 2011	\$	44,049
Gross increase to positions in prior years		2,132
Gross decrease to positions in prior years		(16,603)
Gross increases to current period tax positions		1,866
Audit settlements		—
Decrease related to lapsing of statute of limitations		(2,888)
Effect of change in exchange rates		(74)
Unrecognized tax benefits at December 31, 2011	\$	<u>28,482</u>
Gross increase to positions in prior years		299
Gross decrease to positions in prior years		(51)
Gross increases to current period tax positions		3,347
Audit settlements		(27)
Decrease related to lapsing of statute of limitations		(5,769)
Effect of change in exchange rates		152
Unrecognized tax benefits at December 31, 2012	\$	<u>26,433</u>
Gross increase to positions in prior years		2,154
Gross decrease to positions in prior years		(536)
Gross increases to current period tax positions		1,670
Audit settlements		—
Decrease related to lapsing of statute of limitations		(817)
Effect of change in exchange rates		(289)
Unrecognized tax benefits at December 31, 2013	\$	<u><u>28,615</u></u>

	At December 31,		
	2013	2012	2011
	(in thousands)		
The amount of unrecognized tax benefits that, if recognized, would affect our effective tax rate	\$ 27,694	\$ 25,852	\$ 28,196

We classify interest expense and penalties related to unrecognized tax benefits and interest income on tax overpayments as components of income tax expense. The net interest and penalties expense (benefit) recognized is as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Net interest and penalties expense (benefit)	\$ (898)	\$ (414)	\$ (795)

	At December 31,	
	2013	2012
	(in thousands)	
Accrued interest	\$ 2,078	\$ 3,095
Accrued penalties	3,075	3,030

We believe it is reasonably possible that our unrecognized tax benefits may decrease by approximately \$2.1 million within the next twelve months due to the expiration of the statute of limitations. At December 31, 2013, we are not able to reasonably estimate the timing of future cash flows relating to our uncertain tax positions.

We file income tax returns in the U.S. federal jurisdiction and various states and foreign jurisdictions. We are subject to income tax examination by tax authorities in our major tax jurisdictions as follows:

Tax Jurisdiction	Years Subject to Audit
U.S. federal	Subsequent to 1998
France	Subsequent to 2009
Germany	Subsequent to 2007
Brazil	Subsequent to 2007
United Kingdom	Subsequent to 2006

The American Taxpayer Relief Act of 2012 (the "Act") was signed into law on January 2, 2013 and extended several business tax provisions including: (1) the active financing income and controlled foreign corporation look-through exceptions to certain foreign income; and (2) the research and experimentation credit. The tax effects of the Act were recognized in the first quarter of 2013.

Note 12: Commitments and Contingencies

Commitments

Operating lease rental expense for factories, service and distribution locations, offices, and equipment was as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Rental expense	\$ 18,662	\$ 17,877	\$ 18,513

Future minimum lease payments at December 31, 2013, under noncancelable operating leases with initial or remaining terms in excess of one year are as follows:

	Minimum Payments	
	(in thousands)	
2014	\$	11,710
2015		9,918
2016		8,341
2017		7,797
2018		7,770
Beyond 2018		7,155
Future minimum lease payments	<u>\$</u>	<u>52,691</u>

Rent expense is recognized straight-line over the lease term, including renewal periods if reasonably assured. We lease most of our sales and distribution locations and administrative offices. Our leases typically contain renewal options similar to the original terms with lease payments that increase based on the consumer price index.

Guarantees and Indemnifications

We are often required to obtain standby letters of credit (LOCs) or bonds in support of our obligations for customer contracts. These standby LOCs or bonds typically provide a guarantee to the customer for future performance, which usually covers the installation phase of a contract and may, on occasion, cover the operations and maintenance phase of outsourcing contracts.

Our available lines of credit, outstanding standby LOCs, and bonds are as follows:

	December 31, 2013		December 31, 2012	
	(in thousands)			
Credit facilities ⁽¹⁾				
Multicurrency revolving line of credit	\$	660,000	\$	660,000
Long-term borrowings		(120,000)		(140,000)
Standby LOCs issued and outstanding		(49,491)		(54,328)
Net available for additional borrowings and LOCs	<u>\$</u>	<u>490,509</u>	<u>\$</u>	<u>465,672</u>
Unsecured multicurrency revolving lines of credit with various financial institutions				
Multicurrency revolving line of credit	\$	115,269	\$	67,308
Standby LOCs issued and outstanding		(31,714)		(29,906)
Short-term borrowings ⁽²⁾		(4,252)		(851)
Net available for additional borrowings and LOCs	<u>\$</u>	<u>79,303</u>	<u>\$</u>	<u>36,551</u>
Unsecured surety bonds in force	\$	186,446	\$	164,820

⁽¹⁾ Refer to Note 6 for details regarding our secured credit facilities.

⁽²⁾ Short-term borrowings are included in "Other current liabilities" on the Consolidated Balance Sheets.

In the event any such standby LOC or bond is called, we would be obligated to reimburse the issuer of the standby LOC or bond; however, we do not believe that any outstanding LOC or bond will be called.

We generally provide an indemnification related to the infringement of any patent, copyright, trademark, or other intellectual property right on software or equipment within our sales contracts, which indemnifies the customer from and pays the resulting costs, damages, and attorney's fees awarded against a customer with respect to such a claim provided that (a) the customer promptly notifies us in writing of the claim and (b) we have the sole control of the defense and all related settlement negotiations. We may also provide an indemnification to our customers for third party claims resulting from damages caused by the negligence or willful misconduct of our employees/agents in connection with the performance of certain contracts. The terms of our indemnifications generally do not limit the maximum potential payments. It is not possible to predict the maximum potential amount of future payments under these or similar agreements.

Legal Matters

We are subject to various legal proceedings and claims of which the outcomes are subject to significant uncertainty. Our policy is to assess the likelihood of any adverse judgments or outcomes related to legal matters, as well as ranges of probable losses. A determination of the amount of the liability required, if any, for these contingencies is made after an analysis of each known issue. A liability is recorded and charged to operating expense when we determine that a loss is probable and the amount can be reasonably estimated. Additionally, we disclose contingencies for which a material loss is reasonably possible, but not probable.

In 2010 and 2011, Transdata Incorporated (Transdata) filed lawsuits against four of our customers, CenterPoint Energy (CenterPoint), TriCounty Electric Cooperative, Inc. (Tri-County), San Diego Gas & Electric Company (San Diego), and Texas-New Mexico Power Company (TNMP), as well as several other utilities, alleging infringement of three patents owned by Transdata related to the use of an antenna in a meter. Pursuant to our contractual obligations with our customers, we agreed, subject to certain exceptions, to indemnify and defend them in these lawsuits. The complaints seek unspecified damages as well as injunctive relief. CenterPoint, Tri-County, San Diego, and TNMP have denied all of the substantive allegations and filed counterclaims seeking a declaratory judgment that the patents are invalid and not infringed. In December 2011, the Judicial Panel on Multi-District Litigation consolidated all of these cases in the Western District of Oklahoma for pretrial proceedings. On April 17, 2011, the Oklahoma court stayed the litigation pending the resolution of re-examination proceedings in the United States Patent and Trademark Office (U.S. PTO). The U.S. PTO has issued re-examination certificates confirming the patentability of the original claims and allowing certain new claims added by TransData. The parties conducted a claim construction hearing on February 5, 2013 on one claim term -- "electric meter circuitry." After initially adopting defendants' proposed construction of the term, the Court granted TransData's motion for reconsideration by order of June 25, 2013, and has adopted TransData's proposed construction. On October 1, 2013, the Court issued an order construing other claim terms. Fact discovery is currently scheduled to close on March 31, 2014, with experts' reports to follow. No trials are scheduled. We do not believe this matter will have a material adverse effect on our business or financial condition, although an unfavorable outcome could have a material adverse effect on our results of operations for the period in which such a loss is recognized.

Itron and its subsidiaries are parties to various employment-related proceedings in jurisdictions where it does business. None of the proceedings are individually material to Itron, and we believe that we have made adequate provision such that the ultimate disposition of the proceedings will not materially affect Itron's business or financial condition.

In a series of cases, approximately 300 former employees of Itron Sistemas e Tecnologia Ltda. (Itron Brazil), the majority of whose employment contracts were terminated in 2011, have sued Itron Brazil seeking payment of overtime and salary differential and alleging that the assumption of the employment relationship by Itron Brazil constituted illegal outsourcing under Brazilian law. In 2008, Itron Brazil entered into an agreement to provide installation and maintenance services to one of its customers and, to perform such services, hired over 800 employees of the previous provider of such services. In 2011, Itron Brazil determined to terminate the contract with its customer, which led to the termination of approximately 870 employees. Under applicable statutes of limitation, most additional employee claims must have been brought prior to October 31, 2013. Itron Brazil intends to vigorously defend these cases, but the ultimate outcome of the cases cannot be determined at this time.

On October 31, 2013, we received a claim from one of our customers relating to alleged defects in meters sold to this customer since the year 2000. The customer asserts that it should be compensated for product and other related costs. Itron has engaged the customer in discussions to determine the factual basis for the claim. Since the discussions and related analysis are at an early stage, Itron is not yet able to estimate a potential range of loss. Currently, we do not believe that the outcome of this matter will have a material adverse effect on our business or financial condition, although an unfavorable outcome could have a material adverse effect on our results of operations for the period in which such a loss is recognized.

Warranty

A summary of the warranty accrual account activity is as follows:

	Year Ended December 31,	
	2013	2012
	(in thousands)	
Beginning balance	\$ 53,605	\$ 79,536
New product warranties	5,561	8,735
Other changes/adjustments to warranties	10,343	4,451
Claims activity	(23,593)	(38,979)
Effect of change in exchange rates	(770)	(138)
Ending balance	45,146	53,605
Less: current portion of warranty	21,048	27,115
Long-term warranty	<u>\$ 24,098</u>	<u>\$ 26,490</u>

Total warranty expense is classified within cost of revenues and consists of new product warranties issued, costs related to extended warranty contracts, and other changes and adjustments to warranties. Warranty expense for the years ended December 31 is as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Total warranty expense	\$ 15,904	\$ 13,186	\$ 49,851

Warranty expense increased \$2.7 million during the year ended December 31, 2013 compared with the prior year primarily as a result of an increased provision due to the identification of battery and firmware issues for a customer. Warranty expense for the year ended December 31, 2012 reflects a \$5.3 million adjustment, which reduced a warranty accrual, originally recorded in 2011, as a result of lower than estimated replacements. Warranty expense for the year ended December 31, 2011 reflects a charge of \$12.6 million associated with a vendor-supplied component in North America and a charge of \$6.6 million resulting from the identification of a specific batch of C&I meters that were manufactured in North America with a misaligned automated solder-feeder. Warranty expense for the year ended December 31, 2011 also reflects the benefit of an \$8.6 million insurance recovery associated with the settlement of product claims in Sweden in 2010 and a warranty charge of \$9.2 million related to certain products in Brazil.

Extended Warranty

A summary of changes to unearned revenue for extended warranty contracts is as follows:

	Year Ended December 31,	
	2013	2012
	(in thousands)	
Beginning balance	\$ 31,960	\$ 24,448
Unearned revenue for new extended warranties	4,039	8,832
Unearned revenue recognized	(2,210)	(1,390)
Effect of change in exchange rates	(261)	70
Ending balance	33,528	31,960
Less: current portion of unearned revenue for extended warranty	2,385	2,031
Long-term unearned revenue for extended warranty within Other long-term obligations	<u>\$ 31,143</u>	<u>\$ 29,929</u>

Health Benefits

We are self insured for a substantial portion of the cost of our U.S. employee group health insurance. We purchase insurance from a third party, which provides individual and aggregate stop loss protection for these costs. Each reporting period, we expense the costs of our health insurance plan including paid claims, the change in the estimate of incurred but not reported (IBNR) claims, taxes, and administrative fees (collectively, the plan costs).

Plan costs are as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Plan costs	\$ 22,324	\$ 26,755	\$ 24,331

IBNR accrual, which is included in wages and benefits payable, is as follows:

	December 31,	December 31,
	2013	2012
	(in thousands)	
IBNR accrual	\$ 2,206	\$ 2,552

Our IBNR accrual and expenses may fluctuate due to the number of plan participants, claims activity, and deductible limits. For our employees located outside of the United States, health benefits are provided primarily through governmental social plans, which are funded through employee and employer tax withholdings.

Note 13: Restructuring

2011 Projects

During the fourth quarter of 2011, we announced the approval of projects to restructure our manufacturing operations to increase efficiency and lower our cost of manufacturing. We began implementing these projects in the fourth quarter of 2011.

As of June 30, 2013, we had substantially completed these restructuring projects. We do not anticipate further expenses related to these restructuring projects to be recognized in the Consolidated Statements of Operations in future periods.

The total expected restructuring costs, the costs recognized in prior periods, the restructuring costs recognized during the year ended December 31, 2013, and the remaining expected restructuring costs as of December 31, 2013 are as follows:

	Total Expected Costs at December 31, 2013	Costs Recognized in Prior Periods	Costs Recognized During the Year Ended December 31, 2013	Remaining Costs to be Recognized at December 31, 2013
	(in thousands)			
Employee severance costs	\$ 46,850	\$ 44,196	\$ 2,654	\$ —
Asset impairments	20,332	20,305	27	—
Other restructuring costs	6,963	5,246	1,717	—
Total	<u>\$ 74,145</u>	<u>\$ 69,747</u>	<u>\$ 4,398</u>	<u>\$ —</u>
<i>Segments:</i>				
Electricity	\$ 28,805	\$ 27,712	\$ 1,093	\$ —
Gas	24,580	25,478	(898)	—
Water	15,675	14,556	1,119	—
Corporate unallocated	5,085	2,001	3,084	—
Total	<u>\$ 74,145</u>	<u>\$ 69,747</u>	<u>\$ 4,398</u>	<u>\$ —</u>

2013 Projects

On September 10, 2013, our management approved new projects to restructure our operations to improve profitability and increase efficiencies. These new restructuring projects will reduce headcount and close or consolidate several manufacturing and office facilities. Overall, we expect to reduce our work force by approximately 9%.

We began implementing these projects in the third quarter of 2013, and we expect to substantially complete these projects by December 31, 2014. Certain aspects of the projects are subject to a variety of labor and employment laws, rules, and regulations, which could result in a delay in implementing the projects at some locations.

The total expected restructuring costs as of December 31, 2013 were approximately \$31.3 million, which is an increase of approximately \$2.2 million from the total expected costs at September 30, 2013. The increase was the result of asset impairments recognized at a manufacturing site to be closed and a small increase in the total headcount reduction.

The total expected restructuring costs, the restructuring costs recognized during the year ended December 31, 2013, and the remaining expected restructuring costs as of December 31, 2013 are as follows:

	Total Expected Costs at December 31, 2013	Costs Recognized During the Year Ended December 31, 2013	Remaining Costs to be Recognized at December 31, 2013
	(in thousands)		
Employee severance costs	\$ 29,186	\$ 29,186	\$ —
Asset impairments	1,232	1,232	—
Other restructuring costs	931	681	250
Total	<u>\$ 31,349</u>	<u>\$ 31,099</u>	<u>\$ 250</u>
<i>Segments:</i>			
Electricity	\$ 24,250	\$ 24,056	\$ 194
Gas	4,404	4,369	35
Water	1,973	1,957	16
Corporate unallocated	722	717	5
Total	<u>\$ 31,349</u>	<u>\$ 31,099</u>	<u>\$ 250</u>

In addition, the 2013 Projects resulted in approximately \$850,000 of inventory obsolescence that was recorded in cost of revenues. This obsolescence expense resulted from the decision to stop manufacturing certain products in Latin America for which raw materials remained on hand.

The following table summarizes the activity within the restructuring related balance sheet accounts during the year ended December 31, 2013:

	Accrued Employee Severance	Asset Impairments & Net (Gain) Loss on Sale or Disposal	Other Accrued Costs	Total
	(in thousands)			
Beginning balance, January 1, 2013	\$ 14,498	\$ —	\$ 3,216	\$ 17,714
Costs incurred and charged to expense	31,840	1,259	2,398	35,497
Cash payments	(14,511)	—	(1,972)	(16,483)
Non-cash items	—	(1,259)	—	(1,259)
Effect of change in exchange rates	882	—	(10)	872
Ending balance, December 31, 2013	<u>\$ 32,709</u>	<u>\$ —</u>	<u>\$ 3,632</u>	<u>\$ 36,341</u>

Other restructuring costs include expenses to exit the facilities once the operations in those facilities have ceased. Costs associated with restructuring activities are generally presented in the Consolidated Statements of Operations as restructuring, except for certain costs associated with inventory write-downs, which are classified within cost of revenues, and accelerated depreciation expense, which is recognized according to the use of the asset.

The current portions of the restructuring related liability balances were \$30.3 million and \$13.2 million as of December 31, 2013 and 2012, respectively. The current portion of the liability is classified within "Other current liabilities" on the Consolidated Balance Sheets. The long-term portions of the restructuring related liability related balances were \$6.0 million and \$4.5 million as of December 31, 2013 and 2012, respectively. The long term portion of the restructuring liability is classified within "Other long-term liabilities" on the Consolidated Balance Sheets.

Asset impairments are determined at the asset group level. Assets held for sale are classified within other current assets and are reported at the lower of the carrying amount or the fair value, less costs to sell, and are no longer depreciated or amortized.

The following table includes long-lived assets held for sale and long-lived assets held and used that were measured at fair value on a nonrecurring basis as of December 31, 2013 and 2012, and the related recognized losses for the years ended December 31, 2013 and 2012:

	<u>Net Carrying Value</u>		<u>Fair Value Measurement (Level 3)</u>		<u>Total Loss Recognized</u>
			(in thousands)		
<i>2013</i>					
Long-lived assets held for sale	\$	—	\$	—	\$
					—
<i>2012</i>					
Long-lived assets held for sale	\$	3,184	\$	3,184	\$
					2

The fair values of the disposal groups included in long-lived assets held for sale were determined based on the estimated proceeds from their expected sales, net of estimated selling costs. Long-lived assets held for sale at December 31, 2012 consist of one asset group that includes land, a building, and building improvements, which was sold in 2013.

Revenues and net operating income from the activities we have exited or will exit under the restructuring plan are not material to our operating segments or consolidated results.

Note 14: Shareholders' Equity

Stock Repurchase Plan

On March 8, 2013, the Board authorized a twelve-month repurchase program of up to \$50 million in shares of our common stock. From March 8, 2013 through December 31, 2013, we have repurchased 645,000 shares of our common stock, totaling \$27.0 million, with \$23.0 million remaining under the repurchase program. Repurchases are made in the open market or in privately negotiated transactions and in accordance with applicable securities laws. Refer to Part II, Item 5: "Market For Registrants Common Equity, Released Stockholder Matters and Issuer Purchases of Equity Securities" for additional information related to our share repurchase program.

Other Comprehensive Income (Loss)

Other comprehensive income (loss) is reflected as a net increase (decrease) to shareholders' equity and is not reflected in our results of operations. The changes in the components of accumulated other comprehensive income (loss), net of tax, were as follows:

	Foreign Currency Translation Adjustments	Net Unrealized Gain (Loss) on Derivative Instruments	Net Unrealized Gain (Loss) on Nonderivative Instruments	Pension Plan Benefit Liability Adjustments	Accumulated Other Comprehensive Income (Loss)
	(in thousands)				
Balances at January 1, 2011	\$ (26,026)	\$ (4,520)	\$ (5,514)	\$ 1,086	\$ (34,974)
OCI before reclassifications	1,308	4,520	(8,866)	869	(2,169)
Amounts reclassified from AOCI	—	—	—	(17)	(17)
Current period other comprehensive income (loss)	1,308	4,520	(8,866)	852	(2,186)
Balances at December 31, 2011	\$ (24,718)	\$ —	\$ (14,380)	\$ 1,938	\$ (37,160)
OCI before reclassifications	21,405	(1,689)	—	(16,772)	2,944
Amounts reclassified from AOCI	—	—	—	(168)	(168)
Current period other comprehensive income (loss)	21,405	(1,689)	—	(16,940)	2,776
Balances at December 31, 2012	\$ (3,313)	\$ (1,689)	\$ (14,380)	\$ (15,002)	\$ (34,384)
OCI before reclassifications	7,112	2	—	6,496	13,610
Amounts reclassified from AOCI	—	431	—	(1,379)	(948)
Current period other comprehensive income (loss)	7,112	433	—	5,117	12,662
Balances at December 31, 2013	\$ 3,799	\$ (1,256)	\$ (14,380)	\$ (9,885)	\$ (21,722)

The before-tax amount, income tax (provision) benefit, and net-of-tax amount related to each component of other comprehensive income (loss) during the reporting periods were as follows:

	Year Ended December 31,		
	2013	2012	2011
	(in thousands)		
Before-tax amount			
Foreign currency translation adjustment	\$ 8,126	\$ 28,002	\$ 1,101
Net unrealized gain (loss) on derivative instruments designated as cash flow hedges	(3)	(2,725)	3,054
Net unrealized gain (loss) on a nonderivative net investment hedging instrument	—	—	(14,278)
Net hedging (gain) loss reclassified into net income (loss)	697	—	4,200
Pension plan benefits liability adjustment	7,344	(24,358)	717
Total other comprehensive income (loss), before tax	16,164	919	(5,206)
Tax (provision) benefit			
Foreign currency translation adjustment	(1,014)	(6,597)	207
Net unrealized gain (loss) on derivative instruments designated as cash flow hedges	5	1,036	(1,145)
Net unrealized gain (loss) on a nonderivative net investment hedging instrument	—	—	5,412
Net hedging (gain) loss reclassified into net income (loss)	(266)	—	(1,589)
Pension plan benefits liability adjustment	(2,227)	7,418	135
Total other comprehensive income (loss) tax (provision) benefit	(3,502)	1,857	3,020
Net-of-tax amount			
Foreign currency translation adjustment	7,112	21,405	1,308
Net unrealized gain (loss) on derivative instruments designated as cash flow hedges	2	(1,689)	1,909
Net unrealized gain (loss) on a nonderivative net investment hedging instrument	—	—	(8,866)
Net hedging (gain) loss reclassified into net income (loss)	431	—	2,611
Pension plan benefits liability adjustment	5,117	(16,940)	852
Total other comprehensive income (loss), net of tax	\$ 12,662	\$ 2,776	\$ (2,186)

Details about the AOCI components reclassified to the Consolidated Statements of Operations during the reporting periods are as follows:

	Amount Reclassified from AOCI ⁽¹⁾			Affected Line Item in the Income Statement
	Year Ended December 31,			
	2013	2012	2011	
	(in thousands)			
Amortization of defined benefit pension items				
Prior-service costs	\$ (70)	\$ (68)	\$ (74)	(2)
Actuarial gains (losses)	(926)	(161)	85	(2)
Loss on settlement	(325)	(13)	(25)	(2)
Other	(658)	—	—	(2)
Total, before tax	(1,979)	(242)	(14)	Income before income taxes
Tax benefit (provision)	600	74	(3)	Income tax provision
Total, net of tax	(1,379)	(168)	(17)	Net income
Total reclassifications for the period, net of tax	\$ (1,379)	\$ (168)	\$ (17)	Net income

(1) Amounts in parenthesis indicate debits to the Statements of Operations.

(2) These AOCI components are included in the computation of net periodic pension cost. Refer to Note 8 for additional details.

Refer to Note 7 for additional details related to derivative activities that resulted in reclassification of AOCI to the Consolidated Statements of Operations.

Note 15: Fair Values of Financial Instruments

The fair values at December 31, 2013 and 2012 do not reflect subsequent changes in the economy, interest rates, tax rates, and other variables that may affect the determination of fair value.

	December 31, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)			
Assets				
Cash and cash equivalents	\$ 124,805	\$ 124,805	\$ 136,411	\$ 136,411
Foreign exchange forwards	41	41	146	146
Liabilities				
Credit facility				
USD denominated term loan	\$ 258,750	\$ 258,011	\$ 277,500	\$ 275,365
Multicurrency revolving line of credit	120,000	119,609	140,000	138,751
Interest rate swaps	2,031	2,031	2,725	2,725
Foreign exchange forwards	145	145	114	114

The following methods and assumptions were used in estimating fair values:

Cash and cash equivalents: Due to the liquid nature of these instruments, the carrying value approximates fair value (Level 1).

Credit Facility - term loan and multicurrency revolving line of credit: The term loan and revolver are not traded publicly. The fair values, which are determined based upon a hypothetical market participant, are calculated using a discounted cash flow model with Level 2 inputs, including estimates of incremental borrowing rates for debt with similar terms, maturities, and credit profiles. Refer to Note 6 for a further discussion of our debt.

Derivatives: See Note 7 for a description of our methods and assumptions in determining the fair value of our derivatives, which were determined using Level 2 inputs.

Note 16: Segment Information

In March 2013, we separated the management of our Energy operating segment into Electricity and Gas to allow each business line to develop its own go-to-market strategy, prioritize its marketing and product development requirements, and focus on its strategic investments. Our sales, marketing, and delivery functions are managed under three business lines - Electricity, Gas, and Water. Our product development and manufacturing operations are now managed on a worldwide basis to promote a global perspective in our operations and processes and still maintain alignment with the business lines. The transition to the new organizational structure, including changes to operations and financial reporting systems, was completed in the fourth quarter of 2013. Our historical segment information for the years ended December 31, 2012 and 2011 has been recast to reflect our new operating segments.

Our Water operating segment includes both our global water and heat solutions.

We have three measures of segment performance: revenue, gross profit (margin), and operating income (margin). Our operating segments have distinct products, and, therefore, intersegment revenues are minimal. Corporate operating expenses, interest income, interest expense, other income (expense), and income tax provision (benefit) are not allocated to the segments, nor included in the measure of segment profit or loss. In addition, we allocate only certain production assets and intangible assets to our operating segments. We do not manage the performance of the segments on a balance sheet basis.

Segment Products

Electricity Standard electricity (electromechanical and electronic) meters; advanced electricity meters and communication modules; smart electricity meters; smart electricity communication modules; prepayment systems, including smart key, keypad, and smart card communication technologies; advanced systems, including handheld, mobile, and fixed network collection technologies; smart network technologies; meter data management software; knowledge application solutions; and professional services, including implementation, installation, consulting, and analysis.

Gas Standard gas meters; advanced gas meters and communication modules; smart gas meters; smart gas communication modules; prepayment systems, including smart key, keypad, and smart card communication technologies; advanced systems, including handheld, mobile, and fixed network collection technologies; smart network technologies; meter data management software; knowledge application solutions; and professional services, including implementation, installation, consulting, and analysis.

Water Standard water and heat meters; advanced and smart water meters and communication modules; advanced systems including handheld, mobile, and fixed network collection technologies; meter data management software; knowledge application solutions; and professional services including implementation, installation, consulting, analysis, and system management.

During 2013, we incurred a goodwill impairment charge of \$173.2 million. In addition we incurred costs of \$1.7 million in 2012 and \$4.4 million in 2013 related to restructuring projects approved in 2011. Further, in 2013, new restructuring projects were approved to increase efficiency and lower our cost of manufacturing, for which we incurred costs of \$31.1 million in 2013.

Note 18: Subsequent Events*Stock Repurchases*

Subsequent to December 31, 2013 we repurchased 75,203 shares of our common stock under the stock repurchase program authorized by the Board of Directors on March 8, 2013. The average price paid per share was \$39.20.

On February 7, 2014, Itron's Board of Directors authorized a new repurchase program of up to \$50 million of our common stock over a 12-month period, which will take effect following the expiration of the current stock repurchase program on March 7, 2014. Repurchases are made in the open market or in privately negotiated transactions and in accordance with applicable securities laws.

ITEM 9: CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There were no disagreements with our independent accountants on accounting and financial disclosure matters within the three year period ended December 31, 2013, or in any period subsequent to such date, through the date of this report.

ITEM 9A: CONTROLS AND PROCEDURES

(i) Evaluation of disclosure controls and procedures.

An evaluation was performed under the supervision and with the participation of our Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e)) under the Securities Exchange Act of 1934 as amended. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that as of December 31, 2013, the Company's disclosure controls and procedures were effective to ensure the information required to be disclosed by an issuer in the reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

(ii) Internal Control Over Financial Reporting.

- (a) *Management's Annual Report on Internal Control Over Financial Reporting.* Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 Framework). Based on our evaluation under the framework in *Internal Control—Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2013.

The effectiveness of our internal control over financial reporting as of December 31, 2013 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report that is included in this Annual Report on Form 10-K.

- (b) *Changes in internal control over financial reporting.* The Company's disclosure controls, including the Company's internal controls, are designed to provide a reasonable level of assurance that the stated objectives are met. We concluded, as stated in (a) above, that the Company's internal control over financial reporting was effective in providing this reasonable level of assurance as of December 31, 2013. The Company's management, including the Chief Executive Officer and Chief Financial Officer, does not expect that the Company's disclosure controls or internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the fact that judgments in decision-making can be faulty. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. Because of the inherent limitations in a control system, misstatements due to error or fraud may occur and not be prevented or detected.

While we are continuing the process of upgrading our global enterprise resource software system, there have been no changes in our internal control over financial reporting during the year ended December 31, 2013 that materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

(c) *Report of Independent Registered Public Accounting Firm.*

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Itron, Inc.

We have audited Itron, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). Itron, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Itron, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Itron, Inc. as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income (loss), equity, and cash flows for each of the three years in the period ended December 31, 2013 of Itron, Inc. and our report dated February 25, 2014 expressed an unqualified opinion thereon.

ITEM 9B: OTHER INFORMATION

No information was required to be disclosed in a report on Form 8-K during the fourth quarter of 2013 that was not reported.

PART III

ITEM 10: DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The section entitled “Proposal 1 – Election of Directors” appearing in our Proxy Statement for the Annual Meeting of Shareholders to be held on May 1, 2014 (the 2014 Proxy Statement) sets forth certain information with regard to our directors as required by Item 401 of Regulation S-K and is incorporated herein by reference.

Certain information with respect to persons who are or may be deemed to be executive officers of Itron, Inc. as required by Item 401 of Regulation S-K is set forth under the caption “Management” in Part I of this Annual Report on Form 10-K.

The section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” appearing in the 2014 Proxy Statement sets forth certain information as required by Item 405 of Regulation S-K and is incorporated herein by reference.

The section entitled “Corporate Governance” appearing in the 2014 Proxy Statement sets forth certain information with respect to the Registrant’s code of conduct and ethics as required by Item 406 of Regulation S-K and is incorporated herein by reference. Our code of conduct and ethics can be accessed on our website, at www.itron.com under the Investors section.

There were no material changes to the procedures by which security holders may recommend nominees to Itron's board of directors during 2014, as set forth by Item 407(c)(3) of Regulation S-K.

The section entitled “Corporate Governance” appearing in the 2014 Proxy Statement sets forth certain information regarding the Audit/Finance Committee, including the members of the Committee and the Audit/Finance Committee financial experts, as set forth by Item 407(d)(4) and (d)(5) of Regulation S-K and is incorporated herein by reference.

ITEM 11: EXECUTIVE COMPENSATION

The sections entitled “Compensation of Directors” and “Executive Compensation” appearing in the 2014 Proxy Statement set forth certain information with respect to the compensation of directors and management of Itron as required by Item 402 of Regulation S-K and are incorporated herein by reference.

The section entitled “Corporate Governance” appearing in the 2014 Proxy Statement sets forth certain information regarding members of the Compensation Committee required by Item 407(e)(4) of Regulation S-K and is incorporated herein by reference.

The section entitled “Compensation Committee Report” appearing in the 2014 Proxy Statement sets forth certain information required by Item 407(e)(5) of Regulation S-K and is incorporated herein by reference.

ITEM 12: SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The section entitled “Equity Compensation Plan Information” appearing in the 2014 Proxy Statement sets forth certain information required by Item 201(d) of Regulation S-K and is incorporated herein by reference.

The section entitled “Security Ownership of Certain Beneficial Owners and Management” appearing in the 2014 Proxy Statement sets forth certain information with respect to the ownership of our common stock as required by Item 403 of Regulation S-K and is incorporated herein by reference.

ITEM 13: CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The section entitled “Corporate Governance” appearing in the 2014 Proxy Statement sets forth certain information required by Item 404 of Regulation S-K and is incorporated herein by reference.

The section entitled “Corporate Governance” appearing in the 2014 Proxy Statement sets forth certain information with respect to director independence as required by Item 407(a) of Regulation S-K and is incorporated herein by reference.

ITEM 14: PRINCIPAL ACCOUNTING FEES AND SERVICES

The section entitled “Independent Registered Public Accounting Firm’s Audit Fees and Services” appearing in the 2014 Proxy Statement sets forth certain information with respect to the principal accounting fees and services and the Audit/Finance Committee’s policy on pre-approval of audit and permissible non-audit services performed by our independent auditors as required by Item 9(e) of Schedule 14A and is incorporated herein by reference.

PART IV

ITEM 15: EXHIBITS, FINANCIAL STATEMENT SCHEDULE

(a) (1) Financial Statements:

The financial statements required by this item are submitted in Item 8 of this Annual Report on Form 10-K.

(a) (2) Financial Statement Schedule:

Schedule II: Valuation and Qualifying Accounts

Financial Statement Schedules not listed above have been omitted because of the absence of conditions under which they are required or because the required information is included in the Consolidated Financial Statements or the Notes thereto.

(a) (3) Exhibits:
